Social Indicator Models:

Social Indicator Models Kenneth C. Land, Seymour Spilerman, 1975-02-14 Deals in comprehensive fashion with a diverse array of objective and subjective social indicators and shows how these indicators can be used potentially to inform and perhaps guide social policy Written with clarity and authority it will be of paramount interest to those concerned with the interpretation and analysis of social indicators and to those interested in their use For the former it serves as an illuminating introduction to some of the analytical tasks that lie ahead in the study of social indicators For the latter it provides a solid foundation upon which future policy analysis may be based *Social indicator Models*, 1972 *Social Indicators Project* Share, 1978 **Theories, Models, and Indicators of Social Change** Kenneth C. Land, 1974 *Social Indicators Project* Share, 1978 *Social Measurement and Social Indicators* Michael Carley, 2025-06-30 For the early pioneers of the social indicator movement the possibilities of doing social good by developing the tools of social measurement seemed endless However in the early 1980s these high and perhaps naive hopes remained unfulfilled especially for the data needs of the policy maker If not pessimistic administrators and public policy makers were at least guarded about the usefulness of social indicators as an aid to increasingly complex decision making These difficulties reflected both policy related and methodological issues Originally published in 1981 *Social Measurement and Social Indicators* is not a how to guide on the construction of social indicators but rather a critical and optimistic view of these central issues as embodied in the literature and in practice at the time Michael Carley contrasts some of the basic problems of social measurement with government's needs for reliable information organised by their policy usefulness and statistical sophistication The book then discusses the critical relationship between social indicators and social theories and models as well as the role of social information in the policy process Later chapters look at the audience the problems and the prospects for national social reports and explore in detail three different applications of social indicators to urban analysis Throughout the book helpful examples are drawn from North American UK and European experience *Social Measurement and Social Indicators* is aimed at a cross disciplinary audience in government and the universities For students it will serve as a compact introduction to the broad field of social indicators for administrators it explores philosophical and measurement problems and suggests criteria for interpretation for researchers it places social indicator efforts into a wider policy analysis perspective with its inescapable political value judgemental and bureaucratic aspects **Social Indicator Models for Urban Policy** Harvey A. Garn, 1973 *Causal Models in the Social Sciences* H.M. Blalock Jr., 2017-07-28 Causal models are formal theories stating the relationships between precisely defined variables and have become an indispensable tool of the social scientist This collection of articles is a course book on the causal modeling approach to theory construction and data analysis H M Blalock Jr summarizes the then current developments in causal model utilization in sociology political science economics and other disciplines This book provides a comprehensive multidisciplinary picture of the work on causal models It seeks to address the problem of

measurement in the social sciences and to link theory and research through the development of causal models Organized into five sections Simple Recursive Models Path Analysis Simultaneous Equations Techniques The Causal Approach to Measurement Error and Other Complications this volume contains twenty seven articles eight of which were specially commissioned Each section begins with an introduction explaining the concepts to be covered in the section and links them to the larger subject It provides a general overview of the theory and application of causal modeling Blalock argues for the development of theoretical models that can be operationalized and provide verifiable predictions Many of the discussions of this subject that occur in other literature are too technical for most social scientists and other scholars who lack a strong background in mathematics This book attempts to integrate a few of the less technical papers written by econometricians such as Koopmans Wold Strotz and Fisher with discussions of causal approaches in the social and biological sciences This classic text by Blalock is a valuable source of material for those interested in the issue of measurement in the social sciences and the construction of mathematical models **Social Indicators** ,1980 Introductory material and statistical tables on 11 topics e g public safety social participation and use of leisure time Appendixes include sources used and glossary Index

Journal of Human Services Abstracts ,1977 *Social Accounting Systems* F. Thomas Juster,Kenneth C Land,2013-09-03 Social Accounting Systems Essays on the State of the Art contains essays prepared during a workshop aimed at the development and promulgation of objectives for future work on social accounting and the making of recommendations to achieve them by evaluating existing demographic and time based accounting models The essays describe and evaluate the state of the art of extant empirically based approaches to social accounting The book opens with an overview chapter that describes the organizations of the Workshop on Social Accounting Systems at which the essays were presented and discussed the nature of the tasks assigned to authors and the major themes of workshop discussions This is followed by separate chapters on time based social accounting systems and demographic accounting how subjective social indicators can be related to social accounting systems and general evaluations of the systems described in the previous chapters This book will be primarily of interest to social scientists and statisticians concerned with the development and integration of national data systems and with social indicator analyses They also will be germane to the interests of students of contemporary social change and the quality of life *Handbook of Social Indicators and Quality of Life Research* Kenneth C. Land,Alex C. Michalos,M. Joseph Sirgy,2011-11-25 The aim of the Handbook of Social Indicators and Quality of Life Research is to create an overview of the field of Quality of Life QOL studies in the early years of the 21st century that can be updated and improved upon as the field evolves and the century unfolds Social indicators are statistical time series used to monitor the social system helping to identify changes and to guide intervention to alter the course of social change Examples include unemployment rates crime rates estimates of life expectancy health status indices school enrollment rates average achievement scores election voting rates and measures of subjective well being such as satisfaction with life as a whole and

with specific domains or aspects of life This book provides a review of the historical development of the field including the history of QOL in medicine and mental health as well as the research related to quality of work life QWL programs It discusses several of QOL main concepts happiness positive psychology and subjective wellbeing Relations between spirituality and religiousness and QOL are examined as are the effects of educational attainment on QOL and marketing and the associations with economic growth The book goes on to investigate methodological approaches and issues that should be considered in measuring and analysing quality of life from a quantitative perspective The final chapters are dedicated to research on elements of QOL in a broad range of countries and populations
