Handbook of Research on Education and Technology in a Changing Society Wang, Victor C. X., 2014-05-31 Technology has become an integral part of our everyday lives This trend in ubiquitous technology has also found its way into the learning process at every level of education The Handbook of Research on Education and Technology in a Changing Society offers an in depth description of concepts related to different areas issues and trends within education and technological integration in modern society This handbook includes definitions and terms as well as explanations of concepts and processes regarding the integration of technology into education Addressing all pertinent issues and concerns in education and technology in our changing society with a wide breadth of discussion this handbook is an essential collection for educators academicians students researchers and librarians **Society and the Environment** Joseph Zajda, 2002 Using both local and global perspectives examines some of the major issues in the study of society and environment Focuses on the study of people as social beings and the way they interact with each other within society and culture and the environment Aims to empower future teachers to act as informed and committed educators Engineering in American Society Raymond H. Merritt, 2014-07-15 Technology which has significantly changed Western man s way of life over the past century exerted a powerful influence on American society during the third quarter of the nineteenth century In this study Raymond H Merritt focuses on the engineering profession in order to describe not only the vital role that engineers played in producing a technological society but also to note the changes they helped to bring about in American education industry professional status world perspectives urban existence and cultural values During the development period of 1850 1875 engineers erected bridges blasted tunnels designed machines improved rivers and harbors developed utilities necessary for urban life and helped to bind the continent together through new systems of transportation and communication As a concomitant to this technological development states Merritt they introduced a new set of cultural values that were at once urban and cosmopolitan These cultural values tended to reflect the engineers experience of mobility so much a part of their lives and their commitment to efficiency standardization improved living conditions and a less burdensome life Merritt concludes from his study that the rapid growth of the engineering profession was aided greatly by the introduction of new teaching methods which emphasized and encouraged the solution of immediate problems Schools devoted exclusively to the education and training of engineers flourished schools such as Rensselaer Polytechnic Institute and Stevens Institute of Technology

Moreover business corporations and governments sought the services of the engineers to meet the new technological demands of the day In response they devised methods and materials that went beyond traditional techniques Their specialized experiences in planning constructing and supervising the early operation of these facilities brought them into positions of authority in the new business concerns since they often were the only qualified men available for the executive positions of authority for the executive positions of America s earliest large corporations These positions of authority further extended their influence in American society Engineers took a positive view of administration developed systems of cost accounting worked out job descriptions defined levels of responsibility and played a major role in industrial consolidation Despite their close association with secular materialism Merritt notes that many engineers expressed the hope that human peace and happiness would result from technical innovation and that they themselves could devote their technological knowledge executive experience and newly acquired status to solve some of the critical problems of communal life Having begun merely as had become the planners and in many cases municipal enterprises which they hoped would turn a land of farms and cities into a social eden *How Society Makes Itself* Howard J. Sherman,2006 This radical account of the evolution of political social and economic institutions weaves together strands of anthropology sociology political science history and economics In a highly readable text Howard Sherman explains the interconnections of ideas and economic forces and traces the evolution of social and economic institutions from primitive times to the present Sherman focuses on the myth of inevitable progress in technology and argues that it progresses only when social and economic institutions and dominant ideas encourage it to improve He shows that throughout history technology as a part of the economic forces ebbs and flows to create or undermine existing economic institutions *Online Society in China* David Kurt Herold,Peter Marolt,2011-03-25 This book discusses the rich and varied culture of China s online society and its impact on offline China It argues that the Internet in China is a separate space and is more than merely a technological or media extension of offline Chinese society

Technology, Society and Sustainability Lech W. Zacher,2017-03-02 This collection is a multidisciplinary and multicultural contribution to the current sustainability discourse It is focused on two main dimensions of our world complexity and diversity Desirable and urgent transition of socio technological systems toward a sustainability trajectory of development requires a better understanding of technological trends and social transformations General advancement of technology does not produce identical changes in various societies differentiated economically and culturally Moreover the abilities to approach sustainable development change over time and space As a result there is a constant need for continuing research analyses and discussions concerning changing contexts and adequacy of strategies and policies Authors from twelve countries and of different academic and cultural settings present their insights analyses and recommendations The collection is focused both on contexts and on activities leading to sustainable trajectories in various domains of economy and social life Continuing research and discussion is needed to better understand these challenges and to prepare the appropriate
