The International Social Survey Programme 1984-2009 Max Haller, Roger Jowell, Tom W Smith, 2009-09-11 The social sciences rely more on the comparative method than on experimental data mainly because the latter is difficult to acquire amongst human populations The International Social Survey Programme has played a pioneering role in creating and sustaining methodologically sophisticated mass attitude surveys across the globe Starting in 1984 with five nations it now encompasses forty five nations spread over five continents each administering an identical annual survey to a random sample of their population Analyses of the data or descriptions of the methodology already appear in over 3 000 publications This book contains new contributions from three dozen eminent scholars who analyse and compare the perceptions and attitudes of citizens across all five continents nations and over time Subjects range from inequality and the role of the state ethnic national and global identities the changing relevance of religion beliefs and practices gender roles family values and work orientations household and society Some chapters focus on methodological issues others focus on substantive findings This book sets new standards for cross cultural research

Straits, 2016 *The Process of Social Research* successfully meets two major challenges of teaching social science methods to make the material interesting and accessible to students and to provide them with the tools necessary to understand evaluate and conduct research Authors Jeffrey C Dixon Royce A Singleton Jr and Bruce C Straits employ a conversational writing style that is engaging and student friendly

Using everyday examples to introduce chapters and clarify complex concepts they provide current research examples on such cutting edge topics as immigration family composition prosecutorial misconduct organized racism homelessness social inequality and education and alcohol consumption and grades Placing a unique emphasis on the research process the book helps students understand the logic and mechanics of social research giving them the tools and the power to evaluate the research of others and to conduct their own research Beginning with the introduction every chapter contains flowcharts of research processes As each diagram is presented the authors relate the specific method to the overall research process Then over the course of the chapter or section they flesh out each step This way they convey information about the nuts and bolts of research while ensuring that students do not lose sight of the logic of inquiry Comprehensive and up to date without attempting to be encyclopedic in its coverage The Process of Social Research provides a balance between qualitative and quantitative research taking a more integrated approach to describing the relationship between theory and research
