Social Evolution And The Modern Western Worldview:

The Social Evolution of World Politics Mathias Albert, Hauke Brunkhorst, Iver B. Neumann, Stephan Stetter, 2023-09-01 How can we understand long term change in world politics better Based on readings of thinkers as diverse as Habermas Foucault and Luhmann the authors of this book propose a framework for understanding such change in terms of social evolution They show that processes of social learning and unlearning are key to understanding the long term historical evolution of complex societies and propose to approach these with the core concepts of autonomization hierarchical complexity and co evolution Three case studies illustrate this social evolutionary perspective to the study of world politics examining the evolution of forms of organizing political authority of conflicts of diplomacy of law as boundary condition

Evolutionary Processes in the Natural History of Religion Hansjörg Hemminger, 2021-09-22 The study of religion by the humanities and social sciences has become receptive for an evolutionary perspective Some proposals model the evolution of religion in Darwinian terms or construct a synergy between biological and non Darwinian processes The results however have not yet become truly interdisciplinary The biological theory of evolution in form of the Extended Evolutionary Synthesis EES is only sparsely represented in theories published so far by scholars of religion Therefore this book reverses the line of view and asks how their results assort with evolutionary biology How can the subject area religion integrated into behavioral biology How is theory building affected by the asymmetry between the scarce empirical knowledge of prehistoric religion and the body of knowledge about extant and historic religions How does hominin evolution in general relate to the evolution of religion Are there evolutionary pre adaptations Subsequent versions of evolutionary biology from the original Darwinism to EES are used in interdisciplinary constructs Can they be integrated into a comprehensive theory The biological concept most often used is co evolution in form of a gene culture co evolution However the term denotes a process different from biological co evolution Important EES concepts do not appear in present models of religious evolution e g neutral evolution evolutionary drift evolutionary constraints etc How to include them into an interdisciplinary approach Does the cognitive science of religion CSR harmonize with behavioral biology and the brain sciences Religion as part of human culture is supported by a complex multi level behavioral system How can it be modeled scientifically The book addresses graduate students and researchers concerned about the scientific study of religion and biologist interested in interdisciplinary theory building in the field

Travel Narratives in Dialogue Shannon Marie Butler, 2008 The Currents in Comparative Romantic Languages and Literatures series was founded in 1987 and actively solicits book length manuscripts which treat aspects of romance languages and literatures Originally established for works dealing with two or more romance literatures the series has broadened its horizons and now includes studies on themes within a single literature or between different literatures civilizations art music film and social movements as well as comparative linguistics

The End of Progress Amy Allen, 2016-01-12 While post and decolonial theorists have thoroughly debunked the idea of historical progress as a

Eurocentric imperialist and neocolonialist fallacy many of the most prominent contemporary thinkers associated with the Frankfurt School Jürgen Habermas Axel Honneth and Rainer Forst have defended ideas of progress development and modernity and have even made such ideas central to their normative claims Can the Frankfurt School's goal of radical social change survive this critique And what would a decolonized critical theory look like Amy Allen fractures critical theory from within by dispensing with its progressive reading of history while retaining its notion of progress as a political imperative so eloquently defended by Adorno Critical theory according to Allen is the best resource we have for achieving emancipatory social goals In reimagining a decolonized critical theory after the end of progress she rescues it from oblivion and gives it a future

Douglas, 2001-12-12 The impact that social determinants such as work environment race and class have on health

Social Theory in a Changing World Gerard Delanty, 2013-05-08 This book provides a critical assessment of contemporary social theory for students in the social sciences Delanty examines the writings of a number of key contemporary thinkers including Habermas Foucault Bauman Touraine Giddens and Beck and provides a clear account of the strengths and limitations of their work

Transforming Worldviews Paul G. Hiebert, 2008-05 A leading evangelical anthropologist missiologist provides students of intercultural ministry with an understanding of worldview and a strategy for effective long term ministry

Natural Resource Use and Global Change K. Bruckmeier, 2013-01-21 Building on recent developments in social ecology this book advances a new critical theory of society and nature exploring social metabolism and global resource flows in contemporary society Barriers to global sustainability are identified and conditions for transforming industrial economies towards new sustainable resource use are described

Ratio and Voluntas Kaarlo Tuori, 2016-04-08 From the ancient beginnings of Western legal tradition law has been conceived as traversed by a fundamental tension between power will and reason This volume examines the tension between these two poles ratio and voluntas in modern law Part I focuses on three instructive phases in the history of the law's ratio Part II examines the way legal scholarship especially doctrinal research legal dogmatics can and should contribute to the law's coherence Part III explores the role of constitutional law in managing the tension between law's voluntas and ratio The final chapter discusses the implications the growth of transnational law may have on the relationship between ratio and voluntas The study builds on the views of the distinctive features of the ideal typical mature modern legal system as presented in the author's previous work Critical Legal Positivism Ashgate 2002

Legends in Gandhian Social Activism: Mira Behn and Sarala Behn Bidisha Mallik, 2022-06-15 This book is about Madeleine Slade 1892-1982 and Catherine Mary Heilemann 1901-1982 two English associates of Mohandas K. Mahatma Gandhi 1869-1948 known in India as Mira Behn and Sarala Behn The odysseys of these women present a counternarrative to the forces of imperialism colonialism capitalism and globalized development The book examines their extraordinary journey to India to work with Gandhi and their roles in India's independence movement their spiritual strivings their independent

work in the Himalayas and most importantly their contribution to the evolution of Gandhian philosophy of socio economic reconstruction and environmental conservation in the present Indian state of Uttarakhand The author shows that these women developed ideas and practices that drew from an extensive intellectual terrain that cannot be limited to Gandhi s work She delineates directions in which Gandhian thought and experiments in rural development work and visions of a new society evolved through the lives activism and written contributions of these two women Their thought and practice generated a new cultural consciousness on sustainability that had a key influence in environmental debates in India and beyond and were responsible for two of the most important environmental movements of India and the world the Chipko Movement or the movement against commercial green felling of trees by hugging them and the protest against the Tehri high dam on the Bhagirathi River To this day their teachings and philosophies constitute a useful and significant contribution to the search for and implementation of global ideas of ecological conservation and human development *Progress and Its Impact on the Nagas* Tezenlo Thong,2016-03-23 The term progress is a modern Western notion that life is always improving and advancing toward an ideal state It is a vital modern concept which underlies geographic explorations and scientific and technological inventions as well as the desire to harness nature in order to increase human beings ease and comfort With the advent of Western colonization and to the great detriment of the colonized the notion of progress began to perniciously and pervasively permeate across cultures This book details the impact of the notion of progress on the Nagas and their culture The interaction between the Nagas and the West beginning with British military conquest and followed by American missionary intrusion has resulted in the gradual demise of Naga culture It is almost a cliché to assert that since the colonial contact the long evolved Naga traditional values are being replaced by Western values Consequences are still being felt in the lack of sense of direction and confusion among the Nagas today Just like other Indigenous Peoples whose history is characterized by traumatic cultural turmoil because of colonial interference the Nagas have long been engaged in self shame self negation and self sabotage *Religion and Social Reconstruction in Africa* Elias Kifon Bongmba,2018-06-13 Religion has played a major role in both the division and unification of peoples and countries within Africa Its capacity to cause and to heal societal rifts has been well documented This book addresses this powerful societal force and explores the implications of a theology of reconstruction most notably articulated by Jesse Mugambi This way of thinking seeks to build on liberation theology aiming to encourage the rebuilding of African society on its own terms An international panel of contributors bring an interdisciplinary perspective to the issues around reconstructing the religious elements of African society Looking at issues of reconciliation postcolonialism and indigenous spirituality among others they show that Mugambi s cultural and theological insight has the potential to revolutionise the way people in Africa address this issue This is a fascinating exploration of the religious facets of African life As such it will be of great interest to scholars of religious studies theology and African studies *Chinese Modernism in the Era of Reforms* Xudong Zhang,1997 Book on Chinese cinema and

literature *New Age Religion and Western Culture* Wouter J. Hanegraaff, 2018-09-24 Recent years have seen a spectacular rise of the New Age movement and an ever increasing interest in its beliefs and manifestations This fascinating work presents the first ever comprehensive analysis of New Age Religion and its historical backgrounds thus providing the reader with a means of orientation in the bewildering variety of the movement Making extensive use of primary sources the author thematically analyses New Age beliefs from the perspective of the study of religions While looking at the historical backgrounds of the movement he convincingly argues that its foundations were laid by so called western esoteric traditions during the Renaissance Hanegraaff finally shows how the modern New Age movement emerged from the increasing secularization of those esoteric traditions during the 19th century This ground breaking publication is compulsive reading for all those involved or interested in the New Age movement *Models, Measurement, and Metrology Extending the SI* William P. Fisher, Jr., Leslie Pendrill, 2024-09-23 The book focuses on the extension of quality assured measurement and metrology into psychological and social domains This is not only feasible and achievable but also a pressing concern Significant progress in developing a common conceptual system for measurement across the sciences has been made in recent collaborations between metrologists and psychometricians as reported in the chapters of this book Modeling estimation and interpretation of objectively reproducible unit quantities that support both general comparability and adaptation to unique local circumstances are demonstrated in fields as diverse as artificial intelligence justice and beauty perception **Subtle Activism** David Nicol, 2015-08-24 Can awakened consciousness contribute to social change and if so how David Nicol introduces the concept of subtle activism to describe the use of consciousness based practices like meditation and prayer to support collective transformation such as global meditation directed toward peaceful resolution of a conflict Subtle activism represents a bridge between the consciousness movement and the movements for peace environmental sustainability and social justice It is not a substitute for physical action but rather a potentially crucial component of a more integrated approach to social change Although ancient lore is rife with tales of shamans and adepts intervening on spiritual levels for the benefit of humanity this book is the first comprehensive treatment of this topic Nicol grounds his consideration in the available scientific research and in dialogue with a broad range of thinkers in the fields of consciousness studies transpersonal theory and New Paradigm thought *The Psychology of Environmental Problems* Deborah Du Nann Winter, Susan M. Koger, 2004 This work applies psychological theory and research to environmental problems After outlining environmental difficulties it shows how principles from the major areas of psychology can be applied to selected environmental problems *Hot Equations* Jesse S. Cohn, 2024-04-23 Inspired by the new diversity of science fiction fantasy and horror in the twenty first century Hot Equations Science Fantasy and the Radical Imagination on a Troubled Planet confronts the kinds of literary and political realism that continue to suppress the radical imagination Alluding both to the ongoing climate catastrophe and to Tom Godwin's The Cold Equations that famous touchstone of hard

science fiction *Hot Equations* reads the crises of our post normal moment via works that increasingly subvert genre containment and spill out into the public sphere Drawing on archives and contemporary theory author Jesse S Cohn argues that these imaginative works of science fiction fantasy and horror strike at the very foundations of modernity calling its basic assumptions into question They threaten the modern order with a simultaneously terrible and promising anarchy pointing to ways beyond the present medical ecological and political crises of pandemic climate change and rising global fascism Examining books ranging from well known titles like *The Hunger Games* and *The Caves of Steel* to newer works such as *Under the Pendulum Sun* and *The Stone Sky* Cohn investigates the ways in which science fiction fantasy and horror address contemporary politics social issues and more The cold equations that established normal life in the modern world may be in shambles Cohn suggests but a New Black Fantastic makes it possible for the radical imagination to glimpse viable possibilities on the other side of crisis
