Fine, 1986-01-01 The belief that desegregation in the public schools has been a failed and costly policy is widespread Educational standards suffer and public support declines it is said when the schools are used as agencies of social reform In this study of school desegregation in San Francisco Doris Fine argues that although the schools difficulties are real they are due not to the policy of desegregation but to deficiencies of leadership and organization within the schools Fine s central

concern is institutional integrity and the demoralization that sets in when integrity is undermined. Some of the questions she considers are: How did San Francisco's public schools become a central arena for community conflict over issues of civil rights? What options did school leaders have? What happened when the political and educational controversy was brought to federal court? Did court orders help or hinder institutional reform? Most importantly, what adjustments in the leadership and internal dynamics of public schools were necessary for change to be effective? This study of social policy and institutional dynamics documents a painful episode in the history of public schools. It sheds light both on the nature of social change and on the critical role leadership plays in the reform of organizations.

In addressing long-standing and newly emerging issues, the researchers examine the scientific evidence on what constitutes effective teaching in college classrooms, on the psychometric integrity of measures of teaching effectiveness, and on the use of such measures for tenure promotion and salary decisions. Systematically explored throughout the book is the avowed linkage between classroom teaching and motivation, learning, and performance outcomes in students.
