

CHAPTER 1: INTRODUCING SOCIAL PSYCHOLOGY

WHAT IS SOCIAL PSYCHOLOGY?	SOCIAL PSYCHOLOGY'S BIG IDEAS	SOCIAL PSYCHOLOGY AND HUMAN VALUES	IS SOCIAL PSYCHOLOGY SIMPLY COMMON SENSE?	RESEARCH METHODS: HOW WE DO SOCIAL PSYCHOLOGY
The scientific study of how people think about, influence, and relate and view to one another.	We Construct Our Social Reality: We humans have an irresistible urge to explain behavior, to attribute it to some cause, and therefore to make it seem orderly, predictable, and controllable	Obvious Ways Values Enter Psychology: Values enter the picture when social psychologists choose research topics. Values also influence the types of people who are attracted to various disciplines.	We constantly observe people thinking about, influencing, and relating to one another. It pays to discern what a facial expression predicts, how to get someone to do something, or whether to regard another as friend or foe.	To test a hypothesis, social psychologists may do research that predicts behavior using correlational studies, often conducted in natural settings. Or they may seek to explain behavior by conducting experiments that manipulate one or more factors under controlled conditions...
Social psychology focuses more on individuals and uses more experimentation; focuses less on individuals' differences and more on how individuals, in general, view and affect one another.	Some Big Ideas in Social Psychology: (Social thinking) 1. We construct our social reality 2. Our social intuitions are powerful, sometimes perilous 3. Attitudes shape, and are shaped by, behavior (Social influences) 4. Social influences shape behavior 5. Dispositions shape behavior (Social relations) 6. Social behavior is also biological behavior	Not-So-Obvious Ways Values Enter Psychology: THE SUBJECTIVE ASPECTS OF SCIENCE PSYCHOLOGICAL CONCEPTS CONTAIN HIDDEN VALUES	Hindsight bias: The tendency to exaggerate, after learning an outcome, one's ability to have foreseen how something turned out. Also known as the I-knew-it all-along phenomenon.	Forming and Testing Hypotheses a. Theory b. Hypotheses Correlational Research: Detecting Natural Associations a. Correlation and Causation b. Survey Research Experimental Research: Searching for Cause and Effect a. Control: Manipulating Variables b. Random Assignment:

Handbook of Justice Research in Law Joseph Sanders, V. Lee Hamilton, 2007-05-08 Justice a word of great simplicity and almost frightening scope When we were invited to edit a volume on justice in law we joked about the small topic we had been assigned Often humor masks fear and this was certainly one of those times Throughout the project we found daunting the task of covering even a fraction of the topics that usually fall under the umbrella of justice research in law Ultimately the organization of the book emerged from the writing of it Our introductory chapter provides a road map to how the topics weave together but as is so often the case it was written last not first It was only when we had chapters in hand that we began to see how the many strands of justice research might be woven together Chapters 2 4 on the basic forms of justice procedural retributive and distributive are the lynchpin of the volume they provide the building blocks that permit us to think and write about each of the other substantive and applied chapters in terms of how they relate to the fundamental forms of justice In the large central section of the volume Chapters 5 9 the contributors address many ways in which the justice dimensions relate to one another Most important for law is the relationship of perceptions of procedural justice and the two types of substantive justice retributive and distributive
