Sociolinguistics and Social Theory Nikolas Coupland, Srikant Sarangi, Christopher N. Candlin, 2014-06-11 The empirical and descriptive strengths of sociolinguistics developed over more than 40 years of research have not been matched by an active engagement with theory Yet over this time social theorising has taken important new turns linked in many ways to linguistic and discursive concerns Sociolinguistics and Social Theory is the first book to explore the interface between sociolinguistic analysis and modern social theory The book sets out to reunite sociolinguistics with the concepts and perspectives of several of the most influential modern theorists of society and social

action including Bakhtin Foucault Habermas Sacks Goffman Bourdieu and Giddens In eleven newly commissioned chapters leading sociolinguists reappraise the theoretical framing of their research reaching out beyond conventional limits The authors propose significant new orientations to key sociolinguistic themes including social motivations for language variation and change language power and authority language and ageing language race and class language planning In substantial introductory and concluding chapters the editors and invited discussants reassess the boundaries of sociolinguistic theory and the priorities of sociolinguistic methods Sociolinguistics and Social Theory encourages students and researchers of sociolinguistics to be more reflexively aware and critical of the social bases of their analyses and invites a reassessment of the place sociolinguistics occupies in the social sciences generally

Talk that Counts Ronald K. S. Macaulay, 2005-01-13 Talk That Counts is a sociolinguistic study of variation in discourse employing quantitative methods to explore age gender and social class differences in the use of features such as you know I mean adverbs and pronouns Unlike many studies of discourse variation that focus on a single social factor Talk That Counts examines age gender and social class differences in a gender balanced sample of middle class and working class adolescents and adults recorded under the same conditions Differences between adults and adolescents provided the greatest number of statistically significant results followed by differences between males and females The smallest number of statistically significant differences were related to social class The range of variation underlines the need to look at more than a single extra linguistic variable when examining discourse It also shows the dangers of generalizing about social class for example on the basis of a limited sample e g adolescent boys In Talk That Counts distinguished sociolinguist Ronald Macaulay presents an important new approach to the sociolinguistic investigation of discourse variation

La atención de esta tesis doctoral se ha centrado en la situación sociolingüística de la capital ucraniana Kiev y particularmente en su estructuración y organización en términos de la distribución funcional del bilingüismo ruso ucraniano el rasgo sociolingüístico más destacado de la sociedad en cuestión. A modo de objeto central del análisis macrosincrónico correlacional Kiev ha sido considerado como una comunidad lingüística con un bilingüismo histórico funcional desequilibrado que tras la independencia de Ucrania en 1991 podría conocer cambios significativos a nivel del espacio idiomático y del conjunto de las actitudes de los hablantes. En particular la política lingüística implementada en el país desde hace veinte años ha sido considerada como un posible modificador de la estructuración sociolingüística de esta comunidad postsoviética con una política idiomática notable. Con referencia a tal dicotomía sociopolítica esta investigación se ha basado en los objetivos de definir los principales factores sociales estilísticos y extralingüísticos y delimitar los grupos sociales concretos que determinan usos lingüísticos estratificados y favorecen el funcionamiento del ucraniano y del ruso en los medios público privado y de percepción pasiva. En la búsqueda de las normas de la estructuración y reestructuración generacional del bilingüismo kievita como institución social se ha planteado describir las formas de su reflejo práctico y de su aceptación colectiva e individual establecer reglas de la variación de la selección idiomática y definir las actitudes lingüísticas predominantes de los hablantes con referencia a sus expectativas lingüísticas y la correspondiente conducta idiomática. Los datos empíricos obtenidos mediante un trabajo de campo y técnica directa de encuesta se han ordenado en el corpus muestral estratificado a partir de tres variables sociales clave del estudio edad sexo y barrio de residencia. Ellos han proporcionado referencias suficientes en cuanto a las prácticas idiomáticas intercontextuales y actitudes lingüísticas predominantes del universo relativo de Kiev representado por los dos grupos de edad chicos y adolescentes bilingües de sexos opuestos y residentes de barrios urbanos diferenciados por su estatus socioeconómico y desarrollo sociocultural. Los análisis estadísticos univariados y sus respectivos resultados han descrito la estructuración sociolingüística multidimensional de la capital ucraniana en términos del rendimiento de las variables sociales propuestas en la variación sociolingüística de la dependencia diáfónica y social de la selección de código y de las actitudes de los hablantes de diferentes retratos sociales complejos hacia la funcionalidad y valor estimado de las lenguas en contacto. Desde una perspectiva general la comunidad lingüística de Kiev se define por la presencia polifáctica y multigradual del bilingüismo ruso ucraniano no institucional como un fenómeno social complejo representado a nivel colectivo e individual. La vertiente colectiva o social del bilingüismo kievita refleja una distribución puntual de las prácticas idiomáticas intercontextuales determinadas por un complejo sistema de juicios de valor sobre la adecuación contextual de las lenguas en contacto. Su característica más destacada radica en la naturaleza diglósica cruzada que manifiesta la funcionalidad no del todo ponderada y diáfonicamente dependiente de las lenguas en contacto. La dimensión individual del bilingüismo ruso ucraniano reproduce el

estado psicoidiomático personal de la mayoría de los hablantes y se corresponde con la autoidentificación monolingüe competencia lingüística equilibrada biculturalismo endogeneidad funcionalidad distinguida y superpuesta al monolingüismo funcional A nivel de la variación sociolingüística se ha constatado el rendimiento sociolingüístico a mínimo de la variable social de edad b medio de la variable social de sexo y c máximo de la variable social de barrio de residencia del hablante Con ello se han demostrado a la ausencia del cambio generacional significativo y b la estructuración de los usos lingüísticos intercontextuales en correlación con el sexo del hablante y su estatus socioeconómico que actúa como el modificador más destacado de las preferencias y actitudes en la comunidad Aparte de ello los factores de a el grado de participación situacional b la adecuación contextual y c el medio de selección práctica han demostrado actuar como agentes determinantes en la selección del ucraniano y del ruso en la mayoría de los contextos comunicativos públicos privados y de percepción pasiva analizados
