This book assembles a wide range of explanatory perspectives on social inequalities in health Everywhere in the world those with less advantage die younger and suffer more illness than the wealthy Decades of research have documented this reality and yet we lack a comprehensive understanding of the mechanisms through which social circumstances ultimately influence the biological processes that lead to disease Explanations have been proposed from various disciplines economics psychology behavioral science geography and neuroscience and each sheds light on parts of

the overall process But very few texts assemble these insights into an overall explanatory paradigm Through a review of concepts and theories from a wide range of disciplines the author outlines how these may be woven together to offer a more complete picture of how social influences get under the skin to affect health and disease As well as understanding individual health the book assembles explanations for social disparities in health It concludes with a proposal for a set of explanatory models that cross disciplinary boundaries Topics explored include Social Inequalities in Health Explanation and Causal Models for Social Epidemiology Social and Economic Theories to Explain Patterns of Disease Biological Pathways Linking Social Determinants to Health Theoretical Models of Health Behavior Work Environment and Health Social Networks Social Support and Health Positive Influences on Health Coping and Control The Relationship Between Personality and Health Understanding Health Determinants Explanatory Theories for Social Epidemiology is a textbook for graduate students in epidemiology health sciences health policy and psychology as well as social science students who are studying health It will also be of interest to general readers and can serve as a reference for researchers in epidemiology and the health sciences who are planning studies of the social determinants of health The book reviews theories that could be tested in such studies

John-henderson,Susanne Rosalie De Rooij,Annie Ginty,Katherine Ehrlich,2022-10-05 Psychology of Anger Elana I.

Clausen,2007 Anger is an emotional state that may range in intensity from mild irritation to intense fury and rage Anger has physical effects including raising the heart rate and blood pressure and the levels of adrenaline and noradrenaline Anger is a physiological and psychological response to a perceived threat to self or important others present past or future The threat may appear to be real discussed or imagined Anger is often a response to the perception of threat due to a physical conflict injustice negligence humiliation or betrayal among other contentions The expression of anger can be through active or passive behaviours In the case of active emotion the angry person lashes out verbally or physically at an intended target When anger is a passive emotion it is characterised by silent sulking passive aggressive behaviour hostility and tension This new book presents leading edge research in this field Psychoneuroimmunology Robert Ader,2007

Psychoneuroimmunology is the study of interactions among behavioral neural and endocrine and immunologic processes of adaptation These two volumes provide a clearly written extensively referenced summary of some of the behavioral neural and endocrine regulators of immune responses and immunologically mediated disease processes and of the behavioral and neuroendocrine effects of immune system activity Several chapters expand upon topics reviewed in earlier editions of this series most chapters cover active areas of research that have not previously been reviewed As illustrated in this fourth edition interdisciplinary research continues to provide evidence that the brain and immune system represent a single integrated system of defense Socioeconomic Status and Health in Industrial Nations Nancy E. Adler,1999 Socioeconomic status SES is a powerful determinate of a person s health and this effect is felt along the entire range of SES not just at the

extremes of wealth and poverty In this volume the full spectrum of biological psychological and social pathways by which SES may influence health are explored Questions addressed include is the effect the same in all populations does SES affect health or vice versa and does the gradient occur for all diseases Policies that could address the social inequalities associated with the gradient and their impact on health are also discussed

Heart Disease Gerdi Weidner,Mária Kopp,Margareta Kristenson,2002 Annotation This book addresses one major question Why do men get more heart disease than women Recent global trends in heart disease show that traditional coronary risk factors such as elevated blood pressure and cholesterol are poor candidates in explaining the gender gap in heart disease Changes in these risk factors also cannot explain the recent cardiovascular disease epidemic among middle aged men in Eastern Europe This book will focus on environmental behavioral and psychosocial variables as well as new risk factors of a biological nature in an attempt to understand the gender gap in heart disease It combines perspectives from numerous disciplines such as demography epidemiology medicine sociology and psychology This book features the work of a distinguished group of international researchers appearing in Richard Stone s report on Stress the invisible hand in Eastern Europe s death rates Science vol 288 June 9 2000 pp 1732 33 It combines perspectives from numerous disciplines such as demography epidemiology medicine nutrition sociology and psychology to explore the environmental behavioral and psychosocial influences on men s greater susceptibility to heart disease
