A Journey through the Beyond Silvia Zago, 2022-02-01 This volume offers the first comprehensive overview of the evolution over time of a foundational concept of the Egyptian afterlife beliefs the Duat or netherworld The Duat is a complicated multifaceted notion which was never canonized into a single version of the beyond but offered instead a variety of alternatives attempting to describe the metaphysical realms beyond the visible world and beyond life Theological speculations gave rise to a rich textual and visual repertoire which underwent a process of evolution over thousands of years during which newer ideas and images were constantly introduced Through the analysis of royal and non royal funerary texts from the late Old Kingdom to the end of the New Kingdom this book traces the development of the conceptualization of the notion of Duat outlining what it encompassed and where it was imagined to be

located In addition to the translation and discussion of the most significant passages of the texts analyzed each chapter also provides an overview of the individual compositions and of the relevant theological cosmological and astronomical notions complementing the conceptual framework of which the Duat formed but a part Additionally discussions of concurrent changes in Egyptian culture society and ideology are included in order to clarify the context in which afterlife beliefs and related texts evolved An analysis of the correlation between funerary compositions and their material supports complements the study emphasizing the Egyptians belief in a magical synergy between texts images and their contexts in the activation of a suitable effective afterlife for the recipients of the texts

The Funeral Kit Jill L Baker, 2016-06-03 Studies of mortuary archaeology tend to focus on difference how the researcher can identify age gender status and ethnicity from the contents of a burial Jill L Baker s innovative approach begins from the opposite point how can you recognize the commonalities of a culture from the funeral kit that occurs in all burials irrespective of status differences And what do those commonalities have to say about the world view and religious beliefs of that culture Baker begins with the Middle and Late Bronze Age tombs in the southern Levant then expands her scope in ever widening circles to create a general model of the funeral kit of use to archaeologists in a wide variety of cultures and settings The volume will be of equal value to specialists in Near Eastern archaeology and those who study mortuary remains in ancient cultures worldwide

Sacred Landscapes in Antiquity Ralph Haussler, Gian Franco Chiai, 2020-07-31 From generation to generation people experience their landscapes differently Humans depend on their natural environment it shapes their behavior while it is often felt that deities responsible for both natural benefits and natural calamities such as droughts famines floods and landslides need to be appeased We presume that in many societies lakes rivers rocks mountains caves and groves were considered sacred Individual sites and entire landscapes are often associated with divine actions mythical heroes and etiological myths Throughout human history people have also felt the need to monumentalize their sacred landscape But this is where the similarities end as different societies had very different understandings beliefs and practices The aim of this new thematic appraisal is to scrutinize carefully our evidence and rethink our methodologies in a multi disciplinary approach More than 30 papers investigate diverse sacred landscapes from the Iberian peninsula and Britain in the west to China in the east They discuss how to interpret the intricate web of ciphers and symbols in the landscape and how people might have experienced it We see the role of performance ritual orality textuality and memory in people's sacred landscapes A diachronic view allows us to study how landscapes were rewritten adapted and redefined in the course of time to suit new cultural political and religious understandings not to mention the impact of urbanism on people's understandings A key question is how was the landscape manipulated transformed and monumentalized especially the colossal investments in monumental architecture we see in certain socio historic contexts or the creation of an alternative humanmade seemingly non natural landscape with perfectly astronomically aligned buildings that define a cosmological order *Sacred Landscapes* therefore aims to analyze the complex links between landscape religiosity and society developing a dialectic framework that explores sacred landscapes across the ancient world in a dynamic holistic contextual and historical perspective

Historical and Archaeological Aspects of Egyptian Funerary Culture Harco Willems, 2014-08-07 Historical and Archaeological Aspects of Egyptian Funerary Culture a thoroughly reworked translation of *Les textes des sarcophages et la démocratie* published in 2008 challenges the widespread idea that the royal Pyramid Texts of the Old Kingdom after a process of democratisation became in the Middle Kingdom accessible even to the average Egyptian in the form of the Coffin Texts Rather they remained an element of elite funerary culture and particularly so in the Upper Egyptian nomes The author traces the emergence here of the so called nomarchs and their survival in the Middle Kingdom The site of Dayr al Barsh currently under excavation shows how nomarch cemeteries could even develop into large scale processional landscapes intended for the cult of the local ruler This book also provides an updated list of the hundreds of mostly unpublished Middle Kingdom coffins and proposes a new reference system for these

Concepts in Middle Kingdom Funerary Culture Rune Nyord, 2019-05-20 Concepts in Middle Kingdom Funerary Culture presents a collection of archaeological and philological papers discussing how ancient Egyptians thought and modern scholars may think about Egyptian funerary practices of the early 2nd millennium BCE Targeting the concepts

used by modern scholars the papers address both general methodological questions of how concepts should be developed and used and more specific ones about the history and presuppositions behind particular Egyptological concepts In so doing the volume brings to the fore occasionally problematic intellectual baggage that have hindered understanding as well highlighting new promising avenues of research in ancient Egyptian funerary culture in the Middle Kingdom and more broadly New and insightful suggestions are made many of which challenge the basic frames of reference of Western Egyptological study from funerary practice to issues of identity The methodological models should be of considerable interest to those studying aspects of the HB and ancient Levant related to funerary culture where studies have often tended towards the etic David Beadle *Journal for the Study of the Old Testament* 44 5 2020 *The Middle Kingdom of Ancient Egypt* Wolfram Grajetzki, 2024-05-16 For the ancient Egyptians the Middle Kingdom c 2000 1700 BC was a classical period of art history and literature The Twelfth Dynasty was one of the strongest ever to rule on the banks of the Nile some of its kings were later worshipped as local gods and were made famous by classical Greek authors Yet Egyptologists tend not to look beyond the extraordinary royal sculpture and literary masterpieces of the time Although the picture is fragmentary as with any archaeological record the last two hundred years of exploration and excavation have revealed much of the splendour of the period This book examines the evidence for the culture history and society of both central and provincial Egypt at the time revealing the wealth of the entire country In this second edition Wolfram Grajetzki incorporates recent discoveries discussions and publications which have emerged over the intervening fifteen years including new excavation reports for the mastabas at Lisht and excavations at Abydos Too often overshadowed by the better preserved architecture of other periods Middle Kingdom Egypt emerges for the reader as a fascinating age in its own right **The Walking Dead at Saqqara** Lara Weiss, 2022-06-21 Funerary rituals and the cult of the dead are classics of research in religious studies especially for ancient Egypt Still we know relatively little about how people interacted in daily life at the city of Memphis and its Saqqara necropolis in the late second millennium BCE By focussing on lived ancient religion we can see that the social and religious strategies employed by the individuals at Saqqara are not just means on the way to religious post mortem salvation nor is their self representation simply intended to manifest social status On the contrary the religious practices at Saqqara show in their complex spatiality a wide spectrum of options to configure sociality before and after one's own death The analytical distinction between religion and other forms of human practices and sociality illuminates the range of cultural practices and how people selected modified or even avoided certain religious practices As a result pre funerary funerary and practices of the subsequent mortuary cults in close connection with religious practices directed towards other ancestors and deities allow the formation of imagined and functioning reminiscence clusters as central social groups at Saqqara creating a heuristic model applicable also to other contexts **Ceramic Perspectives on Ancient Egyptian Society** Leslie Anne Warden, 2021-06-24 This Element demonstrates how ceramics a dataset that is more typically identified with chronology than

social analysis can forward the study of Egyptian society writ large This Element argues that the sheer mass of ceramic material indicates the importance of pottery to Egyptian life Ceramics form a crucial dataset with which Egyptology must critically engage and which necessitate working with the Egyptian past using a more fluid theoretical toolkit This Element will demonstrate how ceramics may be employed in social analyses through a focus on four broad areas of inquiry regionalism ties between province and state elite and non elite domestic life and the relationship of political change to social change While the case studies largely come from the Old through Middle Kingdoms the methods and questions may be applied to any period of Egyptian history *The Saqqara Necropolis through the New Kingdom* Nico Staring, 2022-11-28

This book is the first comprehensive monographic treatment of the New Kingdom 1539 1078 BCE necropolis at Saqqara the burial ground of the ancient Egyptian city of Memphis and addresses questions fundamental to understanding the site s development through time For example why were certain areas of the necropolis selected for burial in certain time periods what were the tombs spatial relations to contemporaneous and older monuments and what effect did earlier structures have on the positioning of tombs and structuring of the necropolis in later times This study adopts landscape biography as a conceptual tool to study the long time interaction between people and landscapes
