Social Science And Public Policy In U S:

Social Science Information and Public Policy Making , Robert Rich reports the results of the Continuous National Survey CNS an administrative experiment with a two year lifespan designed to facilitate the use of research data by public officials in federal agencies *Social Sciences and Modern States* Peter Wagner,1991-03-28 Modern social sciences have over the past forty years been committed to the improvement of public policy More recently however doubts have arisen about the possibility and desirability of a policy oriented social science In this book leading specialists in the field analyze both the development and failings of policy oriented social science In contrast to other writings on the subject this volume presents a distinctively historical and comparative approach By looking at earlier periods the contributors demonstrate how policy orientation has been central to the emergence and evolution of the social sciences as a form of professional activity Case studies of rarely examined societies such as Poland Brazil and Japan further demonstrate the various ways in which intellectual developments have been shaped by the societal contexts in which they have emerged and how they have taken part in the shaping of these societies Official Gazette of the United States Patent and Trademark Office ,2002

Social Inequality Kathryn Neckerman, 2004-06-18 Inequality in income earnings and wealth has risen dramatically in the United States over the past three decades Most research into this issue has focused on the causes global trade new technology and economic policy rather than the consequences of inequality In Social Inequality a group of the nation's leading social scientists opens a wide ranging inquiry into the social implications of rising

economic inequality Beginning with a critical evaluation of the existing research they assess whether the recent run up in economic inequality has been accompanied by rising inequality in social domains such as the quality of family and neighborhood life equal access to education and health care job satisfaction and political participation Marcia Meyers and colleagues find that many low income mothers cannot afford market based child care which contributes to inequality both at the present time by reducing maternal employment and family income and through the long term consequences of informal or low quality care on children s educational achievement At the other end of the educational spectrum Thomas Kane links the growing inequality in college attendance to rising tuition and cuts in financial aid Neil Fligstein and Taek Jin Shin show how both job security and job satisfaction have decreased for low wage workers compared with their higher paid counterparts Those who fall behind economically may also suffer diminished access to essential social resources like health care John Mullahy Stephanie Robert and Barbara Wolfe discuss why higher inequality may lead to poorer health wider inequality might mean increased stress related ailments for the poor and it might also be associated with public health care policies that favor the privileged On the political front Richard Freeman concludes that political participation has become more stratified as incomes have become more unequal Workers at the bottom of the income scale may simply be too hard pressed or too demoralized to care about political participation Social Inequality concludes with a comprehensive section on the methodological problems involved in disentangling the effects of inequality from other economic factors which will be of great benefit to future investigators While today s widening inequality may be a temporary episode the danger is that the current economic divisions may set in motion a self perpetuating cycle of social disadvantage The most comprehensive review of this quandary to date Social Inequality maps out a new agenda for research on inequality in America with important implications for public policy

A Strategy for Assessing Science National Research Council, Division of Behavioral and Social Sciences and Education, Center for Studies of Behavior and Development, Committee on Assessing Behavioral and Social Science Research on Aging, 2007-03-21 A Strategy for Assessing Science offers strategic advice on the perennial issue of assessing rates of progress in different scientific fields It considers available knowledge about how science makes progress and examines a range of decision making strategies for addressing key science policy concerns These include avoiding undue conservatism that may arise from the influence of established disciplines achieving rational high quality accountable and transparent decision processes and establishing an appropriate balance of influence between scientific communities and agency science managers A Strategy for Assessing Science identifies principles for setting priorities and specific

recommendations for the context of behavioral and social research on aging **Bulletin MLSA** University of Michigan. College of Literature, Science, and the Arts,2007 **The Social Sciences Go to Washington** Hamilton Cravens,2004 What happens when the allegedly value free social sciences enter the national political arena In *The Social Sciences Go to Washington* scholars examine the effects of the massive influx of sociologists demographers economists educators and others to the federal advisory process in the postwar period Essays look at how these social scientists sought to change existing policies in welfare public health urban policy national defense environmental policy and science and technology policy and the ways they tried to influence future policies Policymakers have been troubled that followers of postmodernism have questioned the legitimacy of scientific and political authority to speak for the desires of social groups As the social sciences increasingly become expressions of individual preferences the contributors ask how can they continue to be used to set public policy for us all This collection is a useful resource for anyone studying the relationship between science and the government in the postwar years **Bulletin of the Atomic Scientists** ,1968-06 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin s iconic Doomsday Clock stimulates solutions for a safer world [Handbook of Public Policy Analysis](#) Frank Fischer,Gerald J. Bryant,Dennis L. Peck,2007 Publisher Description [Whose Welfare?](#) Steven Michael Teles,1996 Few American social programs have been more unpopular controversial or costly than Aid to Families with Dependent Children AFDC Its

budget now in the tens of billions of dollars has become a prominent target for welfare reformers and outraged citizens. Indeed if public opinion ruled AFDC would be discarded entirely and replaced with employment. Yet it persists. Steven Teles's provocative study reveals why and tells us what we should do about it. Teles argues that over the last thirty years political debate on AFDC has been dominated by an impasse created by what he calls ideological dissensus: an enduring conflict between opposing cultural elites that have largely disregarded public opinion. Thus he contends one must examine the origins and persistence of elite conflict in order to fully comprehend AFDC's immunity to the reform it truly needs: the kind that unites the elements of order, equality, and individualism central to the American creed. One of the first studies to analyze AFDC from a New Democrat position, *Whose Welfare* sheds new light on the controversial role of the courts in AFDC, the rise of welfare waivers in the mid 1980s, the failure of the Clinton welfare plan, and the victory of block granting over policy-oriented welfare reform. Teles, however, goes beyond mere critical analysis to advocate specific approaches to reform. His thoughtful call for compromise built around the centrality of work, individual responsibility, and opportunity offers a means for dissolving dissensus and genuine hope for changing an outdated and ineffectual welfare system. Based on interviews with participants in the AFDC policymaking process, as well as an unparalleled synthesis of the voluminous AFDC literature, *Whose Welfare* will appeal to a wide array of welfare scholars, policymakers, and citizens eager to better understand the tumultuous history of this problematic program and how it might fare in the wake of the fall elections.

Public Health 101 Richard K. Riegelman, 2010 *Public Health 101* provides a big picture population perspective on the determinants of health and disease and the tools available to protect and promote health. It examines the full range of options for intervention including use of the health care system, the public health system, and society-wide interventions such as laws and taxation. Students will learn how public health affects them in their everyday lives. Using case studies, vignettes, and extensive examples, they will learn and apply frameworks for thinking about the issues of public health. They will gain a deeper understanding about the health news they hear, the web sites they visit, and the research they read.

The Social Sciences in the Asian Century Carol Johnson, Vera Mackie, Tessa Morris-Suzuki, 2015-09-30 In this collection of essays we reflect on what it means to practise the social sciences in the twenty-first century. The book brings together leading social scientists from the Asia-Pacific region. We argue for the benefit of dialogue between the diverse theories and methods of social sciences in the region, the role of the social sciences in addressing real-world problems, the need to transcend national boundaries in addressing regional problems, and the challenges for an increasingly globalised higher education sector in the twenty-first century. The chapters are a combination of theoretical reflections and locally focused case studies of processes that are embedded in global dynamics and the changing geopolitics of knowledge. In an increasingly connected world, these reflections will be of global relevance.

Core Concepts in Evaluation Lori A. Wingate, Ayesha S. Boyce, Lyssa Wilson Becho, Kelly N. Robertson, 2024-07-19 This unique book features original writings from evaluation's foundational thinkers together with new commentaries from

contemporary authors Each section includes an introduction to a core evaluation concept by the editors a classic reading two commentaries on that topic by contemporary authors and a reflection guide written by the editors
