Hungary's Crisis of Democracy Peter Wilkin, 2016-08-26 This book examines the crisis of democracy that has arisen in Hungary since the election of the Fidesz government in 2010 After moving swiftly to transform the Hungarian constitution Fidesz created a new political system which has led its critics to argue that the era of democracy in Hungary is over US Senator John McCain has gone so far as to describe Hungary as an illiberal democracy on a path toward fascism The author argues that Fidesz has sought to challenge the capitalist and democratic transformation that shaped Hungary for 20 years after the fall of communism by increasing the power of the state over crucial aspects of the economy society and the political system In so doing Fidesz actions resemble those undertaken by many authoritarian states that have emerged since the end of the Second World War all aiming to build up a national capitalism and protect their economies whilst undertaking nation building To make sense of this the author draws upon two traditions of thought world systems analysis which situates Hungary in the context of its incorporation in the modern capitalist world system after the fall of communism and anarchist social thought which provides a unique way of seeing the actions of states and political elites In so doing the book argues that the events unfolding in Hungary cannot be explained on the basis of Hungarian exceptionalism but must be situated in the broader political and economic context that has shaped the development of Hungary since 1990 The form of capitalism introduced in Hungary and across the region of East and Central Europe has systematically undermined the strong state and social security that had existed under communism and when added to the failure of the left and liberals in the region it has paved the way for far right and neo fascist political movements to emerge claiming the mantle of defenders of society from the market This represents a fundamental threat to the enlightenment traditions that have shaped dominant modern political ideologies and raises profound problems for both the EU and NATO

Understanding Post-Communist Transformation Richard Rose, 2009-01-21 The fall of the Berlin Wall launched the transformation of government economy and society across half of Europe and the former Soviet Union This text deals with the process of change in former Communist bloc countries ten of which have become new European Union EU democracies while Russia and her neighbours remain burdened by their Soviet legacy Drawing on more than a hundred

public opinion surveys from the New Europe Barometer the text compares how ordinary people have coped with the stresses and opportunities of transforming Communist societies into post Communist societies and the resulting differences between peoples in the new EU member states and Russia Subjects covered by Understanding Post Communist Transformation include Stresses and opportunities of economic transformation Social capital and the development of civil society Elections and the complexities of party politics The challenges for the EU of raising standards of democratic governance Differences between Russia s and the West s interpretation of political life Written by one of the world s most renowned authorities on this subject this text is ideal for courses on transition post communism democratization and Russian and Eastern European history and politics

The Sovietization of Rural Hungary, 1945-1980 József Ö. Kovács, Gergely Krisztián Horváth, Gábor Csikós, 2023-06-05 In this book the experiential history of the Soviet style social transformation projects between 1945 and 1980 is discussed through the example of rural Hungary The book interprets state socialism as a modernization project Existing socialism was a form of dictatorship in which authorities sought to transform the mentalities of their subjects from the individual level to the global scale This project depended on socio economic homogenization one important method of asserting state power was the transformation of property rights land redistribution collectivization Communist modernization discriminated against the inhabitants of rural areas who were the primary victims of collectivization and the discriminatory effects of the rules implemented by policymakers The resulting radical changes in peasant lifestyles would become a source of social pathologies However not the authorities but contemporary scholars considered the social costs of these actions The book aims at Weberian disenchantment and contributes to the deconstruction of the common image of Hungarian socialism the happiest barrack The intended audience includes readers at the graduate level in the fields of history political science and anthropology general readers interested in the history of communism It is hoped that the research questions inspire new research for exploring convergent and divergent elements in social transformation in former communist countries

significance of Hungary in geopolitical terms has far outweighed the modest size of its population This book charts the main
events of these tumultuous decades including the 1956 Uprising the end of Hungarian communism entry into the European
Union and the rise to power of Viktor Orb n and the national conservative ruling party Fidesz **After Communism:**

Perspectives on Democracy (p) Donald R. Kelley,2003 In this collection top scholars of Soviet and post Soviet studies

capitalism and democracy across Eastern Europe the political development of Muslim states the complex and differential

Russia from corruption to contracts Editor Donald Kelley introduces the volume with a synthesis of the theoretical and
empirical findings of the volume and his brief chapter introductions place each contribution in relation to the other essays
and to larger debates on democratization **Globalization, Uncertainty, and Men's Careers** Hans-Peter

Blossfeld,Melinda Mills,Fabrizio Bernardi,2006-01-01 Globalization argue the contributors to this book has remarkably
accelerated social and economic change in modern societies One such change is manifested in the world of work and careers
This book explores whether the forces of globalization affect the erosion of standard career patterns of mid career men in
twelve OECD countries Overwhelming evidence against the individualization of inequality thesis is provided it is argued that
equality remains largely stratified by factors such as occupational class and educational level and in some countries has even
grown over time **Local Governance in Central and Eastern Europe** T. Lankina,A. Hudalla,H. Wollmann,2008-01-23

This book examines local government performance in key areas of social services and economic promotion in eight towns in
the Czech Republic Hungary Poland and Russia It dispels the myth that socio economic givens or inter governmental systems
are key determinants of local development **East European Cinemas** Anikó Imre,2005-09-14 Eastern Europe has

produced rich and varied film cultures Czech Hungarian and Serbian among them whose histories have been intimately tied
to the transition from Soviet domination to the complexities of post Communist life This latest volume in the AFI Film
Readers series presents a long overdue reassessment of East European cinemas from theoretical psychoanalytic and gender
perspectives moving the subject beyond the traditional area studies approach to the region s films This ambitious collection

situating Eastern Europe's many cinemas within global paradigms of film study will be an essential work for all students of cinema and for anyone interested in the relation of film to culture and society **Many Globalizations** Peter L.

Berger, Samuel P. Huntington, 2002 *Many Globalizations* is an attempt to account for the cultural impact of globalisation in the lives of ordinary citizens from ten countries. The results of the study portray vast numbers of people intermixing

participation in a global economy with indigenous values and lifestyles *Inventing the Needy* Lynne Haney, 2002-06-03

Inventing the Needy offers a powerful innovative analysis of welfare policies and practices in Hungary from 1948 to the last decade of the twentieth century. Using a compelling mix of archival interview and ethnographic data, Lynne Haney shows that three distinct welfare regimes succeeded one another during that period and that they were based on divergent conceptions of need. The welfare society of 1948-1968 targeted social institutions; the maternalist welfare state of 1968-1985 targeted social groups; and the liberal welfare state of 1985-1996 targeted impoverished individuals. Because they reflected contrasting conceptions of gender and of state-recognized identities, these three regimes resulted in dramatically different lived experiences of welfare. Haney's approach bridges the gaps in scholarship that frequently separate past and present ideology and reality and state policies and local practices. A wealth of case histories gleaned from the archives of welfare institutions brings to life the interactions between caseworkers and clients and the ways they changed over time. In one of her most provocative findings, Haney argues that female clients' ability to use the state to protect themselves in everyday life diminished over the fifty-year period. As the welfare system moved away from linking entitlement to clients' social contributions and toward their material deprivation, the welfare system and those associated with it became increasingly stigmatized and pathologized. With its focus on shifting inventions of the needy, this broad historical ethnography brings new insights to the study of welfare state theory and politics **Women's Access to Political Power in Post-Communist**

Europe Richard E. Matland, Kathleen A. Montgomery, 2003-05-01 This book considers women's access to formal positions of power in the newly formed democracies of post-communist Europe. While acknowledging the relevance of recent history, this book takes an important step away from the communist legacy and explicitly argues for a framework based on causal variables identified in the existing literatures from industrialized democracies on women and politics and legislative recruitment. After a brief introduction, the second chapter sets forth a general theoretical framework which posits that the level of female legislative representation in a given country is a function of the relative supply of and demand for female candidates. After a chapter considering a broad overview of public opinion on women and politics in Eastern Europe, thirteen country chapters spanning the spectrum of Eastern European democracies address and test hypotheses about the key variables affecting the supply and demand sides of the equation in individual countries. Relevant aspects of the communist cultural and developmental legacy are addressed, but authors give particular attention to political factors such as electoral rules and the characteristics of the emerging party systems that vary within the Eastern European countries. The new

democracies of Eastern Europe provide a novel context in which to test and extend our theories about the consequences of political institutions for the quality of democracy Since institutional arrangements are more malleable than developmental or cultural characteristics those variables also offer the greatest promise to scholars and practitioners wondering what can be done to improve women s access to formal arenas of political power How can we build democracies that are stable lasting and representative A careful analysis of the post communist context can help us to address issues concerning institutional design and development that has relevance well beyond the Eastern European context

Michelle M. Metro-Roland, 2016-02-24 Drawing upon the literature of landscape geography tourism studies cultural studies visual studies and philosophy this book offers a multi disciplinary approach to understanding the interaction between urban environments and tourists This is a necessary prerequisite for cities as they make themselves into enticing destinations and compete for tourists attention It argues that tourists make sense of and draw meaningful conclusions about the places in which they tour based upon the interpretation of the signs or elements encountered within the built environment elements such as graffiti and lamp posts The writings of the American pragmatist Charles S Peirce on interpretation provide the theoretical model for explaining the way in which mind and world or thoughts and objects result in tourists interacting with place This theoretical framework elucidates three applied studies undertaken with foreign visitors to the Hungarian capital of Budapest Based upon extensive ethnographic field work these studies focus on tourists interpretation of the urban landscape with particular attention paid to the encounters with national

figures the authors identify long term changes in Hungary from the late 1940s to the late 1980s and provide an in depth analysis of the impact of the collapse of the communist system in the 1990s They also compare long term and short term change in Hungary with trends in other Central and Eastern European countries
