## **Social Trust Toward A Cosmopolitan Society:**

**Social Trust** Timothy Earle, George Cvetkovich, 1995-07-24 This work examines the basic social psychological problems that generate the need for social trust and other acculturation strategies Social trust is examined within the context of competing social problem solving tools The authors analyze the problem of how social trust can be encouraged within a cultural context that favors other socialization strategies particularly distrust They look at the relation between social trust and risk communication specifically how social trust might be used to transform public participation from an ineffective formalist show into a creative community building problem solving process The work distinguishes between two forms of social trust pertinent to our world today pluralistic which occurs within groups and is based on existing values and cosmopolitan which is an across group phenomenon and is based on emerging values Earle and Cvetkovich's study is the story of gradual movement from pluralistic to cosmopolitan social trust

**Social Trust and the Management of Risk** George Cvetkovich, 2013-12-16 Social trust is a crucial issue to many aspects of modern society Policy makers continually aspire to winning it and corporations frequently run the risk of losing it The trust deficit raises vital questions and problems to which until recently there have been few answers or solutions Experts from both sides of the Atlantic explore the importance for trust of various influences from individual perceptions to organizational systems and consider the conditions involved in building or undermining trust Several authors examine practical hazard management issues including medical vaccination programmes and popular participation in pollution control and waste management as strategies for enhancing social trust This book provides insightful analysis for researchers and students of environmental and social sciences and is essential reading for those engaged in risk management in both the public and private sectors

**Trust in Contemporary Society**, 2019-07-22 Trust in Contemporary Society by well known trust researchers deals with conceptual theoretical and social interaction analyses historical data on societies national surveys or cross national comparative studies and methodological issues related to trust The authors are from a variety of disciplines psychology sociology political science organizational studies history and philosophy and from Britain the United States the Czech Republic the Netherlands Australia Germany and Japan They bring their vast knowledge from different historical and cultural backgrounds to illuminate contemporary issues of trust and distrust The socio cultural perspective of trust is important and increasingly acknowledged as central to trust research Accordingly future directions for comparative trust research are also discussed Contributors include Jack Barbalet John Brehm Geoffrey Hosking Robert Marsh Barbara A Misztal Guido M llering Bart Nooteboom Ken J Rotenberg Ji afr Masamichi Sasaki Meg Savel Mark ta Sedl kov J rg Sydow Piotr Sztompka

**Risk Management in Post-Trust Societies** Ragnar E. Lofstedt, 2012-05-04 A thought provoking and invaluable book for anyone who cares about risk communication and management in the 21st century Anna Jung Director General European Food Information Council Professor Ragnar Lofstedt has once again produced a most interesting book on risk management and trust well based on theory and built on empirical findings Mikael Karlsson President Swedish Society for Nature Conservation Highlights the difficult balancing task facing risk regulators Regulatory inaction against real risks can undermine public trust However exaggerated responses to risks can also jeopardize regulators credibility The diverse international case studies developed by Ragnar Lofstedt provide guidance for how regulators can navigate these and other frequently competing concerns W Kip Viscusi Cogan Professor of Law and Economics Harvard University USA In democracies government policies cannot succeed without public acceptance Yet complex risk management requires technical expertise How to reconcile these competing needs Ragnar Lofstedt provocatively challenges recent research claiming that risk managers must engender public trust via deliberative dialogue He uses four cases studies to argue that the reasons for distrust vary and demand different responses that in some cases trust can flow from technical competence without public deliberation and that in others public deliberation can actually aggravate distrust Trust me Lofstedts book will add spice to the debate over risk experts the public and trust Jonathan B Wiener Perkins Professor of Law and Environmental Policy Duke University USA We live in post trust societies in which public confidence in governments and corporations over health food and environmental risk is eroding rapidly Good risk communication can help companies governments and institutions minimize disputes resolve issues and anticipate problems Without such communication the best policies can become derailed and trust can be lost Most policy makers still use outdated methods to communicate policies and achieve their objectives methods developed before public trust in industry and government was affected by health scares such as BSE genetically modified organisms and dioxins in Belgian chicken This book provides effective methods for managing and communicating risk effectively in contemporary societies

**Transdisciplinary Sustainability Studies** Katri Huutoniemi, Petri Tapio, 2014-06-05 Arising out of human environment interaction sustainability problems resist disciplinary categories and simple solutions This book offers a fresh approach to practical and methodological concerns in transdisciplinary environmental and sustainability studies It illustrates methodological means by which researchers professionals and decision makers can address complex environmental issues While scientific reasoning is mostly guided by disciplinary traditions transdisciplinary research rests on other cognitive strategies As it does not have a ready made stance toward problems figuring out what the puzzle is and what the answer might look like are crucial aspects of transdisciplinary inquiry Through examples from environment and sustainability studies

the volume discusses heuristic schemes that can give structure to this exploration By focusing on heuristics rather than on methods concepts or general guidelines the book argues that a problem centered approach often resists the rigor of methodology Learning from experience provides valuable rules of thumb checklists and other cognitive schemes for making ill defined problems more tangible Written by an international team of authors the chapters draw examples from dealing with issues in environmental protection transport and climate policy ecosystem services and disservices environmental beliefs and attitudes and more Together with more theoretically oriented chapters they show that the intellectual processes needed to tackle complex sustainability problems are as much about heuristic problem solving as they are about methodical work

*Trust in Risk Management* Timothy C. Earle, 2010-09-23 Trust is an important factor in risk management affecting judgements of risk and benefit technology acceptance and other forms of cooperation In this book the world's leading risk researchers explore all aspects of trust as it relates to risk management and communication The authors draw on a wide variety of disciplinary approaches and empirical case studies on topics such as mobile phone technology well known food accidents and crises wetland management smallpox vaccination cooperative risk management of US forests and the disposal of the Brent Spar oil drilling platform The book integrates diverse research traditions and provides new insights into the phenomenon of trust including the factors that lead to the establishment and erosion of trust Insightful analyses are provided for researchers and students of environmental and social science and professionals engaged in risk management and communication in both public and private sectors

**Sense of Place and Sense of Planet** Ursula K. Heise, 2008-09-29 Sense of Place and Sense of Planet analyzes the relationship between the imagination of the global and the ethical commitment to the local in environmentalist thought and writing from the 1960s to the present Part One critically examines the emphasis on local identities and communities in North American environmentalism by establishing conceptual connections between environmentalism and ecocriticism on one hand and theories of globalization transnationalism and cosmopolitanism on the other It proposes the concept of eco cosmopolitanism as a shorthand for envisioning these connections and the cultural and aesthetic forms into which they translate Part Two focuses on conceptualizations of environmental danger and connects environmentalist and ecocritical thought with the interdisciplinary field of risk theory in the social sciences arguing that environmental justice theory and ecocriticism stand to benefit from closer consideration of the theories of cosmopolitanism that have arisen in this field from the analysis of transnational communities at risk Both parts of the book combine in depth theoretical discussion with detailed analyses of novels poems films computer software and installation artworks from the US and abroad that translate new connections between global national and local forms of

awareness into innovative aesthetic forms combining allegory epic and views of the planet as a whole with modernist and postmodernist strategies of fragmentation montage collage and zooming

**An Investigation of Women's and Men's Perceptions and Meanings Associated with Food Risks** Andrea Bieberstein, 2013-08-18 Concern about food risks is widespread Consumers however are found to differ in terms of how they evaluate these risks One of the most prominent findings in this regard is the differences between women and men Many studies report that men are less worried about environmental and technological risks than women which is also the case for food risks At the same time it is criticized that these differences are often exaggerated similarities overlooked and systematic investigations are lacking Andrea Bieberstein gives a comprehensive overview of theoretical approaches to risk perception and empirical work that has been conducted in the field of risk perception research Furthermore she provides a systematic investigation of how food risks are constructed for women and men by uncovering the meanings in terms of associations feelings and values that they attach to various food risks This allows a deeper understanding of the gender differences in risk perception in terms of their relevance and meaning

*The Psychology of Risk* Glynis M. Breakwell, 2014-09-15 Since the first edition of *The Psychology of Risk* there have been enormous macro economic and socio political changes globally the chaos in the world banking system and the financial crisis and recessions that it presaged the Arab Spring and the revolutionary shifts in power in the Middle East with rippled consequences around the world the development of ever more sophisticated cyber terrorism that can strike the private individual or the nation state with equal ease Amidst these changes in the face of hazard do the psychological models built to explain human reactions to risk still apply Has the research over the last few years resulted in an improvement in our understanding of how people perceive and act in relation to risk In this second edition Professor

Dame Breakwell uses illustrations and current examples to address these questions and provide a totally up to the minute review of what is known about the psychology of risk

**Geological Disposal of Carbon Dioxide and Radioactive Waste: A Comparative Assessment** Ferenc L. Toth, 2011-02-21 Fossil fuels will remain the backbone of the global energy economy for the foreseeable future The contribution of nuclear energy to the global energy supply is also expected to increase With the pressing need to mitigate climate change and reduce greenhouse gas emissions the fossil energy industry is exploring the possibility of carbon dioxide disposal in geological media Geological disposal has been studied for decades by the nuclear industry with a view to ensuring the safe containment of its wastes Geological disposal of carbon dioxide and that of radioactive waste gives rise to many common concerns in domains ranging from geology to public acceptance In this respect comparative assessments reveal many similarities ranging from the transformation of the geological environment and safety and monitoring concerns to regulatory liability and public acceptance issues However there are profound differences on a broad range of issues as well such as the quantities and hazardous features of the materials to be disposed of the characteristics of the targeted geological media the site engineering technologies involved and the timescales required for safe containment at the disposal location There are ample opportunities to learn from comparisons and to derive insights that will assist policymakers responsible for national energy strategies and international climate policies

**Medical Self-Regulation** Mark Davies, 2016-12-05 Self regulation constitutes an important aspect of the regulatory and oversight process governing professionals This book focuses directly on medical self regulation in the context of both the wider regulatory framework and that of other regulatory models Through a critical consideration of recent events including high profile and controversial cases it is demonstrated that the self regulatory process has failed and that only fundamental restructuring and a radical change in attitudes on the part of members of the profession can repair the damage Attention is also given to the recent changes current proposals for change and to alternative regulatory models Medical Self Regulation will be of international interest appealing to policy makers as well as students and practitioners in the fields of medicine medical law and sociology and professional regulation

Californians' Opinions on the Management of Wildland and Wilderness Fires Patricia Lea Winter, 2002

*The Risk City* Yosef Jabareen, 2015-04-23 Contemporary cities face phenomenal risks and they face particularly high levels of mounting social and environmental risks including social polarization urban conflicts riots terror and climate change threats This book suggests that climate change and its resulting uncertainties challenge the concepts procedures and scope of conventional approaches to planning creating a need to rethink and revise current planning methods Therefore this book suggests a paradigm shift in our thinking interrogation and planning of our cities Based on the contemporary conditions of risk at cities this book conceptualizes the risk city as a construct of three interlinked concepts of risk trust and practice It is a construct of risk and its new evolving conditions and knowledge of uncertainties stem from climate change and other risks and uncertainties As a construct of practices the risk

city produces social and political institutional framework and promotes practices accordingly in order to reduce risk and risk possibilities and to increase trust In light of the complex challenges and risks to the human habitat that have emerged in recent years many cities have prepared various types of plans aimed at addressing the challenges posed by climate change Nonetheless despite the importance of these plans and the major public resources invested in their formulation we still know little about them and have yet to begin studying them and assessing their contributions From the innovative perspective of the risk city this book asks critical questions about the nature vision practices and potential impact of the recent climate change oriented plans What kinds of risks do they attempt to address what types of practices do they institute and what types of approaches do they apply Do they adequately address the risks and uncertainties posed How do they contribute to the worldwide effort to reduce greenhouse gas emissions This book uses the methodologically innovative Risk City framework to examine the nature vision outcomes practices and impact of these crucial plans as well as their contribution to the resilience of our cities and to global efforts toward reducing greenhouse gas emissions
