Political Protest in Contemporary Africa Lisa Mueller,2018-06-28 From spray painted slogans in Senegal to student uprisings in South Africa twenty first century Africa has seen an explosion of protests and social movements But why Protests flourish amidst an emerging middle class whose members desire political influence and possess the money education and political autonomy to effectively launch movements for democratic renewal In contrast with pro democracy protest leaders rank and file protesters live at a subsistence level and are motivated by material concerns over any grievance against a ruling regime Through extensive field research Lisa Mueller shows that middle class political grievances help explain the timing of protests while lower class material grievances explain the participation By adapting a class based analysis to African cases where class is often assumed to be irrelevant Lisa Mueller

New Critical Writings in Political Sociology Alan Scott, 2024-11-01 The articles collected together in this volume are concerned with why and how people get involved in politics whether through formal mechanisms such as voting through some of the more informal means and settings of social movement networks and political protest or through engagement in public debate But just as important is the question of why people do not get involved in politics What social conditions ideas and values facilitate or discourage political activity How is it that some people are systematically disempowered in democratic societies in comparison with others What social forms offer the most promise for extending and deepening democracy This volume brings together the most seminal papers which together form a record of how political sociologists since the 1970s have framed questions about the range and limits of democratic political engagement and developed concepts and methodologies in order to research the answers to those questions

The Shape of Social Inequality David Bills, 2005-08-24 This volume brings together former students colleagues and others influenced by the sociological scholarship of Archibald O Haller to celebrate Haller s many contributions to theory and research on social stratification and mobility All of the chapters respond to Haller s programmatic agenda for stratification research A full program aimed at understanding stratification requires first that we know what stratification structures consist of and how they may vary second that we identify the individual and collective consequences of the different states and rates of change of such structures and third seeing that some degree of stratification seems to be present everywhere that we identify the factors that make stratification structures change The contributors to this Festschrift address such topics as the changing nature of stratification regimes the enduring significance of class analysis the stratifying dimensions of race ethnicity and gender and the interplay between educational systems and labor market outcomes Many of the chapters adopt an explicitly cross societal comparative perspective on processes and consequences of social stratification The volume offers both conceptually and empirically important new analyses of the shape of social stratification
