Wagenaar,2000-10-31 Research on government institutions is one of the most exciting intellectual areas in political science and policy studies today Increasingly it is recognized by scholars in these fields that effective and legitimate policies depend on the design and maintenance of complex institutional arrangements This book brings together some of the leading scholars in institutional research in The Netherlands Their work addresses such perennially difficult questions in institutional research such as How do we understand institutional change How do we measure the effects of institutions on societal sectors and public policy How do the normative foundations of government institutions influence their functioning What are the principles of effective and legitimate institutional design Through analysis of well researched examples ranging from the fabled Dutch poldermodel through the transformation of the welfare state through privatizations of the Dutch telecommunications industry to the work of welfare officials these authors demonstrate the interpenetration of normative empirical and design issues in institutional theory The book is intended for scholars and graduate students in political science public policy public administration and law *Public Health in a Retrenchment Era* Helen J. Voluntary

Agencies in the Welfare State Ralph M. Kramer, 2023-04-28 The rise of the welfare state threatens the autonomy and survival of nonprofit voluntary agencies as providers of social services Or does it In this cross national empirical study of the workings of voluntary agencies Ralph M Kramer cuts through the conceptual confusion surrounding voluntarism and the boundaries between the public and private sectors He draws on a survey of voluntary agencies helping disabled people in four welfare democracies the United States England Israel and the Netherlands to explain the virtues and flaws of different patterns of government voluntary relationships in coping with the growing demand for human services Kramer concludes that many of the most cherished beliefs about the voluntary sector have little basis in fact The most innovative agencies for example are not the smallest but rather among the largest most bureaucratized and most professionalized Government funding does not necessarily constrain agency autonomy And giving voluntary agencies the primary responsibility for social services can reduce not increase citizen participation This comparative analysis of the distinctive competence vulnerability and potential of the voluntary agency should replace some of the myths that guide public policy and the day to day activities of social service agencies This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1981
