making It is based on intensive interviews and on measures of the information processing ability of seventy one full time judges in Ontario The work covers such topics as problems of sentencing particularly existing disparities social and economic background of judges and their varying penal philosophies the nature and measurement of judicial attitudes toward crime punishment and related issues prediction of sentencing behaviour based on attitude scales which the author has constructed and also on fact patterns perceived by judges and the impact of social and legal constraints on the sentencing process The study concludes that there exists a very high correlation between a judges definition of situation and the sentence which he imposes and that while sentences meted out for a particular law violation under similar circumstances may differ among judges judges are highly consistent within themselves Using these conclusions the author constructs a model of judicial behaviour and shows how this model can be used to predict and to explain sentencing and breaks new ground in the use of the social and behavioural sciences as sources of data to explain the sentencing process Freedom and Reactance Robert A. Wicklund,2024-10-01 Brehm s theory of psychological reactance in 1966 marked the beginning of a psychological investigation into the consequences of losing freedom The concept freedom had been touched upon intermittently by disciplines such as political science and philosophy and even on occasion by psychology but Brehm s treatment had been the first analysis of freedom to spark experimental investigations into the variety of reactions to infringements on freedom Originally published in 1974 Freedom and Reactance was written to capture the many directions taken by the theory since 1966 and to integrate reactance theory with theoretical ideas that applied to some of the same phenomena Today it can be read and enjoyed in its historical context Social Psychology Sharon S. Brehm,Saul M. Kassir,Steven Fein,2005 The most up to date account of social psychology this text introduces key concepts through balanced coverage of classic studies contemporary research and current social issues The authors bring vivid examples to reflect social psychology concepts in real life The use of current events social issues and evocative photographs makes the text more compelling to students by helping them relate concepts to their own lives and to see the world through the eyes of a social psychologist Increased coverage of cross cultural research and sociocultural perspectives includes studies of sexual orientation ostracism Milgram in the 21st century and social relations over the Internet These viewpoints are examined through topics such as the social self personal and group perception of attitudes conformity and obedience interpersonal behavior and group influences The authors relate current references throughout the text such as 9 11 and its aftermath the Supreme Court s 2003 ruling on affirmative action and the celebrity trials of Martha Stewart and Kobe Bryant directly to social psychology Icons in the text reference video footage available on the new Houghton Mifflin Social Psych in Film DVD VHS for instructors and video stills on the student CD ROM Expanded coverage of the use of social neuroscience techniques includes brain imaging techniques to explore social psychology questions **Toward Transformation in Social Knowledge** K. J. Gergen,2012-12-06 This century has been characterized by a strong and pervasive belief in certainty through science It is a belief that has been

nurtured by philosophers scientists and governing bodies alike And where vocal reassurance has failed to convince modern technology has more than compensated It has in effect been a century in at last to be making significant headway toward objective which humankind seemed and enduring truth Yet as the century winds toward its conclusion this optimistic belief has begun to confront a challenging array of attacks Widespread signals of concern are increasingly evident and in the philosophy of science little but remnants remain of the bold rationale that once promised truth through method One now senses a profound alteration taking place in both the concept of knowledge and of science an alteration that may prove to be as significant as the Copernican revolution the emergence of Darwinism or the development of Freudian theory As a result of the latter transformations humans are no longer seen as the center of the universe as essentially different from animals or as fully conscious of the wellsprings of their activity In the present case however we confront the loss of the human capacity for objective knowledge

Psychological Theories from a Structuralist Point of View Hans Westmeyer, 2012-12-06

Metatheoretical and more generally methodological analyses of psychological problems and theories have a long tradition however their impact on scientific practice especially on the clarification and testing of existing psychological theories and the formulation of new ones has so far been less than spectacular The increased interest in theoretical psychology visible during the past ten or twenty years is associated with the hope that a change of this situation will gradually be effected Thus in their preface to the proceedings of the founding conference of The International Society for Theoretical Psychology Baker et al 1987 pp Vf 1 take up 2 once more the objectives of a theoretical psychology formulated by Koch already in 1951 a Education in the methodology and logic of science b Analysis of methodological or foundational problems that are more or less unique to psychology c Internal systematization of suggestive but formally defective theoretical formulations d Intertranslation and differential analysis of conflicting theoretical formulations e Construction of new theory Reflecting on possible reasons for the relative inefficacy so far of methodological and metatheoretical analyses in psychology it seems to me that the following two have been of prime importance 1 Many of the existing analyses are at best tenuously connected to concrete existing psychological theories i e they deal with their subject matter in a too abstract detached way This detracts from the persuasive power which their results might otherwise have and impedes the realization of these results within scientific practice

Motivation and Action Heinz Heckhausen, 2012-12-06

The translation of this volume has been a long and sometime arduous journey giving nearly literal meaning to the Latin term *translatum* meaning to carry across In fact it required many journeys both geographically between Canada and Germany and figuratively between German and English language thought and culture between the mind of a German professor and that of his American colleague Whether or not it was all worthwhile must be left to the reader's judgment but let me outline the rationale for embarking on this venture When the first German edition of this book appeared in 1980 it was acclaimed not only by German scholars but by those outside the German speaking community as well In fact it received extremely favorable reviews even in English language journals which

is unusual for a foreign text It was recognized that this was far more than just another text book on motivation For one thing it exposed and examined the multi faceted roots that have contributed to contemporary theory and research in motivation The author skillfully examined the motivational concepts theories and research that have emanated from many areas of psychology such as learning theory social psychol ogy personality psychoanalysis and clinical psychology **New Directions in Helping** Jeffery Fisher,1983-01-28 New Directions in Helping Recipient Reactions to Aid Volume 1 reviews the state of knowledge in the reactions of recipients in helping interactions It provides an overview of the entire field in depth coverage in major areas and a preview of important future research directions The book is organized into five parts Part I discusses the types of recipient reactions some consistent relationships between the conditions associated recipient reactions and approaches that have been used to conceptualize the effects of aid on those who receive it Part II focuses on theoretical perspectives for conceptualizing reactions to help Part III examines individual differences in responses to aid Part IV takes up various determinants of reactions to help Part V presents some final thoughts about research on reactions to help This book will be of interest to social psychologists as well as to members of a number of other disciplines e g clinical psychologists social workers counseling psychologists educational psychologists political scientists and sociologists *The Social Influence Processes* James T. Tedeschi,2017-07-12 Social psychologists have always been concerned with two person interactions and the factors enabling one person to gain dominance Although social psychology has devised a revolutionary set of techniques to investigate the phenomenon of power hypotheses are too often ambiguously stated research programs end in cul de sacs and experiments take on the character of one shot studies In an attempt to stimulate new directions in research and to provide cumulative emphasis on the development of scientific theory in the area of power relations Tedeschi has assembled original and path breaking essays from a dozen outstanding scholars and researchers in the behavioral sciences More tightly integrated than leading books in the field of power relations *The Social Influence Processes* focuses on two person interactions A full explanation of the terms power and influence is followed by an analysis of the major variables in connections between two persons that must be taken into account in a scientific theory of social influence The subsequent chapters respond to the categories established attempting a comprehensive construction of social reality and offering suggestions and techniques for measuring and ordering its complexity Particular areas of research and theory are isolated for consideration in depth such topics as personality as a power construct *Power and Personality* by Henry L Minton influence in exchange theory *The Tactical Use of Social Power* by Andrew Michener and Robert W Suchner and leadership through charisma *Interpersonal Attraction and Social Influence* by Elaine Walster and Darcy Abrahams In the final chapter Tedeschi Thomas Bonoma and Barry R Schlenker attempt to provide a general theory of social influence processes as they affect the target individual by reviewing the research literature in their own theoretical terms This remarkable volume will be of interest to students as well *Brehm, Social Psychology, 6th Edition Plus Pauk, Chapters T/a Bernstein*
