Social Strategy & Corporate Structure Neil W. Chamberlain,2007-09-10 This new work by Neil W Chamberlain will be of great importance to the business community and to all those charged with defining the role large corporations play in the affairs of society Social Strategy and Corporate Structure is an objective indepth examination of the organizational requirements of a social role for large scale business The role Neil Chamberlain presents is one of heroic dimensions the political choice of goals the strategic allocation of resources and the tactical operations of the mechanisms of production While there has been much discussion of corporate social responsibility few have investigated the ways its structure will have to change if the corporation is to pursue a strategy that is both economic and social This timely book integrates a large number of issues involving corporate activities and governance that go directly to the heart of this problem In step by step detail Chamberlain analyzes the organizational imperatives of this new age of social responsibility the composition and functions of boards of directors and the relation of their duties to a broad system of national planning the internal social audit changes in the characteristics of corporate social planning and proposals for restructuring ultimate corporate authority either through public or outside directors In addition he examines the potential relevance of federal chartering of corporations and the effects of international economic interdependence on the development of a new corporate social strategy This book is not a detailed blueprint for change Rather it presents a thorough systematic study of available courses of action for improvement based on the principle that conventional notions of corporate independence will have to be modified for any social strategy to work And while not everyone will agree with Neil Chamberlain few can afford to ignore his provocative insights into what corporations must do

to function effectively in a changed social environment

Originally published in 1976 the authors of six of the most widely quoted works in behavioural science related to education at the time here describe in detail their research work including its origins planning and implementation The accounts are unusual not only for their technical detail but for their candour The brief was to put the heart and brains back into accounts of research so the authors comment not only on the research design but on the personal and professional problems they had to overcome They also reflect on the reception of their work and the way in which it has been adapted misunderstood or deliberately distorted to support arguments of widely differing ideological pressure groups The book shows how ingenuity and persistence as well as technical competence lie at the heart of the research process The authors do not give the normal depersonalised streamlined account which gives a false mechanical picture of research as an occupation but show it to be a profound personal and professional experience as they comment on the thought that lay behind their work and the way it was finally produced for publication Dr Shipman has written a short introduction to each chapter and contributed a concluding chapter relating the six research experiences to conventional views on the research process and to the part played by research evidence in policy making **The Eco-Social Polity?** Ekaterina Domorenok,Paolo Graziano,Katharina
