**Media and Power in Modern Iran** Emily L. Blout, 2023-01-26 Successive Iranian leaders have struggled to navigate the fraught political cultural space of media in the Islamic Republic skirting the line between embracing Western communications technologies and rejecting them between condemning social networking sites as foreign treachery and promoting themselves on Facebook How does a regime that originally derived its hegemony from the ability to mass communicate its ideology protect its ideological dominance in a media environment defined by hybridity hyper connectivity and near constant change More broadly what is the role of media in the construction and maintenance of power in Iran This book addresses these questions by examining the institutions policies and discourses of two political regimes over the course of nearly eight decades Drawing from over 3 000 primary source documents and digital artifacts in Persian and English including formerly classified material hidden deep in the archives this book offers a history of media in Iran across political regimes and media paradigms from the public s first encounter with mass communication in the 1940s to the dawn of digital media in the 1990s to internet and mobile telephony today At the same time the book trains a keen eye on contemporary politics With foundations in sociology and political science Media and Power in Modern Iran offers trenchant insight into the present ruling establishment a political regime born from what has become known as the first televised revolution

which Prof Klemens Joos makes the variables of successful interest representation even more tangible on the basis of his scientific formula at the latest since the Treaty of Lisbon the basic prerequisite for successful interest representation in the EU involves the continuous and close intermeshing of the affected party's content competence of the four classic instruments of interest representation corporate representative offices associations public affairs agencies law firms with process structure competence i.e. the EU wide maintenance of the required spatial personnel and organisational capacities as well as strong networks across institutions political groups and member states on the part of an independent intermediary The likelihood of success can be increased exponentially if success is achieved firstly in committing to the concern of an affected party through a change of perspective such that the positive effects on the common good are shifted into the foreground for the decision makers in the EU perspective change competence and secondly in successfully integrating the concern into the crucial decision making processes at the political level and continuously supporting it process support competence Guest authors This work includes guest contributions from Prof Christian Blumhuber Berlin University of the Arts Prof Anton Meyer formerly LMU Munich Prof Armin Nassehi LMU Munich and Prof Franz Waldenberger Director of the German Institute of Japanese Studies Tokyo as well as a foreword by Prof Gunther Friedl Dean of the TUM School of Management and a preface by Prof Thomas F Hofmann President of TU Munich

*'The People' vs. the Liberal International Order?*  
Cédric M. Koch, 2024-11-06 Why since the 1980s did populists rise across liberal democracies And given that they challenge democracies and the liberal international order LIO in radical but diverse ways which variety of populism gains under which conditions Rather than emphasising populists as a cause of the crises of liberal order The People vs the Liberal International Order argues that the historical empowerment of liberal international institutions itself gradually undermined democratic legitimacy perceptions among citizens and thereby boosted varieties of populism Moving beyond theoretical accounts and bridging comparative politics and international relations Koch presents comparative evidence from survey data party manifestos societal data and international institutional power across 37 democracies between 1980 and 2019 and uses both statistical analyses and a comparative case study of eight states in the EU to support his claims Accounting for existing economic cultural domestic political and supply side explanations the author shows that normative evaluations relating to international institutions have contributed to gains for populist challengers across the spectrum in recent decades Yet the forces which push voters to populists and party competition itself together structurally benefit the populist radical right compared to populism's more inclusionary version on the radical left Populism by itself he argues therefore seems unable to form a cosmopolitan democratic corrective in the new international politics of democratic legitimacy where alternative institutional trajectories now compete for citizen acceptance Koch argues that for democrats and internationalists to still contain populist forces rather than merely defending the LIO against barbarians at the gate more self critical reform enabling policy change and democratisation of liberal international institutions is needed to address the part of their success
