household has become a significant dimension for older people. Due to changes in social culture and personal living arrangements, the role of the household in providing older people with a better later life is reducing rapidly. Therefore, this book takes older Germans as the typical group and analyses their life satisfaction from the perspective of the household-related life domain. With a series of quantitative statistics, some of the findings are outside expectations. This book, with its interesting findings, is a worthy read for scholars and college students in relevant fields. Besides, this book may also be attractive for older people who are concerned about their own later life. **Lifespan Development** Tara L.
