## **Social Self Global Culture:**

Social Self, Global Culture Peter Beilharz, Trevor Hogan, 2002 This volume offers a new approach to introductory sociology It addresses the question of globalisation and the future of sociology in the context of Australia and the nation state

*Social Self, Global Culture* Allan Kellehear, 1996 *Social Self Global Culture* An Introduction to Sociological Ideas offers an exciting new approach to introductory sociology It is the first text of its kind to encourage students to examine themselves as individuals before embarking on the study of community nation and the global processes that have influenced Australian society Students begin with familiar issues and experiences and then move progressively towards more abstract questions and ideas They are encouraged to look at their personal experiences in the light of contemporary sociological analyses The authors critically and reflectively discuss a broad range of topics such as the ethnic and gendered self religion work government health welfare social movements development and world revolutions addressing some of the most exciting and unnerving issues to confront contemporary sociologists and indeed all Australians The opening chapter introduces students to the uses of the sociological imagination in Australia Each of the twenty five chapters concludes with discussion questions and suggestions for further reading The book closes with a useful discussion of career opportunities for graduates of sociology This innovative lively and engaging text will introduce students to a variety of sociological approaches perspectives and styles

**Social Theory in the Real World** Steven Miles, 2001-05-18 *Social Theory in the Real World* is concerned with illustrating the practical benefits of social theory Many students find it hard to relate the real insights provided by social theory to their real life experiences and many lecturers struggle to demonstrate the relevance of social theory to everyday life This book offers an accessible non patronizing solution to the problem demonstrating that social theory need not be remote and obscure but if used in imaginative ways it can be indispensable in challenging our common sense perceptions and understandings The book identifies the key themes of contemporary social theory mass society postindustrialism consumerism postmodernism McDonaldization risk and globalisation

Social Self-Organization Dirk Helbing, 2012-05-05 What are the principles that keep our society together This question is even more difficult to answer than the long standing question what are the forces that keep our world together However the social challenges of humanity in the 21st century ranging from the financial crises to the impacts of globalization require us to make fast progress in our understanding of how society works and how our future can be managed in a resilient and sustainable way This book can present only a few very first steps towards this ambitious goal However based on simple models of social interactions one can already gain some surprising insights into the social macro level outcomes and dynamics that is implied by individual micro level interactions Depending on the nature of these interactions they may imply the spontaneous formation of social conventions or the birth of social cooperation but also their sudden breakdown This can end in deadly crowd disasters or tragedies of the commons such as financial crises or environmental destruction Furthermore we demonstrate that classical modeling approaches such as

representative agent models do not provide a sufficient understanding of the self organization in social systems resulting from individual interactions The consideration of randomness spatial or network interdependencies and nonlinear feedback effects turns out to be crucial to get fundamental insights into how social patterns and dynamics emerge Given the explanation of sometimes counter intuitive phenomena resulting from these features and their combination our evolutionary modeling approach appears to be powerful and insightful The chapters of this book range from a discussion of the modeling strategy for socio economic systems over experimental issues up the right way of doing agent based modeling We furthermore discuss applications ranging from pedestrian and crowd dynamics over opinion formation coordination and cooperation up to conflict and also address the response to information issues of systemic risks in society and economics and new approaches to manage complexity in socio economic systems Selected parts of this book had been previously published in peer reviewed journals

*Beyond the Global Culture War* Adam K. Webb,2013-08-21 Presenting a cross cultural critique of global liberalism this book argues for a broad based challenge that can meet it on its own scale It probes many of the key challenges we face in the new millennium and is a useful read for students of politics and globalization

*Social Psychology of Culture* Chi-Yue Chiu,Ying-yi Hong,2013-12-16 As the speed of globalization accelerates world cultures are more closely connected to each other than ever before But what exactly is culture It seems to be involved in all psychological processes but can its psychological consequences be studied scientifically How can cultural differences be described without reifying culture and reinforcing cultural stereotypes Culture and mind constitute each other but how Why do humans need culture How did the evolution of the mind enable the development of human culture How does participation in culture transform the mind and how does the mind process and apply culture How may culture become a resource for pursuing valued goals and how does culture become part of the self How do culture travelers navigate cultures and negotiate multiple cultural identities The authors of this volume offer a refreshing theoretical perspective and organize seemingly disparate research evidence into a coherent body of psychological knowledge With its accessible language and lively narrative this volume engages its readers in an intellectual journey through the fascinating research literatures in psychology anthropology and the cognate disciplines This book will make an ideal textbook for senior undergraduate and graduate courses on psychology and culture cultural studies cognitive anthropology and intercultural communication
