Wouter van Ginneken

Social Security In Developing Countries:

The Role of Social Security in Developing Countries Robert Julius Myers, United States. Social Security Administration, 1963 Extending Social Security Wouter van Ginneken, 2005 This paper reviews the main trends and policy issues with regard to the extension of social security in developing countries It begins by defining the concept of social security and it examines its linkages with the development process and its impact on poverty reduction It then reviews the four main social security programmes i.e health insurance pensions unemployment protection and tax based social benefits It shows that in many middle income countries statutory social insurance can form the basis for the extension process However this is generally not so in the low income countries where only a small minority of the population is covered by social security In particular for these countries the paper pleads for experimentation with area based schemes It also recognizes the need for additional international financing of some basic social security schemes if coverage is to be extended to everyone over the next 15 to 25 years The paper also examines the gender dimension of the extension process The paper concludes with outlining some key elements of national and international strategies Social security should be recognized as a major instrument to deal with some of the negative social consequences of globalization National policies should consist of improving and reforming statutory social insurance programmes of promoting community and area based social insurance schemes and of enhancing cost effective tax financed social benefits At the international level there is a need for a few simple indicators on social security coverage for advocacy measures to get social security at the top of the development agenda for experimentation with new mechanisms to reach workers in the informal economy as well as for knowledge development and technical assistance Many of these elements will be included in the Global campaign on social security and coverage for all that the ILO is to launch at the beginning of 2003 *Social Protection in Developing Countries* Katja Bender, Markus Kaltenborn, Christian Pfleiderer, 2013-09-02 Providing universal access to social protection and health systems for all members of society including the poor and vulnerable is increasingly considered crucial to international development debates This is the first book to explore from an interdisciplinary and global perspective the reforms of social protection systems introduced in recent years by many governments of low and middle income countries Although a growing body of literature has been concerned with the design and impact of social protection less attention has been directed towards analyzing and explaining these reform processes themselves Through case studies of African Asian and Latin American countries this book examines the global phenomenon of recent social protection reforms in low and middle income areas and how it differs across countries both in terms of scope and speed of institutional change Exploring the major domestic and international factors affecting the political feasibility of social protection reform the book outlines the successes and failures of recent reform initiatives This invaluable book combines contributions from both academics and practitioner experts to give students researchers and practitioners in the fields of social security economics law and political science an in depth understanding of

governments and organizations can come together to create practical workable policies to bring social security protection to all Through a series of detailed case studies compiled by an international array of policy experts this book looks closely at the workings of self financed schemes for informal workers that emerged in the 1990s and highlights the schemes that have been most beneficial It focuses on how NGOs cooperatives and other social organizations have been able to develop institutions and policies more in line with the requirements and contributory capacity of the informal sector The authors evaluate various approaches to the extension of formal sector social insurance to informal sector workers including the self employed In addition they explore how social assistance programs although often requiring sophisticated administration can help ensure that benefits reach the population most in need such as children the disabled and the elderly
