## **Social Science Beyond Constructivism And Realism:**

**Social Science** Gerard Delanty, 1997 It is argued that the conception of social science emerging today is one that involves a synthesis of radical constructivism and critical realism The crucial challenge facing social science is a question of its public role growing reflexivity in society has implications for the social production of knowledge and is bringing into question the separation of expert systems from other forms of knowledge Social Science Delanty, Gerard, 2005-06-01 What is social science Does social scientific knowledge differ from other kinds of knowledge such as the natural sciences and common sense What is the relation between method and knowledge This concise and accessible book provides a critical discussion and comprehensive overview of the major philosophical debates on the methodological foundations of the social sciences From its origins in the sixteenth century when a new system of knowledge was created around the idea of modernity the author shows how the philosophy of social science developed as a reflection on some of the central questions in modernity Visions of modernity have been reflected in the self understanding of the social sciences From the positivist dispute on explanation vs understanding to controversies about standpoint to debates about constructivism and realism Delanty outlines the major shifts in the philosophy of social science He argues that social science is an intellectual framework for the transformation of the social world The new edition is updated and expanded throughout with the latest developments in the field including a new chapter on feminist standpoint epistemology and additional material on neo positivism pragmatism and reflexivity This is one of the most ambitious and wide ranging texts in recent years on debates on method and the contemporary situation of social science It is of interest to undergraduate students and postgraduates as well as to professional researchers with an interest in the philosophy of the social sciences and social theory **Handbook of Citizenship Studies** Engin F Isin, Bryan S Turner, 2002 The contributions of Woodiwiss Lister and Sassen are outstanding but not unrepresentative of the many merits of this excellent collection The British Journal of Sociology From women s rights civil rights and sexual rights for gays and lesbians to disability rights and language rights we have experienced in the past few decades a major trend in Western nation states towards new claims for inclusion This trend has echoed around the world from the Zapatistas to Chechen and Kurdish nationalists social and political movements are framing their struggles in the languages of rights and recognition and hence of citizenship Citizenship has thus become an increasingly important axis in the social sciences Social scientists have been rethinking the role of political agent or subject Not only are the rights and obligations of citizens being redefined but also what it means to be a citizen has become an issue of central concern As the process of globalization produces multiple diasporas we can expect increasingly complex relationships between homeland and host societies that will make the traditional idea of national citizenship problematic As societies are forced to manage cultural difference and associated tensions and conflict there will be changes in the processes by which states allocate citizenship and a differentiation of the category of citizen This book constitutes the most authoritative and comprehensive

guide to the terrain Drawing on a wealth of interdisciplinary knowledge and including some of the leading commentators of the day it is an essential guide to understanding modern citizenship About the editors Engin F Isin is Associate Professor of Social Science at York University His recent works include *Being Political* Genealogies of Citizenship Minnesota 2002 and with P K Wood *Citizenship and Identity* Sage 1999 He is the Managing Editor of *Citizenship Studies* Bryan S Turner is Professor of Sociology at the University of Cambridge He has written widely on the sociology of citizenship in *Citizenship and Capitalism* Unwin Hyman 1986 and *Citizenship and Social Theory* Sage 1993 He is also the author of *The Body and Society* Sage 1996 and *Classical Sociology* Sage 1999 and has been editor of *Citizenship Studies* since 1997

This salient reference grounds readers in the theoretical basis and day to day practice of community based health care programs and their potential as a transformative force in public health. Centering around concepts of self determination, empowerment, and inclusiveness, the book details the roles of physicians, research, and residents in the transition to self directed initiatives and greater community control. Community focused interventions and methods starting with genuine dialogue between practitioners and residents are discussed as keys to understanding local voice and worldview and recognizing residents as active participants and not simply targets of service delivery. And coverage pays careful attention to training issues including how clinicians can become involved in community based care without neglecting individual patient needs. Among the topics covered are Narrative medicine in the context of community based practice, Qualitative and participatory action research, Health committees as a community based strategy, Dialogue world entry and community based intervention, Politics of knowledge in community based work, Training physicians with communities. Dimensions of Community Based Projects in Health Care challenges sociologists, social workers, and public health administrators to look beyond traditional biomedical concepts of care and naturalistic methods of research and toward more democratic programs, planning, and policy. The partnerships described in these pages reflect a deep commitment to patients' lives and to the future of public health. *Political Analysis* Colin Hay, 2017-03-14. *Political Analysis* provides an accessible and engaging yet original introduction and distinctive contribution to the analysis of political structures, institutions, ideas, and behaviours, and above all to the political processes through which they are constantly made and remade. Following an innovative introduction to the main approaches and concepts in political analysis, the text focuses thematically on the key issues which currently concern and divide political analysts, including the boundaries of the political, the question of structure, agency, and power, the dynamics of political change, the relative significance of ideas and material factors, and the challenge posed by postmodernism, which the author argues the discipline can strengthen itself by addressing without allowing it to become a recipe for paralysis. **Climate Technology, Gender, and Justice** Tina Sikka, 2018-12-14. This book is the first to undertake a gendered analysis of geoengineering and alternative energy sources. Are either of these technologies sufficiently attendant to gender issues? Do they incorporate feminist values as articulated by the renowned social philosopher Helen Longino, such as empirical adequacy, novelty, heterogeneity, complexity, and applicability to human needs? The overarching argument in this book contends that while mitigation strategies like solar and wind energy go much further to meet feminist objectives and virtues, geoengineering is not consistent with the values of justice as articulated in Longino's feminist approach to science. This book provides a novel feminist argument in support of pursuing alternative energy in the place of

geoengineering It provides an invaluable contribution for academics and students working in the areas of gender science and climate change as well as policy makers interested in innovative ways of taking up climate change mitigation and gender
