Innovation in Social Welfare and Human Services Rolf Rønning,Marcus Knutagard,2015-02-11 Innovation is an oft heard

buzzword in both public and private sectors concerned with the organisation and delivery of services to vulnerable individuals This thoughtful volume explores what innovation might actually involve in the context of contemporary human services Highlighting both the importance and utility of innovation but also promoting a more reflective approach the book distinguishes between innovation and improvement and discusses the relevant differences between private sector public sector and non profit organisations It looks at how innovation is often as much a result of the power relations between the involved actors and the structural context as a result of popularly identified drivers and barriers Including numerous case studies the book illustrates and explains innovations in welfare services at different levels looking at the macro level innovations in social policy the meso level innovation at organisational level and the micro level user driven innovations Arguing the innovation is nothing new in human services the authors emphasise the importance of innovation being developed and supported by those working within those organisations New and creative solutions to problems encountered in everyday work by front line workers can be taken up to improve services provided and make a difference for the users rather than change being externally imposed upon them by those without insider knowledge Innovation in Social Welfare and Human Services is an important read for researchers and practitioners interested in the administration leadership and organisation of social services

The Welfare State in Post-Industrial Society Jason L. Powell, Jon Hendricks, 2009-06-10 In recent years major social forces such as ageing populations social trends migration patterns and the globalization of economies have reshaped social welfare policies and practices across the globe Multinational corporations NGOs and other international organizations have begun to influence social policy at a national and local level Among the many ramifications of these changes is that globalizing influences may hinder the ability of individual nation states to effect policies that are beneficial to them on a local level With contributions from thirteen countries worldwide this collected work represents the first major comparative analysis on the effect of globalization on the international welfare state The Welfare State in Post Industrial Society is divided into two major sections the first draws from a number of leading social welfare researchers from diverse countries who point to the nation state as case studies

highlighting how it goes about establishing and revising social welfare provisions The second portion of the volume then moves to a more global perspective in its analysis and questioning of the impact of globalization on citizenship ageing and marketization The Welfare State in Post Industrial Society seeks to encourage debate about the implications of the most pressing social welfare issues in nation states and integrate analyses of policy and practice in particular countries struggling to provide social welfare support for their needy populations
