*An Anthology of Migration and Social Transformation* Anna Amelina, Kenneth Horvath, Bruno Meeus, 2015-12-01 The contributions of this book examine contemporary dynamics of migration and mobility in the context of the general societal transformations that have taken place in Europe over the past few decades The book will help readers to better understand the manifold ways in which migration trends in the region are linked to changing political economic constellations orders of power and inequality and political discourses It begins with an introduction to a number of theoretical approaches that address the nexus between migration and general societal shifts including processes of supranationalisation EU enlargement postsocialist transformations and rescaling It then provides a comprehensive overview of the political regulation of migration through border control and immigration policies The contributions that follow detail the dynamic changes of individual migration patterns and their implications for the agency of mobile individuals The final part challenges the reader to consider how policies and practices of migration are linked to symbolic struggles over belonging and rights describing a wide range of expressions of such conflicts from cosmopolitanism to racism and xenophobia This book is aimed at researchers in various fields of the social sciences and can be used as course reading for undergraduate graduate and postgraduate courses in the areas of international migration transnational and European studies It will be a beneficial resource for scholars looking for material on the most current conceptual tools for analysis of the nexus of migration and societal transformation in Europe

**Rethinking Refugees** Peter Nyers, 2013-11-15 *Rethinking Refugees Beyond State of Emergency* examines the ways in which refugees have been made objects of the complex discourse practices and strategies of humanitarianism making visible the link between our knowledge of refugees and questions about the changing status of political power space and identity The author draws upon post structural analytical tools to develop a critique of humanitarianism and to sketch a bio political framework for understanding the relationship between the humanity of refugees and their capacity or lack thereof for political voice and action *Rethinking Refugees* is a radically fresh approach to understanding refugees their movements and their place within an increasingly globalized international politics

*Undocumented Immigrants in an Era of Arbitrary Law* Robert Barsky, 2015-08-11 This book describes the experiences of undocumented migrants all around the world bringing to life the challenges they face from the moment they consider leaving their country of origin until the time they are deported back to it Drawing on a broad array of academic studies including law interpretation and translation studies border studies human rights communication critical discourse analysis and sociology Robert Barsky argues that the arrays of actions that are taken against undocumented migrants are often arbitrary and exercised by an array of officials who can and do exercise considerable discretion both positive and negative Employing insights from a decade long research project Barsky also finds that every stop along the migrant's pathway into and inside of the host country is strewn with language issues relating to intercultural communication interpretation gossip hearsay and the challenges of peddling of linguistic wares in the social

discourse marketplace These language issues are almost always impediments to anodyne or productive interactions with host country officials particularly on the front lines where migrants encounter border patrol and law enforcement officers without adequate means of communicating their situation or understanding their rights Since undocumented people are categorized as illegal they can be subjected to abuse and exploitation by host country officials who can choose to either tolerate or punish them on the basis of unpredictable changeable and even illusory or arbitrary laws and regulations Citing experts at every level of the undocumented immigrant apparatuses worldwide from public defenders to interpreters Barsky concludes that the only viable policy to address prevailing abuses and inequalities is to move towards open borders an approach that would address prevailing issues and surprisingly provide security and economic benefits to both host and home countries **Close**

*Renegotiating Community* William D. Coleman, Diana Brydon, 2009-01-01 Both as a concept and a set of social relationships community is central to contemporary debates about globalization Faced with finding a livable response to globalization many communities are renegotiating their identities and functions and in some instances entirely new communities are being formed Yet there is no clear consensus on why community matters or on how globalization affects particular communities Renegotiating Community asks what happens to the autonomy of individuals and communities under the influence of globalization Original case studies

show how a range of communities are renegotiating the meanings of community and autonomy while living with and sometimes challenging the processes of globalization By addressing the coercive and comforting dimensions of community as well as the need to reconcile conflicting claims to autonomy this book redraws the conceptual maps through which community globalization and autonomy are understood *War Diaries* Elisa Dainese,Aleksandar Stanicic,2022-03-31 In recent decades the development of advanced weaponry systems and the instant flow of information have redefined the notion of urban warfare as a local phenomenon with global effects in an increasingly interconnected world The annihilation of Aleppo and the broadcasted demolitions of Palmyra demonstrate the accelerating politicization of the destruction process In this timely volume Elisa Dainese Aleksandar Stani i and a broad range of contributors explore the weaponization of architecture targeted attacks on art and infrastructure meant to destroy not only physical structures but also political unity and cultural memory Focusing on regions where planners architects and artists are involved in concrete initiatives on the ground War Diaries looks at complex postwar settings to illuminate design responses to urban warfare and violence against the built environment The essays discuss creative strategies for rebuilding and restablizing damaged sites often within the context of continuing animosities the establishment of design coalitions to work with local communities on reconstruction the designing of emergency settlements the development of new and customized strategies for rebuilding diverse parts of the ravaged world and the teaching of culturally sensitive design practices to architects and urbanists among many other topics A much needed contribution to our understanding of postconflict design this volume maps the creative approaches that specialists have used to remediate the effects of violence against cities and cultural heritage **Outlaw Territories** Felicity D. Scott,2016-05-20 Outlaw Territories Environments of Insecurity Architectures of Counterinsurgency traces the relations of architecture and urbanism to forms of human unsettlement and territorial insecurity during the 1960s and 70s Investigating a set of responses to the growing urban unrest in the developed and developing worlds Outlaw Territories revisits an era when the discipline of architecture staked out a role in global environmental governance and the biopolitical management of populations Felicity D Scott demonstrates how architecture engaged the displacement of persons brought on by migration urbanization environmental catastrophe and warfare and at the same time how it responded to the material environmental psychological and geopolitical transformations brought on by postindustrial technologies and neoliberal capitalism after World War II At the height of the US led war in Vietnam and Cambodia and ongoing decolonization struggles in many parts of the world architecture not only emerged as a target of political agitation on account of its inherent normativity but also became heavily imbricated within military legal and humanitarian apparatuses and scientific and technological research dedicated to questions of international management and security Once architecture became aligned with a global matrix of forces concerned with the environment economic development migration genocide and war its conventional role did not remain unchallenged but shifted at times toward providing strategic expertise for institutions responding to transformations

born of neoliberal capitalism *Outlaw Territories* interrogates this nexus and questions how and to what ends architecture and the environment came to be intimately connected to the expanded exercise of power within shifting geopolitical frameworks of this time

**Mass Migration in the World-system** Terry-Ann Jones, Eric Mielants, 2015-11-17 *Mass Migration in the World System* brings to light the multiple experiences of migrants across different zones of the world economy By engaging wide ranging ideas and theoretical viewpoints of the migration process the labor market for immigrants and the rights of migrants this book provides an important and much needed interdisciplinary perspective on the issues of mass migration

**Acts of Citizenship** Engin F. Isin, Greg M. Nielsen, 2013-04-04 This book introduces the concept of act of citizenship and in doing so re orients the study of what it means to be a citizen Isin and Nielsen show that an act of citizenship is the event through which subjects constitute themselves as citizens They claim that such an act involves both responsibility and answerability but is ultimately irreducible to either This study of citizenship is truly interdisciplinary drawing not only on new developments in politics sociology geography and anthropology but also on psychoanalysis philosophy and history Ranging from Antigone and Socrates in the ancient world to checkpoints euthanasia and flash mobs in the modern one the acts and chapters here build up a dynamic and wide ranging picture *Acts of Citizenship* provides important new insights for all those concerned with the relationship between individuals groups and polities

**Transnationalism, Activism, Art** Kit Dobson, Aine McGlynn, 2011-12-30 Banksy is known worldwide for his politically subversive works of art but he is far from the only artist whose creations are infused with internationally relevant activist themes How else can the arts help activate citizen participation in social justice movements Moreover what is the role of culture in a globalizing world *Transnationalism Activism Art* goes beyond Banksy by investigating how the three complementary political social and cultural phenomena listed in the title interact in the twenty first century Renowned and emerging critics use current theory on cultural production and politics to illuminate case studies of various media including film literature visual art and performance in their multiple manifestations from electronic dance music to Wikileaks to bestselling poetry collections By addressing how these artistic media are used to enact citizen participation in social justice movements the volume makes important connections between such participation and scholarly study of globalization and transnationalism

*Architectures of Emergency in Turkey* Eray Çaylı, Pinar Aykac, Sevcin Ercan, 2021-10-21 Challenging existing political analyses of the state of emergency in Turkey this volume argues that such states are not merely predetermined by policy and legislation but are produced regulated distributed and contested through the built environment in both embodied and symbolic ways Contributors use empirical critical spatial research carried out in Turkey over the past

decade exploring heritage displacement and catastrophes Contributing to the broader literature on the related concepts of exception risk crisis and uncertainty the book discusses the ways in which these phenomena shape and are shaped by the built environment and provides context specific empirical substance to it by focusing on contemporary Turkey In so doing it offers nuanced insight into the debate around emergency as well as into recent urban architectural affairs in Turkey

Revisiting Nationalism NA NA,2016-05-24 This book gathers together French language authors who in the last decade have played a part in the renewal of interest in the question of nationalism This volume organized along thematic lines and with a genuine transversal approach seeks to give audiences a glimpse of some of that research whether related to theoretical normative or analytical questions      **A Time for the Province** George Z. Gasyna,2025-04-15 Within discourses on Polish provincial or marginal literature the eastern borderlands are a richly symbolic region that inspires much fascination and study Through close readings surveys and analyses of transborder narratives by seven modern writers who hailed from the Polish borderlands or set their works there A Time for the Province demonstrates how the region has come to represent a palimpsest of cultural identities and myths as each new generation unearths and rediscovers them George Gasyna explores and theorizes the province as a space of grand utopian visions and dystopic gestures about both the Polish past and a Polish future Offering a novel literary and cultural history of modern Polish writing he paves the way toward productive new modes of conceptualizing the cultural and literary forms that have come from Central Europe over the last century challenging many basic assumptions about what this literature can offer its readership in Poland and around the world Through engagement with the theoretical apparatuses of postmemory studies and border studies A Time for the Province redefines Polish cultural identity in the current moment of postsocialist transition and globalized citizenship      **Labor Movement** Harald Bauder,2006-02-23 In Labor Movement Bauder attacks the conventional view of international migration as a function of spatial economic inequalities and shows that social cultural legal and institutional processes rather than the invisible hand of the market shape migration patterns and labor market outcomes In empirical case studies from North America and Europe Bauder applies his theoretical ideas to a variety of geographical contexts The studies illustrate how different legal social and cultural strategies towards international migrants are deployed and coordinated and how this complex web of regulatory labor market processes relates to international migration Bauder also integrates social cultural and economic forms of capital and includes citizenship as a form of cultural or institutional capital for migrants a welcome and novel contribution to social scientists methods of examining immigration and labor markets
