It was in 1967-68 that I wrote the book *Economic relations between the two Europes and the socialist international cooperation* published in 1970 Its main message may be summed up as follows

- 1 Between economic development and underdevelopment exists a state which stabilizes under capitalist economic and world economic relations and constitutes a particular peripheral zone around the developed cores of the world economy It is a historic feat of the European socialist countries to have broken out of this peripheral situation and to move towards the complete liquidation of their historical backwardness
- 2 The position of the group of European socialist countries in world economy and within it in Europe is determined by the asymmetry which is at the same time the most characteristic feature of their domestic development namely that the traditional extent and manner of their participation in the international division of labour no longer corresponds to their development requirements their having become much more developed and exacting At the same time their full participation in the division of labour of the highly developed countries is still hindered beyond the deliberate and spontaneous repressive efforts of the West by the fact that their forces of production have not yet reached an advanced state This is what makes East West economic relationships even more contradictory and constitutes a menace to every effort made in this direction

Comecon J. J. Brine, 1992 Comecon or the Council for Mutual Economic Assistance was founded by Joseph Stalin in 1949 to counteract the Marshall Plan and reinforce the bonds between the Soviet Union and the people's democracies of Eastern Europe Other Soviet Bloc nations later joined Comecon and for forty years it dominated the trade policies of the Soviet Bloc and profoundly influenced their domestic economic development and relations with the

West Comecon collapsed in 1991 after the countries of Eastern Europe rejected communism. It was often compared with the West European Common Market but differed vastly in its aims, structure, powers and activities. Its influence is a critical factor in assessing both the economic failures of the Soviet Bloc and the problems facing former member states as they make the transition to free market economies. This detailed annotated bibliography is an essential guide to the extensive English language literature about Comecon from its founding until its demise. Chapters cover Comecon's history, structure and law, socialist economic integration, the organization's arrangements for international trade and finance, environment, natural resources and energy, labor, industry and agriculture, science and technology. Comecon, like the rest of the Soviet Bloc, collapsed suddenly but its legacy will color international relations and worldwide economic issues for years to come. An understanding of its institutions, mechanisms and policies remains vital. In appreciating the economic organization of the former Soviet empire, this bibliography will therefore be indispensable to policymakers, economists, historians and political scientists.

The Program for Socialist Economic Integration Jozef M. van Brabant, 1971 *Socialist Integration* Mikhail Vasil'evich Senin, 1973. Monograph on the development of economic relations between socialist countries examines the operation of economic laws governing the world socialist economic systems with special reference to the economic integration process within the CMEA countries and analyses the international division of labour and possibilities of international cooperation in the economic field.
