Society And Spirit A Trinitarian Cosmology

Philip Clayton

Society And Spirit A Trinitarian Cosmology:

Society and Spirit Joseph A. Bracken, 1991 Alfred North Whitehead's master work *Process and Reality* is intended to extend the cosmological vision of Whitehead in a new direction. By interpreting societies within Whitehead's scheme as structured fields of activity, the author projects a universe of hierarchically ordered fields of activity up to and including the all-compassing field of activity constituted by the Christian Trinity.

German Idealism's Trinitarian Legacy Dale M. Schlitt, 2016-10-20 Dale M. Schlitt presents a study of trinitarian thought as it was understood and debated by the German Idealists, broadly engaging Schelling's philosophical interpretations of Trinity as well as Hegel's and analyzing how these Idealist interpretations influenced later philosophers and theologians. Divided into different sections, one considers nineteenth-century central Europeans Philipp Marheineke, Isaak August Dorner, and Vladimir Sergeyevich Solovyov under the rubric testimonials. Another section studies twentieth-century Germans Karl Barth, Karl Rahner, and Wolfhart Pannenberg, who share family resemblances with the Idealists, and a third addresses the work of twentieth and twenty-first century Americans Robert W. Jenson, Catherine Mowry LaCugna, Joseph A. Bracken, and Schlitt himself, whose work reverberates with what Schlitt terms transatlantic Idealist echoes. The book concludes with reflection on the overall German Idealist trinitarian legacy, noting several challenges it offers to those who will pursue creative trinitarian reflection in the future.

Trinity Guide to the Trinity William J. La Due, 2003-01-01 Provides a brief and comprehensive introduction to the mystery of the Trinity, tracing the evolution of the doctrine from its Old Testament roots to its contemporary expressions.

The Cosmic Breath Amos Yong, 2012-05-10 The interjection of pneumatology in both theologies of interreligious dialogue and in the theology and science conversation comes together in this volume. The resulting Christianity-Buddhism science dialogue opens up to new pneumatological perspectives on philosophical cosmology and anthropology in interdisciplinary and global context.

Deus Trinitas David Coffey, 1999-09-09 Recent years have seen a resurgence of interest in the doctrine of the Trinity following a long period in which it was considered irrelevant to the rest of theology and to the challenge of Christian life. In this book, David Coffey claims that this resurgence is caused by a renewed appreciation of the fact that salvation itself has a Trinitarian structure. He argues that we cannot understand salvation without a solid understanding of the Trinity. Coffey considers the full range of issues surrounding this central doctrine of Christian faith. Viewing the doctrine of the Trinity in its historical and ecumenical context, he seeks to arrive at a balanced vision that incorporates the insights of both the Western and the Eastern Churches. In particular, he wants to keep in sight both the immanent Trinity, the Godhead considered in itself, and the economic Trinity, that is, its role within the economy of salvation. In Coffey's own model of the Trinity, the Holy Spirit is seen as the objectivization of the mutual love of the Father and the Son. This idea is most closely associated with St. Augustine and Richard of St. Victor. Coffey, however, takes it much further, presenting it as an explanation of the origin of the Son and the Holy Spirit and of the manner of operation of the Trinity in the economy. From this model, he is also able to derive a

suggestion for resolving the ecumenical problem of Filioquism vs Monopatristism concerning the procession of the Holy Spirit the issue that has divided East from West for nearly a millennium Presenting a new perspective on a topic of renewed theological interest this comprehensive study has important implications for ecumenical discussions of the Trinity

Interdisciplinary and Religio-Cultural Discourses on a Spirit-Filled World V. Kärkkäinen, K. Kim, A. Yong, 2013-09-12 This volume presents interdisciplinary intercultural and interreligious approaches directed toward the articulation of a pneumatological theology in its broadest sense especially in terms of attempting to conceive of a spirit filled world

Understanding Spiritual Warfare James K. Beilby, Paul Rhodes Eddy, 2012-12-01 The topic of spiritual warfare is an issue of ongoing interest in a number of sectors of the contemporary church This four view work brings together leading theologians and ministry leaders to present major views on spiritual warfare in dialogical fashion all authors present their views and then respond to each of the other views Contributors include Walter Wink with Gareth Higgins and Michael Hardin David Powlison Gregory Boyd C Peter Wagner and Rebecca Greenwood This volume provides a balanced irenic approach to a much discussed and often controversial topic Offering a model of critical thinking and respectful dialogue it highlights the differences between contributors discusses a full range of important topics on the subject and deploys biblical as well as theological arguments

God and Contemporary Science Philip Clayton, 1997 This text is part of the Edinburgh Studies in Constructive Theology series which aims to provide a dialogue between the history of Western theological traditions and the contemporary interpretative context Intended for those with no particular historical or theological training it guides students through the core theological issues searching out common ground by surveying the classic works of the theological tradition

Analytic Theism, Hartshorne, and the Concept of God Daniel A. Dombrowski, 1996-10-10 Initiates and continues a dialogue regarding the concept of God in the neoclassical philosophy of Charles Hartshorne and that found in analytic philosophers who adhere to classical theism

Religions in the Making John B. Cobb Jr., 2012-11-06 Whitehead had a place for God in his comprehensive cosmological vision and his theism has long attracted interest from some Christian theologians But Whitehead's ideas have much wider use Some Buddhists have found help in articulating their nontheistic vision and relating it to the current world of thought and action In this book religious writers in seven different traditions articulate how they can benefit from Whitehead's work So this volume demonstrates that various features of his thought can contribute to many communities According to his followers Whitehead shows that the deepest convictions and commitments of the major religious communities can be complementary rather than in conflict Readers of this book will see how that plays out in some detail A Whiteheadian Hindu can recognize the truth in a Whiteheadian Judaism and both can appreciate the insights of Chinese Whiteheadians committed to their classical thinking Perhaps a new day in interreligious understanding has come

Evolution and Eden Jerry D. Korsmeyer, 1998 In this study Jerry Korsmeyer examines how an evolutionary perspective impacts on a traditional understanding of original sin He reviews the history of the doctrine as well as the church

s interaction with the theory of evolution Using clues provided by evolution and process thought the author suggests an interpretation of original sin that incorporates both modern Catholic scholarship and scientific evidence Ultimately he moves toward a theology of evolution

The One in the Many Joseph A. Bracken, 2001 Classical notions of truth and objectivity have steadily eroded in the face of postmodernism Meeting this challenge head on Joseph Bracken here reconstructs the metaphysical tradition of the West on solid new foundations Drawing on the thought of Alfred North Whitehead Ervin Laszlo and Jürgen Habermas Bracken presents a new philosophical perspective that roots the relationship between God and the world in community Bracken first answers objections to the possibility of developing a new metaphysics in our postmodern age He then lays out the vertical and horizontal dimensions of his new metaphysical scheme a constructive perspective that results in a consciously communitarian understanding of the God world relationship The uniqueness of Bracken's position is its advocacy of a strictly social ontology in which the classical relationship of the One and the Many is reversed not the transcendence of the One over the Many but its emergence out of the Many in dynamic relationship

God-creature-revelation Jerry D. Korsmeyer, 1995 Educated Western Christians seek to understand the scientific basis of evolution as well as to justify why a God worth worshiping can be responsible yet not indictable for evil The author creates an innovative theological framework that addresses these concerns and provides part of a structure for fundamental theology which is based on the neoclassical metaphysics of Charles Hartshorne and the speculative cosmology of Alfred North Whitehead His model of the divine has three basic principles God is love God is the creator and this creativity is an integral part of divine essence From this model he develops a fundamental theology which focuses on the nature of divinity the interaction between human and the divine and divine revelation He attributes much of his own concept of revelation to Whitehead's model in which revelation is indicative of a successful communion between human and divine This revelation is achieved through symbolic mediation and it is as much inter personal reconciliation as it is a universal resonance of the creative essence between heaven and earth This framework shows initial agreement with Christian traditions it is highly coherent universal in scope and most importantly it has rich potential for future Christian understanding

Vail, 2012-06-07 Talk about chaos is pervasive Biblical scholars theologians and scientists have been using the word chaos for some time occasionally mingling ideas across disciplines around the shared word Quite often discussions of chaos center on the issues of creation s origin and nature as well as on God s creative methods and relationship to creation Eric M Vail investigates the current uses of the word chaos in those areas A new way of articulating creation out of nothing is offered as both helpful and appropriate in our current milieu He suggests where we ought to focus our use of the word chaos in Christian discourse and argues that chaos is more fitting for naming where creation has gone awry rather than for naming that state out of which creation comes to be The One, the Many, and the Trinity Marc A. Pugliese, 2011-04-15 Process metaphysics is frequently minimized or dismissed as a result of a failure to grasp its genuine significance Developments of the last several centuries in philosophy science and physics fostered a revolution in metaphysics This book surveys the reasons for process philosophy and theology its genesis and historical development It considers Alfred Whitehead s metaphysics and Charles Hartshorne s and others treatment of process theology The One the Many and the Trinity analyzes perhaps the most ambitious and robust system of process thought developed from a Roman Catholic perspective that of Joseph A Bracken S J Bracken brings together traditional Christian Trinitarian theism with process thought while integrating into a fundamentally Whiteheadian metaphysics a litany of diverse sources including Aristotelianism Thomism German Idealism Anglo American Idealism social theory existentialism postmodern thought and contemporary philosophy of science The book goes on to examine Bracken s process response to the problem of the one and many from a more traditional Catholic philosophical and theological perspective ABOUT THE AUTHOR Marc A Pugliese is assistant professor of theology at Brescia University PRAISE FOR THE BOOK Pugliese offers an extremely well informed careful and accurate reading of the philosophy of Joseph Bracken certainly the greatest Catholic advocate of process theology in the second half of the twentieth century With this book Pugliese has provided the most extensive reconstruction and critique of Bracken s thought yet available Philip Clayton Ingraham Professor of Theology Claremont School of Theology *Theologies of Creation* Thomas Jay Oord, 2014-10-02 Humans have long wondered about the origin of the universe And such questions are especially alive today as physicists offer metaphysical theories to account for the emergence of creation Theists have attributed the universe s origin to divine activity and many have said God created something from absolute nothingness The venerable doctrine of

creatio ex nihilo especially emphasizes God's initial creating activity. Some contributors to this book explore new reasons creatio ex nihilo should continue to be embraced today. But other contributors question the viability of creation from nothing and offer alternative initial creation options in its place. These new alternatives explore a variety of options in light of recent scientific work, new biblical scholarship, and both new and old theological traditions.
