Ruth Leys, 2010-12-15 Psychic trauma is one of the most frequently invoked ideas in the behavioral sciences and the humanities today Yet bitter disputes have marked the discussion of trauma ever since it first became an issue in the 1870s growing even more heated in recent years following official recognition of post traumatic stress disorder PTSD In a book that is bound to ignite controversy Ruth Leys investigates the history of the concept of trauma She explores the emergence of multiple personality disorder Freud's approaches to trauma medical responses to shellshock and combat fatigue Sándor Ferenczi's revisions of psychoanalysis and the mutually reinforcing often problematic work of certain contemporary neurobiological and postmodernist theorists Leys argues that the concept of trauma has always been fundamentally unstable oscillating uncontrollably between two competing models each of which tends at its limit to collapse into the other A powerfully argued work of intellectual history Trauma will rewrite the terms of future discussion of its subject **PTSD**

Allan V. Horwitz, 2018-09-03 A comprehensive history of PTSD Post traumatic stress disorder and its predecessor diagnoses including soldier's heart railroad spine and shell shock was recognized as a psychiatric disorder in the latter part of the nineteenth century The psychic impacts of train crashes wars and sexual shocks among children first drew psychiatric attention Later enormous numbers of soldiers suffering from battlefield traumas returned from the world wars It was not until the 1980s that PTSD became a formal diagnosis in part to recognize the intense psychic suffering of Vietnam War veterans and women with trauma related personality disorders PTSD now occupies a dominant place in not only the mental health professions but also major social institutions and mainstream culture making it the signature mental disorder of the early twenty first century In PTSD Allan V Horwitz traces the fluctuations in definitions of and responses to traumatic psychic conditions Arguing that PTSD perhaps more than any other diagnostic category is a lens for showing major historical changes in conceptions of mental illness he surveys the conditions most likely to produce traumas the results of those traumas and how to evaluate the claims of trauma victims Illuminating a number of central issues about psychic disturbances more generally including the relative importance of external stressors and internal vulnerabilities in causing mental illness the benefits and costs of mental illness labels and the influence of gender on expressions of mental disturbance PTSD is a compact yet comprehensive survey The book will appeal to diverse audiences including the educated public students across the psychological and social sciences and trauma victims who are interested in socio historical approaches to their condition Praise for Allan V Horwitz's Anxiety A Short History The definitive overview of the history of anxiety Bulletin of the History of Medicine A lucid erudite and brisk intellectual history driven by a clear and persuasive central argument Social History of Medicine An enlightening tour of anxiety set at a sensible pace with an exceptional scholar and writer leading the way Library Journal Traumatic Politics Barry M. Shapiro, 2010-11-01 **Combat Trauma** Nadia Abu El Haj, 2022-09-27 Americans have long been asked to support the troops and care for veterans psychological wounds Who though does this

injunction serve As acclaimed scholar Nadia Abu El Haj argues here in the American public s imagination the traumatized soldier stands in for destructive wars abroad with decisive ramifications in the post 9 11 era Across the political spectrum the language of soldier trauma is used to discuss American warfare producing a narrative in which traumatized soldiers are the only acknowledged casualties of war while those killed by American firepower are largely sidelined and forgotten In this wide ranging and fascinating study of the meshing of medicine science and politics Abu El Haj explores the concept of post traumatic stress disorder and the history of its medical diagnosis While antiwar Vietnam War veterans sought to address their psychological pain even as they maintained full awareness of their guilt and responsibility for perpetrating atrocities on the killing fields of Vietnam by the 1980s a peculiar convergence of feminist activism against sexual violence and Reagan s right wing war on crime transformed the idea of PTSD into a condition of victimhood In so doing the meaning of Vietnam veterans trauma would also shift moving away from a political space of reckoning with guilt and complicity to one that cast them as blameless victims of a hostile public upon their return home This is how in the post 9 11 era of the Wars on Terror the injunction to support our troops came to both sustain US militarism and also shields American civilians from the reality of wars fought ostensibly in their name In this compelling and crucial account Nadia Abu El Haj challenges us to think anew about the devastations of the post 9 11 era Male Suicide and Masculinity in 19th-century Britain Lyndsay

Galpin,2022-04-07 This book shows how interpretations of suicidal motives were guided by gendered expectations of behaviour and that these expectations were constructed to create meaning and understanding for family friends and witnesses Providing an insight into how people of this era understood suicidal behaviour and motives it challenges the assertion that suicide was seen as a distinctly feminine act and that men who took their own lives were feminized as a result Instead it shows that masculinity was understood in a more nuanced way than gender binaries allow and that a man s masculinity was measured against other men Focusing on four common narrative types the love suicide the unemployed suicide the suicide of the fraudster or speculator and the suicide of the dishonoured soldier it provides historical context to modern discussions about the crisis of masculinity and rising male suicide rates It reveals that narratives around male suicides are not so different today as they were then and that our modern model of masculinity can be traced back to the 19th century The Encultured Brain Daniel H. Lende,Greg Downey,2012-08-24 Basic concepts and case studies from an

emerging field that investigates human capacities and pathologies at the intersection of brain and culture The brain and the nervous system are our most cultural organs Our nervous system is especially immature at birth our brain disproportionately small in relation to its adult size and open to cultural sculpting at multiple levels Recognizing this the new field of neuroanthropology places the brain at the center of discussions about human nature and culture Anthropology offers brain science more robust accounts of enculturation to explain observable difference in brain function neuroscience offers anthropology evidence of neuroplasticity s role in social and cultural dynamics This book provides a foundational text for

neuroanthropology offering basic concepts and case studies at the intersection of brain and culture After an overview of the field and background information on recent research in biology a series of case studies demonstrate neuroanthropology in practice Contributors first focus on capabilities and skills including memory in medical practice skill acquisition in martial arts and the role of humor in coping with breast cancer treatment and recovery then report on problems and pathologies that range from post traumatic stress disorder among veterans to smoking as a part of college social life Contributors Mauro C Balieiro Kathryn Bouskill Rachel S Brezis Benjamin Campbell Greg Downey Jos Ernesto dos Santos William W Dressler Erin P Finley Agust n Fuentes M Cameron Hay Daniel H Lende Katherine C MacKinnon Katja Pettinen Peter G Stromberg
