Societal Culture Management:

Psychology In India. Volume 2: Social And Organizational Processes Girishwar Misra, 2009-09 Revised version of papers presented at the National Workshop for Fifth ICSSR Survey of Psychological Research held at Delhi during 23 24 October 2006

Psychological Aspects of Social Axioms Kwok Leung, Michael Harris Bond, 2008-12-29 Humans are surrounded by trillions of stimuli Their eyes for instance can discriminate 7 500 000 colors But there is a severe limitation in the number of discriminably different stimuli that they can process at one time George Miller argued that they can handle no more than seven plus or minus two independent pieces of information at any given time Thus necessarily they must develop ways to simplify the task of processing the information that exists in their environment They do this in many ways One way is to select the stimuli that are most important in their lives what are often called values Another way is to chunk stimuli by linking them to each other so they form bundles of stimuli that can be processed as if they are one entity Generalized expectancies of what is linked with what are beliefs and these beliefs are structured into bundles see Triandis 1972

Crisis-Related Decision-Making and the Influence of Culture on the Behavior of Decision Makers Ásthildur Elva

Bernhardsdóttir, 2015-08-31 This book provides an analysis on the impact of culture on crisis management exploring how different cultural types are reflected in crisis related decision making patterns Providing an interdisciplinary and international perspective with a rich research and practical outlook this work is an important contribution to the field of crisis management and decision making Offering essential understanding to how countries organizations groups and individuals prepare for and respond to crises thus combining research across several disciplines offering theoretical development empirical testing and reporting on the testing of a large number of hypotheses across several frameworks The novelty of this book lies in its presentation of the quantitative testing of the relationship between cultural theory and crisis management drawing on data from cases that cross continents and crises types The book also includes a review of cases from South Korea and suggests a number of ways in which practitioners at various levels of government can prepare their organizations to cope better with the introduction of cultural bias into the decision making process Those with an interest in risk management disaster management and crisis management will value this pioneering work as it reveals the influence of cultural bias in decision making processes This work offers important insights for practice as well as for theory building scholars and practitioners of public administration management political and international relations organizational social and cultural psychology amongst others will all gain from reading this work
