Sociology And Nature Social Action In Context:

Sociology And Nature Raymond Murphy, 2018-03-05 Sociology as if nature did not matter has been the sociological expression of modern societies negligent of the processes of nature In response to this ecological blindness Raymond Murphy examines the limitations of sociology that have resulted from this neglect Humanity's success in manipulating nature destabilizes the natural support system of society on a planetary scale and in turn destabilizes all of society's institutions Because the manipulation of nature has become so central to modern society society Murphy argues can now be understood only in terms of the interaction between social action and the processes of nature The growing awareness that social constructions unleash dynamic processes of nature processes beyond human control that bear on social action has the potential of radically transforming sociology Sociology and Nature proposes the reconstruction of sociology in which nature does matter developing a novel sociological approach that situates social action in its natural context Nature: Reconfiguring the social David Inglis, John Bone, Rhoda Wilkie, 2005 Many influential stances within the social sciences regard nature in one of two ways either as none of their concern which is with the social and cultural aspects of human existence or as wholly a social and cultural fabrication But there is also another strand of social scientific thinking that seeks to understand the interplay between social and cultural factors on one side and natural factors on the other These volumes contain the main contributions that have been made within each of these streams of thought The selections illustrate to the reader the complexity of the various positions within these streams and the strengths and limitations of each perspective A new introduction places these articles in their historical and intellectual context and the volumes are completed with an extensive index and chronological table of contents *Nature: Thinking the natural* David Inglis, John Bone, Rhoda Wilkie, 2005 Sociological Theory and the Environment Riley E. Dunlap, 2002 Sociological Theory and the Environment is a comprehensive survey and assessment of sociological theories of the relations between societies and their natural biophysical environment This book touches on and addresses virtually all of the major perspectives focal points and debates in environmental sociology today classical and twentieth century social theories macro micro linkage issues globalization and development reflexive modernization ecological modernization vs limits viewpoints modernity and post modernity risk society constructionalism realism environmental movements identities consumption and environment cultural sociologies of the environment and so on At the same time the book aims to go beyond an inventory of environmental sociological theory Sociological Theory and the Environment stresses how new ground can be broken in the articulation of environmental sociology with major classical and contemporary sociological theories **Environmental Law and Contrasting Ideas of Nature** Keith H. Hirokawa, 2014-07-17 This book examines how nature is constructed through law building on the constructivist concept that nature is a self-perpetuating self-reinforcing social creation *A Weberian Perspective on Home, Nature and Sport* Michael Symonds, 2024-05-30 This book extends Max Weber's theory of the value spheres of modernity into

wholly new areas showing that the addition of home nature and sport to Weber's own list of five spheres economic scientific intellectual political legal erotic and aesthetic yields original insights into these aspects of modernity and modernity itself It shows how each of these new spheres is able to create its own inner cosmos of salvation from rationalised senselessness just as Weber's irrational spheres offer release from the grim reality of capitalism the disenchanted universe and the bureaucratic state formed by the more rationalised spheres Drawing on a wide cross disciplinary range of sources the author sheds light on the role of home in creating a sense of our enchanted past of nature in helping to restore to the world a teleological meaning constructed from innocence and purity and of sport in imposing sense on the world at least temporarily

A Weberian Perspective on Home Nature and Sport Disenchantment and Salvation will appeal to scholars of sociology and social theory with interests in classical sociological theory and the analysis of modernity

The Hartwell Approach to Climate Policy Steve Rayner, Mark Caine, 2014-09-19 The Hartwell Approach to Climate Policy presents a powerful critique of mainstream climate change policies and details a set of pragmatic alternatives based on the Hartwell Group's collective writings from 1988-2010 Drawing on a rich history of heterodox but increasingly accepted views on climate change policy this book brings together in a single volume a series of key related texts that define the Hartwell critique of conventional climate change policies and the Hartwell approach to building more inclusive pragmatic alternatives This book tells of the story of how and why conventional climate policy has failed and drawing from lessons learned how it can be renovated It does so by weaving together three strands of analysis First it highlights why the mainstream approach as embodied by the Kyoto Protocol has failed to produce real world reductions in greenhouse gas emissions and delayed real meaningful progress on climate change Second it explores the underlying political economic and technological factors which form the boundary conditions for climate change policy but which are often ignored by policy makers and advocates Finally it lays out a novel approach to climate change guided centrally by the goal of uplifting human dignity worldwide and the recognition that this can only succeed if pursued pragmatically economically and with democratic legitimacy With contributions from leading scholars in the field this work presents a original critique of climate policy and a constructive primer for how to improve it

Nature, Environment and Society Philip Sutton, 2017-03-14 How have sociologists responded to the emergence of environmentalism What has sociology to offer the study of environmental problems This uniquely comprehensive guide traces the origins and development of environmental movements and environmental issues providing a critical review of the most significant debates in the new field of environmental sociology It covers environmental ideas environmental movements social constructionism critical realism ecocentric theory environmental identities risk society theory sustainable development Green consumerism ecological modernization and debates around modernity and post modernity Philip Sutton adopts a long term view which focuses on the relationship

between ideas of nature and environment ecological identities and social change providing a framework for future research Bringing environmental issues into contact with sociological theories Nature Environment and Society provides an up to date introduction to this important new field It will be essential reading for all students of sociology environmental studies and anyone interested in understanding environmental problems

The Myth of Social Action Colin Campbell,1998-07-09 The Myth of Social Action first published in 1996 is a powerful critique of the sociology of the time and a call to reject the prevailing orthodoxy Arguing that sociological theory had lost its way Colin Campbell mounts a case for a new dynamic interpretivism a perspective on human conduct which is more inkeeping with the spirit of traditional Weberian action theory Discussing and dismissing one by one the main arguments of those who reject individualistic action theory he demonstrates that this has been wrongly rejected in favour of the interactional social situationalist approach now dominating sociological thought

21st Century Sociology: A Reference Handbook Clifton D. Bryant,Dennis L. Peck,2007 Publisher Description

Mad about Wildlife Ann Herda-Rapp,Theresa Goedeke,2005-05-01 This edited volume documents the presence and types of Nature discourse that emerge during conflicts between people over wildlife This collection of qualitative case studies demonstrates how social groups create opposing symbolic meanings of Nature and highlights the way in which the successful imposition of those meanings affects wildlife people generally and management professionals Together the chapters illustrate the significant untapped utility of constructionist approaches for understanding social conflict over wildlife issues and for managing natural resources in a way that acknowledges and incorporates different definitions of nature

Why Context Matters in Educational Leadership Colin Evers,Gabriele Lakomski,2022-02-20 Why Context Matters in Educational Leadership A New Theoretical Understanding is unique in the field of educational leadership studies This book offers a systematic account of educational leadership from the perspective that context matters It argues that studies of leadership in education can only progress if the importance of context is understood and presents context as a set of constraints under which leadership is exercised A theoretical book that offers at last three major challenges to dominant positions in the field in a systematic way it provides a

new coherent and more realistic way to think about leadership in context The chapters offer concrete steps for complex problem solving in schools and will help schools tailor solutions to local constraints and circumstances Written by leading scholars Colin W Evers and Gabriele Lakomski this book will be essential reading for students and researchers working in the fields of education educational administration and leadership Credential Market Quentin Maire,2021-09-22 This book makes an original contribution to credential sociology by analysing how high school certificates become and remain valuable in a context of mass high school participation i e credentialism Building on a detailed analysis of the International Baccalaureate IB Diploma a senior secondary school certificate offered in over 150 countries Quentin Maire argues that the advent of new private credentials can be understood as a phenomenon of credential stratification in a context of intensified academic competition Using original data on high school credentials in Australia and internationally the author makes a strong case for certificates to be studied relationally by locating them in the credentialing structures in which they are inserted He systematically applies the comparative method to explain the role of the curriculum family resources school segregation and higher education selection in creating a credential hierarchy His robust combination of theoretical construction and detailed empirical work allows him to offer new insights into social inequality in education systems credential theory and the IB Diploma **Rationality And Nature** Raymond Murphy,2018-02-07 Divergent beliefs about humanity s relationship to nature collide as the second millenium ends One belief emphasizes that a distinctive characteristic of humans reason enables them to reshape and master nature Another insists that nature is not so plastic hence humans must adapt to nature and render development sustainable or even limit growth Social ecology asserts that environmental problems result from institutional hierarchies and suggests decentralized institutions and egalitarian ethics According to deep ecology such problems originate in cultures assuming only humans are worthwhile thus it stresses the intrinsic value of nature Feminists are torn between values based on the equality of men and women and ecofeminist values postulating that women are inherently closer to nature than men Rationality and Nature critically assesses these conflicting cultural tendencies Waste has been the forgotten element of political economy Western society has sophisticated methods of financial accounting but does little to account for the losses financial and human of waste Raymond Murphy proposes in this book a theory of environmental debt as a source of capital accumulation He develops a model of environmental classes that helps us to understand the political and economic basis of conflict over the environment Environmental degradation did not occur on a vast scale until science and applied science were developed Are they responsible for it and can they be reoriented toward a more symbiotic relationship with nature Other ways of bringing about a symbiotic relationship are also explored in this book compulsion ecological values ecological experience and ecological knowledge Arguments and Actions in Social Theory P. Preston,2009-05-21 This book argues that theorists are located within the social world exercises in theorizing are both bounded and creative imagination and creativity build upon the resources of tradition and such awareness is the basis for

dialogue with the denizens of other traditions cultures and ways of making sense of the world **Pots, Pans, and People: Material Culture and Nature in Mesoamerican Ceramics** Eduardo Williams, 2024-07-19 This book explores material culture and human adaptations to nature over time with a focus on ceramics The author also explores the role of ethnoarchaeology and ethnohistory as key elements of a broad research strategy that seeks to understand human interaction with nature over time **Overexploitation or Sustainable Management? Action Patterns of the Tropical Timber Industry** Imme Scholz, 2018-10-24 The part played by the Brazilian tropical timber industry in deforesting the Amazon region has not been studied very much This book describes the expansion of the timber industry in the Brazilian federal state of Para since the 1960s when Amazon development became an important item on the government's agenda The Body Reader Lisa Jean Moore, Mary Kosut, 2010-02 An essential collection of readings on cultural social and emotional understandings of the body Plastic surgery obesity anorexia pregnancy prescription drugs disability piercings steroids and sex reassignment surgery over the past two decades there have been major changes in the ways we understand treat alter and care for our bodies The Body Reader is a compelling cutting edge and timely collection that provides a close look at the emergence of the study of the body From prenatal genetic testing and manscaping to televideo cybersex and the meth economy this innovative work digs deep into contemporary lifestyles and current events to cover key concepts and theories about the body A combination of twenty one classic readings and original essays the contributors highlight gender race class ability and sexuality paying special attention to bodies that are at risk bodies that challenge norms and media representations of the body Ultimately The Body Reader makes it clear that the body is not neutral it is the entry point into cultural and structural relationships emotional and subjective experiences and the biological realms of flesh and bone Contributors Patricia Hill Collins Karen Dias H Hugh Floyd Jr Arthur Frank Sander L Gilman Gillian Haddow Richard Huggins Matthew Immergut Lea Kent Kristen Karlberg Steve Kroll Smith Mary Kosut Jarvis Jay Masters Lisa Jean Moore Tracey Owens Patton William J Peace Jason Pine Eric Plemons Barbara Katz Rothman Edward Slavishak Phillip Vannini and Dennis Waskul
