Territories of Social Responsibility Patricia Almeida Ashley, 2016-03-09 CSR is a fragile concept if conceived only at the organizational level or driven only by leadership will Many writers deal with aspects of social responsibility but most deal with it as this kind of organizational and voluntary initiative Few address the wider policy agenda The contributors to Territories of Social Responsibility researchers and practitioners from four continents all participated in an international workshop co ordinated by Patricia Almeida Ashley as part of her role as Chair in Development and Equity at the International Institute of Social Studies They form a policy network contributing to studies on the concept of a multi actor multilevel and territorial approach to social responsibility and governance oriented towards global regional or local development and equity goals This book introduces a new conceptual framework and promotes a research and policy agenda relating to it A new model sees CSR embedded in institutional and legal frameworks communicated and understood through a vector of communication and knowledge influencing situated culture and social values and classified into three levels of ethical challenges All of this can be expressed into the social processes of education governance the development of civil society and

policy making a renovation of the existing perspectives on the concept of social responsibility This ground breaking book integrates conceptual and empirical contributions and opens a research and policy agenda for the future It will appeal to academics higher level students policy makers and to leaders of and advisors to organizations affected by social

Changing Social Norms to Universalize Girls' Education in East Africa Auma Okwany ,Rekha Wazir,2016-12-20 The educational experience reproduces gender ideologies and social norms which interact with schooling for girls in very particular ways and are implicated in their persistent gendered exclusion and marginalization The authors in this volume focus on this link by taking a social norms approach to profile the processes strategies of and research on community led

interventions The chapters are paced around a pilot project that critically adapted a successful model in India to develop context appropriate integrated approaches to universalizing secondary education for girls in purposively selected rural and urban poor contexts in Kenya and Uganda The analyses provide reflexive documentation of the successes and challenges of project implementation activities that have successfully contested girls exclusion and marginalization in education This requires a sustained focus on the link between social and educational institutions and policies and working in an integrated manner with a range of policy actors including young people and targeted communities to bring about significant and sustainable change

Social Work Practice in Africa M. Twikirize, Helmut Spitzer, 2019-01-10 The importance of integrating indigenous knowledge systems into mainstream social work and ensuring context specific culturally relevant practice has long been emphasised in Africa and the Global South This book based on empirical research presents a selection of indigenous and innovative models and approaches of problem solving that will inspire social work practice and education At the core of these models lies a conceptual understanding of the community as the overarching principle for effective social work and social development in African contexts The empirical part of the book has a focus on East Africa and highlights case examples from Rwanda Tanzania Uganda Burundi and Kenya The book is intended for use by those involved in social work and social development practice social work educators students as well as policy makers It is relevant not just for audiences in Africa but also the global social work community especially those interested in promoting culturally relevant social work

Decentralization, Local Governance, and Social Wellbeing in India Rani Mullen, 2017-05-18 Over the past three decades decentralization has been seen as the means for allowing local governments to become more accountable and for encouraging the deepening of democracy and the building of village communities By drawing on original village level case studies of six villages in three different Indian states this book presents a systematic analysis of the impact of decentralization on the delivery of social services at the local level within India Supplementing national and state level data and analyzing the different historical legacies in each state the book argues that decentralization is not simply a function of the structure of the decentralization program or of the relationship between higher tiered and local government Rather the possibility of decentralization affecting social outcomes depends on several interacting factors including the distribution of power among local elites the dynamics of political competition and the level of civil society mobilization By examining constitutionally mandated political decentralization across India this book identifies the circumstances under which local government structures can lead to improved social services and societal wellbeing as well as presenting a substantial contribution to studies on South Asian Politics and Local Government

International Cooperation, Competition Authorities and Transnational Networks Mateusz Błachucki, 2023-11-30 This book presents a comprehensive study of the emergence functioning and evolution of international cooperation among competition authorities It presents an in depth look at network cooperation taking place within international organisations as well as networks based on binding international

agreements and various informal networks among others It further identifies and analyses the forms of international cooperation among national competition authorities NCAs that are taking place within transnational competition networks The book classifies these forms of cooperation by grouping them into three stages soft developed and enhanced cooperation discussing each in detail It thus reflects the evolution of the international cooperation process and provides insights as to its possible development This work will be of interest to researchers academics and advanced students in the fields of competition law public administration international relations and those interested in international competition law and its contribution to global public governance

Transatlantic Space Politics Sheng-Chih Wang, 2013-05-29 This book examines transatlantic politics through an analysis of 60 years of US European strategic interaction in space The significance of space politics for the study of transatlantic relations receives surprisingly little scholarly attention As a theatre of interaction transatlantic space politics reflects the vicissitudes of European and US power in the international system An understanding of space politics is therefore vital in understanding the status and prospect of the transatlantic order Using established IR theories the author investigates transatlantic space politics and proposes a theoretical explanation which is distinct from the conventional wisdom of the transatlantic security community More specifically he distinguishes between the constitutive and regulatory effects of the transatlantic security community an approach rarely employed in other research in the field Overall this book suggests not only that the transatlantic institutional pillar requires repair but also that the ideational factors need to be revitalised in order to consolidate the transatlantic alliance This book will be of much interest to students of space power transatlantic politics strategic studies foreign policy and IR security studies in general

Fine,2024-12-02 Drawing upon comprehensive research across five countries including case studies of housing water and health comprehensive theoretical and empirical accounts are offered of the impact of financialisation on economic and social reproduction alongside the corresponding material cultures of neoliberalism Economic is understood as embedded within social reproduction with neoliberalism as the current stage of capitalism fundamentally underpinned by but not reducible to the financialisation of everyday life Considerable emphasis is placed upon the variegated outcomes attached to the neoliberalisation of social reproduction as highlighted by the comparative study of economic and social provisioning across different countries and sectors *Local Knowledge, Global Stage* Frederic W. Gleach,Regna Darnell,2016-10 The Histories of Anthropology Annual presents localized perspectives on the discipline s history within a global context with a goal of increasing awareness and use of historical approaches in teaching learning and conducting anthropology This tenth volume of the series Local Knowledge Global Stage examines worldwide historical trends of anthropology ranging from the assertion that all British anthropology is a study of the Old Testament to the discovery of the untranslated shorthand notes of pioneering anthropologist Franz Boas Other topics include archival research into the study of Vancouver Island s indigenous languages explorations of the Christian notion of virgin births in Edwin Sidney Hartland s The Legend of Perseus and the Canadian government s implementation of European model farms as a way to undermine Native culture In addition to Boas and Hartland the essays explore the research and personalities of Susan Golla Claude L vi Strauss and others **Social Quality** A. Walker,2011-12-15 This collection sets out the latest research on the concept of social quality developing its theoretical foundations and applying it to pressing policy issues such as the future of the European Union and sustainable global development **Journal of Small Business and Entrepreneurship** ,1996 **Understanding Family Change and Variation** Jennifer A. Johnson-Hanks,Christine A. Bachrach,S. Philip Morgan,Hans-Peter Kohler,2011-08-27 Fertility rates vary considerably across and within societies and over time Over the last three decades social demographers have made remarkable progress in documenting these axes of variation but theoretical models to explain family change and variation have lagged behind At the same time our sister disciplines from cultural anthropology to social psychology to cognitive science and beyond have made dramatic strides in understanding how social action works and how bodies brains cultural contexts and structural conditions are coordinated in that process Understanding Family Change and Variation Toward a Theory of Conjunctural Action argues that social demography must be reintegrated into the core of theory and research about the processes and mechanisms of social action and proposes a framework through which that reintegration can occur This framework posits that material and schematic structures profoundly shape the occurrence frequency and context of the vital events that constitute the object of social demography Fertility and family behaviors are best understood as a function not just of individual traits but of the structured contexts in which behavior occurs This approach upends many assumptions in social demography encouraging demographers to embrace the endogeneity of social life and to move beyond

fruitless debates of structure versus culture of agency versus structure or of biology versus society
