Seeking to unite policy and practice, this guidebook addresses key issues, trends, and innovations in social work, including services that enhance community health, the transformation of health care in the U.S. into a market commodity, a broader approach to health and health care to correct gender biases, lifestyle changes, and health promotion helping clients overcome patterns of denial, fear, and anger; individual casework vs. group/community practice; patterns of social work service provision in a rehabilitation hospital environment; the effects of heterosexism on health and mental health services to lesbian and gay clients. *International Perspectives on Social Work in Health Care* acts as a forum for contributing authors and readers to exchange and gain information and learn from each other's experiences and expertise.
