- throw light on the public policy experience in India; and
- discuss the importance of public policy study and its present status.

4.1 INTRODUCTION

The study of public policy is very important for the relation between the public policy and its context is very intimate and organic.

This mutual influence accounts for varied experiences in the realm of public policy in different countries. This is also the reason, why all the countries do not have the same public policies. Assuming that they have the same policies, the priorities would not be the same. Thus, the nature of policy varies from country to country depending upon the requirement of its economy, social and cultural values, availability of resources, constitutional ideals, international pressure as well as, pressures from political parties, interest groups, trade unions, cultural and religious associations, etc., for example in India, our emphasis has been on the question of growth and modernisation, removal of poverty, development of agriculture, social justice, etc. Our public policies have been formulated keeping in view, all these issues. The western or developed countries have been concentrating on environmental hazards, innovations in science and technology, etc.

Thus the priorities in each country affect the nature of its public policies. The changing nature of public policies calls for extensive study of these policies. The questions relating to how these policies are formulated? Are these made keeping the priorities in view? Are these able to make optimal utilisation of available resources? All these questions have to be properly examined. As the nature of public policy largely depends on the role of the State, this Unit will try to highlight how the public policies are generated and handled by the State. The Unit will discuss the State's role in public policy process and throw light on the urgent need for a systematic public policy study. In order to stress upon the importance of public policy study, a discussion on public policy experience in India regarding its policies to bring about structural, economic and technological changes will also be made.

Investing in Maternal Health Indra Pathmanathan,Jerker Liljestrand,2003 This study provides the most comprehensive and detailed analysis available on factors behind the decline in maternal mortality in Malaysia and Sri Lanka in the past 50 to 60 years and the magnitude of health system expenditures on maternal health The main findings are that a modest investment in maternal health services combined with other poverty reduction measures leads to a fairly rapid decline in the maternal mortality ratio MMR defined as the number of maternal deaths per 100 000 live births The strategies of Malaysia and Sri Lanka changed over time from an initial emphasis on expanding the provision of

services especially in underserved areas to increasing utilization and finally to emphasizing the improvement of quality Removing financial barriers to maternal care for clients was an important step in both countries Professional midwives constitute the backbone of maternal care in Malaysia and Sri Lanka The MMR reduction in developing countries is feasible with modest public expenditures when appropriate policies are adopted focused wisely and adapted incrementally in response to environmental conditions and systems capacity World Bank **Income and Influence** Ethan B.

Kapstein, Branko Milanović, 2003 This book seeks to contribute to the ongoing debate over the role of social policy in emerging markets and postcommunist transition economies with a focus on Latin America East Asia and the former Soviet bloc The authors argue that poverty reduction has not been the major objective of social policy in these countries or even of the international financial institutions that are important providers of loans and advice to them Instead the main purpose of these programs has been to help smooth the consumption patterns of those formal sector workers who feared that economic liberalization would reduce their incomes and job prospects *Textbook of International Health: Global Health in a Dynamic World*, 2009-04-06 This classic text formerly known as the Basch textbook now completely revised in an updated new edition brings together information that students and professionals working in the wide variety of disciplines concerned with international health will find in no other single source It synthesizes historical cultural environmental economic and political considerations to provide a comprehensive global overview of the many factors that determine the health of individuals and populations The major determinants of health status in all regions of the world are discussed and interventions undertaken at community national and international levels are described The new edition features a renowned new authorship committed to updating and expanding the entire content while retaining the core elements of Basch's excellent text Development Economics Shahrukh Rafi Khan, 2019-10-23 Following the 2007-2009 financial and economic crises there has been an unprecedented demand among economics students for an alternative approach which offers a historical institutional and multidisciplinary treatment of the discipline Economic development lends itself ideally to meet this demand yet most undergraduate textbooks do not reflect this This book will fill this gap presenting all the core material needed to teach development economics in a one semester course while also addressing the need for a new economics and offering flexibility to instructors Rather than taking the typical approach of organizing by topic the book uses theories and debates to guide its structure This will allow students to see different perspectives on key development questions and therefore to understand more fully the contested nature of many key areas of development economics The book can be used as a standalone textbook on development economics or to accompany a more traditional text **International Encyclopedia of Social Policy** Tony Fitzpatrick, Huck-ju Kwon, Nick Manning, James Midgley, Gillian Pascall, 2013-07-04 Available in paperback for the first time this milestone work offers an in depth treatment of all aspects of the discipline and practice of social policy globally Supported by a distinguished international advisory board the editors have compiled almost 900 000 words across 734

entries written by 284 leading specialists to provide authoritative coverage of concepts policy actors welfare institutions and services along a series of national regional and transnational dimensions Also included are biographical entries on major policy makers and shapers The editors have particularly striven to provide strong coverage of differing geographical and cultural traditions so that the variety of social policy as both an academic discipline and a domain of governance is reflected Contributors draw in and make the necessary connections with social policy s associated disciplines to provide a rich picture of this vast and highly diverse field Comprehensive and authoritative the Encyclopedia has sought to open up rather than to foreclose the numerous areas in which there is on going research debate and sometimes serious disagreement and divergence in theory and practice To this end entries attempt to introduce a core or common ground of understanding before moving on to a wider discussion of debates regarding different conceptual and geographical approaches The whole is integrated by cross referencing and each entry includes a bibliography for further reading There is a full index The International Encyclopedia of Social Policy provides the most substantial mapping of the international study and practice of social policy to date and will stand as a vital storehouse of knowledge for many years to come

Achieving Education for All through Public-Private Partnerships? Pauline Rose, 2013-09-13 Concern for achieving Millennium Development Goals MDGs by 2015 has led to a focus on the role that non state providers NSPs can offer in extending access and improving quality of basic services While NSPs can help to fill a gap in provision to those excluded from state provision recent growth in both for profit and not for profit providers in developing countries has sometimes resulted in fragmentation of service delivery To address this attention is increasingly given in the education sector to developing partnerships between governments and NSPs Partnerships are further driven by the expectation that the state has the moral social and legal responsibility for overall education service delivery and so should play a role in facilitating and regulating NSPs Even where the ultimate aim of both non state providers and the state is to provide education of acceptable quality to all children this book provides evidence from diverse contexts across Africa South Asia and Latin America to highlight the challenges in them partnering to achieve this This book was published as a special issue of Development in Practice
