Feinman, Michael Lewis, 2013-06-29 How are we to understand the complex forces that shape human behavior A variety of diverse perspectives drawing on studies of human behavioral ontogeny as well as humanity s evolutionary heritage seem to provide the best likelihood of success It is in an attempt to synthesize such potentially disparate approaches to human development into an integrated whole that we undertake this series on the genesis of behavior In many respects the incredible burgeoning of research in child development over the last two decades or so seems like a thousand lines of inquiry spreading outward in an incoherent starburst of effort The need exists to provide on an ongoing basis an arena of discourse within which the threads of continuity among those diverse lines of research on human development can be woven into a fabric of meaning and understanding Scientists scholars and those who attempt to translate their efforts into the practical realities of the care and guidance of infants and children are the audience that we seek to reach Each requires the opportunity to see to the degree that our knowledge in given areas permits various aspects

of development in a coherent integrated fashion It is hoped that this series which brings together research on infant biology developing infant capacities animal models and impact of social cultural and familial forces on development and the distorted products of such forces under certain circumstances serves these important social and scientific needs

Feminist Visions of Development Cecile Jackson, Ruth Pearson, 2005-07-27 Key issues in gender studies and development today are explored in detail from rural and urban poverty to population and family planning resulting from the 1995 UN Conference on Women **Current Catalog** National Library of Medicine (U.S.), First multi year cumulation covers six years 1965 70 Delhi Upinder Singh, 2006 Not many people know that the busy and bustling capital city of Delhi and its surroundings have a long past going back thousands of years Prehistoric stone tools have surfaced here and many ancient remains have been found sometimes accidentally by farmers tilling their fields and at other times by archaeologists carrying out systematic excavations A mound one passes everyday or a narrow strip of stream tells a story of ancient times Centuries of history coexist with metro stations and plush cars The readings in this book give us glimpses of the lives of people who lived in the Delhi area over the centuries and how these details have been pieced together by historians It brings into focus the importance of the historian's method and the sources of information found in ancient texts archaeology and even legends and folklore sometimes hanging on the thread of a slender historical fact The editor of the volume points to the urgency of further exploration and documentation to fill in the still all too meagre details of Delhi's ancient history However she ends on a note of caution bordering on alarm when she points out that invaluable evidence of the city's past is being extensively destroyed due to quarrying and the construction of new roads and buildings Such activities are an integral part of the modernization of a living city but the balance between modernization and the preservation of ancient remains is indeed very fragile and needs to be maintained from an informed and realistic perspective This collection of essays has been put together by a teacher for students of history but will also be of enormous value to a large number of other interested readers Upinder Singh is Professor of history at the University of Delhi
