Social Reconstruction Through Education The Philosophy History And Curricula Of A Radical Idea:

Social Reconstruction Through Education Michael E. James, 1995 This volume on the history and philosophy of social reconstruction is the result of Kenneth Benne's discussions, essays and experiences but also includes contributions from other scholars. Each of the essays study the movement as a way of grappling with the critical issue of the relationship between education and social change and each chapter intends to stimulate, broaden and enrich the legacy of what contributing author James Giarelli calls a public philosophy of education. The volume also connects past to present thus bringing the reader fresh insight into the dilemmas facing schooling in the 1990s.

Handbook of Research in the Social Foundations of Education Steven Tozer, Bernardo P. Gallegos, Annette Henry, Mary Bushnell Greiner, Paula Groves Price, 2011-07-05 Parts one and two of this volume present the theoretical lenses used to study the social contexts of education. These include long established foundations disciplines such as sociology of education and philosophy of education as well as newer theoretical perspectives such as critical race theory, feminist educational theory and cultural studies in education. Parts three, four and five demonstrate how these theoretical lenses are used to examine such phenomena as globalization, media, popular culture, technology, youth culture and schooling. This groundbreaking volume helps readers understand the history, evolution and significance of this wide ranging, often misunderstood and increasingly important field of study. This book is appropriate as a reference volume not only for scholars in the social foundations of education but also for scholars interested in the cultural contexts of teaching and learning, formal and informal. It is also appropriate as a textbook for graduate level courses in Social Foundations of Education, School and Society, Educational Policy Studies, Cultural Studies in Education and Curriculum and Instruction.

Educating About Social Issues in the 20th and 21st Centuries Vol 1 Samuel Totten, Jon Pedersen, 2012-04-01 Educating About Social Issues in the 20th and 21st Centuries: A Critical Annotated Bibliography is comprised of critical essays accompanied by annotated bibliographies on a host of programs, models, strategies and concerns vis-à-vis teaching and learning about social issues facing society. The primary goal of the book is to provide undergraduate and graduate students in the field of education, professors of education and teachers with a valuable resource as they engage in research and practice in relation to teaching about social issues. In the introductory essays, authors present an overview of their respective topics, e.g., The Hunt-Metcalf Model, Science Technology, Science, Genocide, Education. In doing so, they address among other concerns the following: key theories, goals, objectives and the research base. Many also provide a set of recommendations for adapting and/or strengthening a particular model, program or the study of a specific social issue. In the annotated bibliographies accompanying the essays, authors include those works that are considered classics and foundational. They also include research and practice oriented articles. Due to space constraints, the annotated bibliographies generally offer a mere sampling of what is available on each approach, program, model or concern. The book is composed of twenty-two chapters and addresses an eclectic array of topics including

but not limited to the following the history of teaching and learning about social issues George S Counts and social issues propaganda analysis Harold Rugg s textbook program Hunt and Metcalf s Reflective Thinking and Social Understanding Model Donald Oliver James Shaver and Fred Newmann s Public Issues Model Massialas and Cox Inquiry Model the Engle Ochoa Decisionmaking Model human rights education Holocaust education education for sustainability economic education global education multicultural education James Beane s middle level education integrated curriculum model Science Technology Society STS addressing social issues in the English classroom genocide education interdisciplinary approaches to incorporating social issues into the curriculum critical pedagogy academic freedom and teacher education

The Social Frontier Eugene F. Provenzo, 2011 The Social Frontier is the most interesting and important educational journal to emerge from the Great Depression First published in 1934 by a group of scholars at Teachers College Columbia University that included George Counts and William Heard Kilpatrick the magazine represented a conscious act of social and political reconstruction With a strong collectivist orientation the magazine was widely misperceived as communist in its approach In fact its editorial position called for a greater social role for teachers and a more just and equitable system of schooling The magazine which was published for a total of nine years included articles by major educational and social thinkers of the period from John Dewey to Robert Hutchins and Harold Rugg Within months of the magazine s first issue it came under attack by right wing political groups particularly the Hurst newspaper chain The Social Frontier A Critical Reader provides a selection of the most interesting and historically important articles from the magazine with a comprehensive introduction and critical commentaries on the selected articles which are as timely today as they were when first published seventy five years ago

Evans, 2007-07-01 This long awaited biography of Harold Rugg is a dramatic and compelling story with profound implications for today s educators Harold Rugg one of the leading progressive educators of the 20th century developed an innovative social studies program and textbook series that was censured by conservative critics during the 1940s Read the full story behind Rugg the man and the educator and the critics who attacked him Harold O Rugg was professor at Teachers College Columbia University and a key leader among the social frontier group that emerged in the 1930s to argue that schools should play a stronger role in helping to reconstruct society He was author of a best selling social studies textbook series that came under attack from patriotic and business groups in the early years of World War II The story of his rise and fall encapsulates a pivotal episode in the history of American education and reveals a great deal about the direction of schooling in American life the many roads not taken and possibilities for the future This in depth examination of Rugg s life and career provides historical perspective on the recurring struggles over education It will be of interest to every citizen concerned about the future of our democracy Includes more than 60 photos and graphics

Parental Involvement and Academic Success , *Whitaker's Books in Print* , 1998 **The Politics of Race and Schooling** Thomas V. O'Brien, 1999-06-10 Access to fair and free public education is one of the cornerstones of American democracy Yet in many parts of the country this ideal has only been realized in the twentieth century As Thomas O'Brien argues access to education in the state of Georgia has historically been restricted along the lines of race class and region Black poor and rural students fared extremely poorly in the Jim Crow era Georgia public school system as politically powerful groups fought to maintain a two tier educational structure that favored their own children over those from the disadvantaged voiceless majority O'Brien shows that even after 1961 when opponents of segregation managed to open the doors of Atlanta s

top public schools to minority students the vast majority of Georgia's public schoolchildren continued to receive barely adequate or substandard education at the hands of local and state authorities This is an important and timely contribution to an ongoing debate about the shamefully uneven quality of public education in this country the historic roots of the problem and the difficulties standing in the way of reform Research in Education ,1974 **Resources in Education** ,1998

Journal of South Asian and Middle Eastern Studies ,2003 *Social Reconstruction Learning* Jennifer Bleazby,2013 This volume argues that educational problems have their basis in an ideology of binary opposites often referred to as dualism which is deeply embedded in all aspects of Western society and philosophy and that it is partly because mainstream schooling incorporates dualism that it is unable to facilitate the thinking skills dispositions and understandings necessary for autonomy democratic citizenship and leading a meaningful life Drawing on the philosophy of John Dewey feminist pragmatism Matthew Lipman's Philosophy for Children program and the service learning movement Bleazby proposes an approach to schooling termed social reconstruction learning in which students engage in philosophical inquiries with members of their community in order to reconstruct real social problems arguing that this pedagogy can better facilitate independent thinking imaginativeness emotional intelligence autonomy and active citizenship **America, History and Life** ,2001 Provides historical coverage of the United States and Canada from prehistory to the present Includes information abstracted from over 2 000 journals published worldwide *The Journal of the National Education Association* National Education Association of the United States,1929 Journal of the National Education Association ,1929
