Samuel O. Idowu,2021-07-07 This book addresses the status quo of Corporate Social Responsibility practices and their development since 2008 How have things changed in the practice of CSR What new opportunities and challenges have arisen The book reports on an international set of cases and case studies on how CSR is practiced at business and organizations in various countries It analyzes country specific and industry specific issues as well as general global issues in connection with the United Nations Sustainable Development Goals The contributions gathered here provide comprehensive information on CSR for both practitioners and researchers around the globe Social and Environmental Disclosure by Chinese Firms

Yingjun Lu,Indra Abeysekera,2024-11-01 Given the increased social and environmental problems in China this book looks into the social and environmental disclosure practices of socially responsible Chinese listed firms by constructing a stakeholder driven three dimensional disclosure index The book contains a three part study the first part explores the current status of social and environment disclosure practices The second part empirically examines the relationship between corporate social and environmental disclosure and various influencing factors i e stakeholders power and corporate characteristics The third part empirically examines the link between corporate social responsibility CSR reporting i e publishing a CSR report and the quality of the CSR report and socially responsible reputation The book finds that the CSR report provided more stakeholder relevant social and environmental disclosure than the annual report It also finds that corporate characteristics such as firm size profitability and industry classification are all statistically significant factors influencing the social and environmental disclosure of the Chinese firms studied Shareholders significantly influenced firms social and environmental disclosure and creditors significantly influenced firms disclosure related to their environmental performance The final part of the study reports that publishing a CSR report and CSR reporting quality had a positive influence on firms socially responsible reputations and that the CEO chairman duality negatively influenced firms socially responsible reputation This book will be of interest to those who are keen to learn more about corporate social responsibilities in the context of Chinese firms **P-Z Library of Congress.
