M. Hodapp, Jacob A. Burack, Edward Zigler, 1995-01-27 Issues in the Developmental Approach to Mental Retardation is one of the first books exclusively devoted to applying the theories findings and approaches used in work with nonretarded children to several types of retarded individuals The editors and contributors define the developmental approach and explore theoretical issues as they relate to retarded populations Problems involving similar sequences of development cross domain relations the environment and motivation are all discussed as is the importance of separating the various etiological groups for research and intervention purposes The contributors also examine the nature of development in specific etiological groups types of retardation that are addressed include cultural familial retardation Down syndrome fragile X syndrome autism and children with sensory and motor handicaps This significant volume demonstrates how data from nonretarded development can inform work with retarded populations and how findings from children with mental retardation enrich developmental theory **Mental Retardation and Modern Society** Michael P. Aspects of Mental Retardation H. Carl Haywood, 1970 **Native American Communities on Health and Disability L.**

Lovern, C. Locust, 2013-03-27 This volume examines concepts of disability and wellness in Native American communities prominently featuring the life's work of Dr Carol Locust Authors Locust and Lovern confront the difficulties of translating not

only words but also entire concepts between Western and Indigenous cultures and by increasing the cultural competency of those unfamiliar with Native American ways of being are able to bring readers from both cultures into a more equal dialogue. The three sections contained herein focus on intercultural translation dialogues with Native American community members and finally a discussion of being in the world gently as caregivers.

Psychobiological Aspects of Cognitive Growth Reuven Kohen-Raz, 2013-10-22 *Psychobiological Aspects of Cognitive Growth* elucidates the psychobiological aspects of cognitive development. The goals of this book are limited to a description of what may be defined as borderline phenomena of cognitive development. These are phenomena that can be observed and measured behaviorally and also can be conveniently investigated by neurophysiological, genetic, and biological methods. The book begins with a review of basic approaches to the problems of psychobiological interaction in cognitive processes. It then presents major theoretical contributions of prominent authors to this subject, namely Werner's sensorimotor theory, Rothschild's model of the biosemiotic structure of the nervous system, and Piaget's psychobiological interpretations of intellectual growth. This is followed by a general discussion of psychobiological aspects of cognitive development in infancy and a report on physical correlates of school readiness, including some investigations on relations between static balance ability and reading skill. After a presentation of findings and theoretical considerations related to effects of birth season on physical and mental growth, the final chapter summarizes three studies on the impact of physiological/pubertal maturation on mental achievements at adolescence.

Sociobehavioral Studies in Mental Retardation Harvey F. Dingman, 1973. *The Raising of Intelligence* H. H. Spitz, 2013-02-01. The history of attempts to raise the intelligence of mentally retarded individuals is wrought with controversy. Spanning the years from 1800 to the present, this book offers a critical review of the methods and philosophy behind these efforts. A fascinating contribution to the long-standing debate on the malleability of intelligence and the influence of heredity and environment.

Infants at Risk Richard B. Kearsley, Irving E. Sigel, 2021-09-30. What methodologies within the behavioral sciences have clinical application for the diagnosis and management of high-risk and handicapped infants? Originally published in 1979, this volume not only deals with this issue but illustrates the contributions that behavioral science may have offered those called upon to evaluate the cognitive consequences of perinatal high-risk factors at the time. The inadequacies of some measures used to assess intellectual competence in retardates are juxtaposed with the sophisticated methodologies that may be employed to document early mental abilities. Also included are assessment procedures that bypass reliance on neuromotor performance, imitation, or language production. The authors draw attention to the discontinuous nature of cognitive development, to the possibility that mental and motor development may proceed independently, and to the plasticity of the developing CNS, which may overcome early deficits if underlying competencies are recognized and exposed to appropriate stimulation. Here is a volume that does not simply catalog the nature of the child's

accomplishments and deficits but emphasizes the need to examine his potential for learning and offers various methodologies that may be of value in documenting the child's continuing cognitive development. This book is a re-issue originally published in 1979. The language used is a reflection of its era and no offence is meant by the Publishers to any reader by this re-publication.

Interactive Assessment H. Carl Haywood, David Tzuriel, 2013-11-11

The terms interactive and dynamic would never have been associated with psychological and psychoeducational assessment a generation ago. They have currency now because of widespread dissatisfaction with the normative standardized testing model, criticism of theoretical concepts of intelligence, recognition of abuses of standardized intelligence testing and frustration with prediction and classification as primary goals of assessment. It is almost certainly true that public policy concerns propel scientific activity far more often than science propels public policy. In the case of psychological assessment, public policy concerns have arisen in the last 20 years primarily around issues of possible discrimination against members of ethnic minorities. At the same time, there has been a re-surgence of dedication to excellence in education goals. These concerns have led to such extreme measures as prohibition of the use of standardized intelligence tests to determine school placement decisions, especially for minority children. They have led also to a search for alternatives to standardized normative testing. The chapters in this volume represent a variety of answers to this need.
