Sociologism Existentialism Two Perspec:

Sociologism and Existentialism, Two Perspectives on the Individual and Society Edward A. Tiryakian, 1962 *The Art and Science of Sociology* Roland Robertson, John Simpson, 2016-07-06 A festschrift honoring the work of Edward A. Tiryakian consisting of a large number of essays **Emile Durkheim** Steven Lukes, 1985 This study of Durkheim seeks to help the reader to achieve a historical understanding of his ideas and to form critical judgments about their value To some extent these two aims are contradictory On the one hand one seeks to understand what did Durkheim really mean how did he see the world how did his ideas relate to one another and how did they develop how did they relate to their biographical and historical context how were they received what influence did they have and to what criticism were they subjected what was it like not to make certain distinctions not to see certain errors of fact or of logic not to know what has subsequently become known On the other hand one seeks to assess how valuable and how valid are the ideas to what fruitful insights and explanations do they lead how do they stand up to analysis and to the evidence what is their present value Yet it seems that it is only by inducing oneself not to see and only by seeing them that one can make a critical assessment The only solution is to pursue both aims seeing and not seeing simultaneously More particularly this book has the primary object of achieving that sympathetic understanding without which no adequate critical assessment is possible It is a study in intellectual history which is also intended as a contribution to sociological theory *The Routledge International Handbook of Existential Human Science* Huon Wardle, Nigel Rapport, Albert Piette, 2023-08-01 This volume is the first handbook to explore existentialism as epistemology and method Transdisciplinary in scope it considers the nature of human subjectivity and how human experience ought to be studied examining the connections that exist between the individual's imagining of the world and their everyday practice within it With attention to the question of whether humans are ultimately alone in their self knowledge or whether what they know of themselves is constructed in common with others it enables the reader to recognize core questions that frame the methods and orientation of an existential inquiry In addition to historical exposition it offers a variety of chapters from around the world that explore the diverse global spaces for and different types of existential focus and discussion thus questioning the view that the existential problem may be singularly a matter for the post enlightenment West The fullest and most comprehensive survey to date of what human beings can and should make of themselves The Routledge International Handbook of Existential Human Science will appeal to scholars across the humanities and social sciences with interests in anthropology sociology philosophy and research methods **Research Beyond Borders** Lise-Hélène Smith, Anjana Narayan, 2011-12-28 This collection draws insights from an interdisciplinary group of scholars who specialize in diverse methods ranging from ethnography archival research and oral histories to quantitative data analysis and experiments used in the social sciences and humanities to reflect on the empirical methodological and practical implications of conducting research beyond one's national borders The goal of this book is to help researchers contemplate existing

orientations that dominate current research processes and consider the need for transnational multidisciplinary practices that remain aware of the inequalities which continually inform research practices With this focus this collection is also a resourceful initiative that seeks to share experiences as well as extract key ideas and approaches likely to overlap or resonate in different disciplines

For Durkheim Edward A. Tiryakian, 2016-12-05 For Durkheim is a timely and original contribution to the debate about Durkheim at a time when his concerns on ethics morality and civil religion have much relevance for our own troubled and divided society It includes two new essays from Edward A Tiryakian s collection on the Danish Muhammad cartoons and September 11th providing contemporary relevance to the debate and an analytical and interpretive introduction indicating the ongoing importance of Durkheim within sociology This indispensable volume for all serious Durkheim scholars includes English translations of papers previously published in French for the first time and will be of interest to sociologists anthropologists social historians and those interested in critical questions of modernity

Marx and Mead (RLE Social Theory) Tom W. Goff, 2014-08-13 It has often been suggested that a resolution of issues generated by the sociological study of ideas might be reached through a synthesis of specific insights to be found in the works of Karl Marx and George Herbert Mead The present study originated in an investigation of this hypothesis particularly as it bears on the central issue of sociological relativism The author began by delineating the specific problems such a synthesis might resolve and in the process became aware that the nature and depth of differences separating the sociology of knowledge and its critics have never been fully analysed or understood This volume therefore opens with a clarification of these differences a clarification which leads to considerable redefinition of the problem as it has traditionally been understood by critics and proponents of the discipline alike The author points out in particular that it is less a debate than a thorough going contradiction which characterizes the literature dealing with the inadequacies of various formulations of the sociology of knowledge In consequence the study of Marx and Mead presented here is not simply yet another effort to discover a perspective which will satisfy the particular demands of the critics Rather it argues that an adequate perspective fully consistent with the central insight of the discipline that knowledge is radically social in character is to be found in a synthesis of elements in the perspectives of Marx and Mead
