Social Organization Of The Western Puebl:

Social Organization of the Western Pueblos Fred Eggan, In this first comprehensive account of the social organization of the western Pueblo tribes Fred Eggan compares and analyzes the social structures of all of the western Pueblo tribes and provides an interpretation of their historical development and their relations with the eastern Pueblos and other groups Professor Eggan is primarily concerned with the nature and functions of the social organization in the various tribes and the possibility of explaining the variations among them in historical and comparative terms Back cover

Western Pueblo Identities Andrew I. Duff, 2016-12-15 Identifying distinct social groups of the past has always challenged archaeologists because understanding how people perceived their identity is critical to the reconstruction of social organization Material culture has been the standard measure of distinction between groups and the distribution of ceramics and other artifacts has often been used to define group boundaries *Western Pueblo Identities* argues that such an approach is not always appropriate demographic and historical factors may affect the extent to which material evidence can define such boundaries Andrew Duff now examines a number of other factors relationships among settlement size regional population densities the homogeneity of material culture and local and long distance exchange in order to trace the history of interaction and the formation of group identity in east central Arizona and west central New Mexico from A D 1275 to 1400 Using comparative data from the Upper Little Colorado and Zuni regions Duff demonstrates differences in patterns of interaction within and between regions with different population densities He then links these differences to such factors as occupational history immigrant populations the negotiation of social identities and the emergence of new ritual systems Following abandonments in the Four Corners area in the late 1200s immigrants with different historical backgrounds occupied many Western Pueblo regions in contrast to the Hopi and Zuni regions which had more stable populations and deeper historical roots Duff uses chemical analyses of ceramics to document exchange among several communities within these regions showing that people in less densely settled regions were actively recruited by residents of the Hopi and Zuni regions to join their settlements By the time of the arrival of the Spaniards two distinct social and territorial groups the Hopi and Zuni peoples had emerged from this scattering of communities Duff's new interpretations along with new data on ceramic exchange patterns suggest that interaction is a better way to measure identity than more commonly used criteria His work offers new perspectives on the role of ritual in social organization and on identity formation in Pueblo IV society and is rich in implications for the study of other sedentary middle range societies **Puebloan Societies** Peter M.

Whiteley, 2018-10-15 Puebloan sociocultural formations of the past and present are the subject of the essays collected here The contributors draw upon the insights of archaeology ethnology and linguistic anthropology to examine social history and practice including kinship groups ritual sodalities architectural forms economic exchange environmental adaptation and political order as well as their patterns of transmission over time and space The result is a window onto how major Puebloan

societies came to be and how they have changed over time As an interdisciplinary conjunction Puebloan Societies demonstrates the value of reengagement among anthropological subfields too often isolated from one another The volume is an analytical whole greater than the sum of its parts a new synthesis in this fascinating region of human cultural history

Gregory, David R. Wilcox, 2015-11-01 A Choice Outstanding Academic Title The Zuni are a Southwestern people whose origins have long intrigued anthropologists This volume presents fresh approaches to that question from both anthropological and traditional perspectives exploring the origins of the tribe and the influences that have affected their way of life Utilizing macro regional approaches it brings together many decades of research in the Zuni and Mogollon areas incorporating archaeological evidence environmental data and linguistic analyses to propose new links among early Southwestern peoples The findings reported here postulate the differentiation of the Zuni language at least 7 000 to 8 000 years ago following the initial peopling of the hemisphere and both formulate and test the hypothesis that many Mogollon populations were Zunian speakers Some of the contributions situate Zuni within the developmental context of Southwestern societies from Paleoindian to Mogollon Others test the Mogollon Zuni hypothesis by searching for contrasts between these and neighboring peoples and tracing these contrasts through macro regional analyses of environments sites pottery basketry and rock art Several studies of late prehistoric and protohistoric settlement systems in the Zuni area then express more cautious views on the Mogollon connection and present insights from Zuni traditional history and cultural geography Two internationally known scholars then critique the essays and the editors present a new research design for pursuing the question of Zuni origins By taking

stock and synthesizing what is currently known about the origins of the Zuni language and the development of modern Zuni culture Zuni Origins is the only volume to address this subject with such a breadth of data and interpretations It will prove invaluable to archaeologists working throughout the North American Southwest as well as to others struggling with issues of ethnicity migration incipient agriculture and linguistic origins **Archeology in Cultural Systems** Lewis R.

Binford,2017-07-05 Archeology shares with other anthropological sciences the goal of explaining differences and similarities among cultural systems Sally R Binford and Lewis R Binford therefore are concerned with theory and arguments which treat problems of the interrelationship of cultural variables with explanatory value Archeology in Cultural Systems is devoted to four different aspects of archeology This book progresses from theoretical methodological discussions to specific consideration of archeological materials It focuses on the analysis of archeological remains from a single site Its concern is primarily with recognizing measuring and explaining variability in the form and distribution of a site s cultural remains The authors argue that internal variability derives from the composition and distribution of societal segments represented at the site The work then shifts to study of archeological components or their attributes and seeks explanations for observed differences and similarities A final section of the volume comments and discusses materials in the volume Archeology in Cultural Systems is not a monolithic presentation of any particular school of archeological thought There are common interests and many points of agreement among the authors but there is also diversity of opinion on several points These points are the focus of research here *When Jesus Came, the Corn Mothers Went Away* Ramón A. Gutiérrez,1991 The author uses marriage to examine the social history of New Mexico between 1500 and 1846 *Process and Pattern in Culture* Robert Alan Manners,Julian Haynes Steward, This festschrift commemorates Julian H Steward The essays were contributed by former students colleagues and other anthropologists whose research or thinking has been influenced by him There was no preconceived attempt to give the volume any greater sense of unity or to impose upon the contributors any restrictions as to subject matter On the contrary each author was urged to write on an anthropological topic of greatest current interest to himself Many of the essays could be placed just as handily within a division other than the one to which they have arbitrarily been assigned in the book This kind of interchangeability may reflect in some measure the interrelatedness of Steward s contributions to anthropological theory The broad relevance of all the selections to Steward s work could reflect also the extent to which his interests continue to be reflected in the work of anthropologists influenced by him It could also reflect a parallelism of theoretical concerns within the profession that stem from the cultural ambience that produced Steward himself Parallelisms and convergence are aspects of the kind of cultural determinism which has claimed Steward s attention during the many years that he fought a fairly lonely battle to establish the respectability of evolutionism in anthropology Now that respectability has been achieved with an almost bandwagon fervor it is clear that Steward as much as anyone else in anthropology was responsible for the change The essays in this collection are at once a vindication of his

patience an evidence of the high status he enjoys among anthropologists and a testimony to the impact of his unusual creativity on his colleagues **Religion at Work in a Neolithic Society** Ian Hodder, 2014-02-10 A unique collaboration between archaeologists and a range of specialists in ritual and religion looking at the role of religion in early human societies
