Religion and the Medieval and Early Modern Global Marketplace Scott Oldenburg, Kristin M. S. Bezio, 2021-10-28

Religion and the Medieval and Early Modern Global Marketplace brings together scholars from a variety of disciplines to examine the intersection conflict and confluence of religion and the market before 1700 Each chapter analyzes the unique interplay of faith and economy in a different locale Syria Ethiopia France Iceland India Peru and beyond In ten case studies specialists of archaeology art history social and economic history religious studies and critical theory address issues of secularization tolerance colonialism and race with a fresh focus They chart the tensions between religious and economic thought in specific locales or texts the complex ways that religion and economy interacted with one another and the way in which matters of faith economy and race converge in religious images of the pre and early modern periods Considering the intersection of faith and economy the volume questions the legacy of early modern economic and spiritual exceptionalism and the ways in which prosperity still entangles itself with righteousness The interdisciplinary nature means that this volume is the perfect resource for advanced undergraduates postgraduates and scholars working across multiple areas including history literature politics art history global studies philosophy and gender studies in the medieval and early modern periods

Money, Morality, and Culture in Late Medieval and Early Modern Europe Diane Wolfthal, 2016-12-05 One of the first volumes to explore the intersection of economics morality and culture this collection analyzes the role of the developing monetary economy in Western Europe from the twelfth to the seventeenth century The contributors scholars from the fields of history literature art history and musicology investigate how money infiltrated every aspect of everyday life modified notions of social identity and encouraged debates about ethical uses of wealth These essays investigate how the new symbolic system of money restructured religious practices familial routines sexual activities gender roles urban space and the production of literature and art They explore the complex ethical and theological discussions which developed because the role of money in everyday life and the accumulation of wealth seemed to contradict Christian ideals of poverty and charity revealing a rich web of reactions to the tensions inherent in a predominately Christian neo capitalist culture Money Morality and Culture in Late Medieval and Early Modern Europe presents a comprehensive multi disciplinary assessment of the ways in which the rise of the monetary economy fundamentally affected morality and culture in Western Europe

Money, Commerce, and Economics in Late Medieval English Literature Craig E. Bertolet, Robert Epstein, 2018-02-07 This is the first collection of essays dedicated to the topics of money and economics in the English literature of the late Middle Ages These essays explore ways that late medieval economic thought informs contemporary English texts and apply modern modes of economic analysis to medieval literature In so doing they read the importance and influence of historical records of practices as aids to contextualizing these texts They also apply recent modes of economic history as a means to understand the questions the texts ask about economics trade and money Collectively these papers argue that both medieval and modern

economic thought are key to valuable historical contextualization of medieval literary texts but that this criticism can be advanced only if we also recognize the specificity of the economic and social conditions of late medieval England

Mortality, Trade, Money and Credit in Late Medieval England (1285-1531) Pamela Nightingale, 2022-04 The eleven articles in this volume examine controversial subjects of central importance to medieval economic historians Drawing on a detailed analysis of the Statute Merchant and Staple records the articles chart the chronological and geographical changes in the economy from the late thirteenth to the early sixteenth centuries
