Society and the Death of God Sal Restivo, 2021-06-08 This book advances the strong programme that sociology and anthropology provide a scientific foundation for arguing that God and the gods are human creations Contending that religion is one but not the only way to systematize and institutionalize the moral order of a society the author argues that religion reflects the fundamental human need for belonging and the social function of compassion As such our transcendental and supernatural ideas are really concerned with our everyday lives in communities and faced with the severity and immediacy of the global problems with which the world is confronted existential threats it is increasingly important to abandon delusions and correct our mistake in reference not by eradicating religion but by grounding it more explicitly in earthly matters of community social solidarity belonging and compassion A wide ranging study of the roots nature and purpose of religion and theistic belief

Sociology Stockard,1999-08 The Discovery of Society Randall Collins,Michael Makowsky,2005 The coverage of women in sociology is now better integrated into the main topics of the book *Beyond the Market* Jens Beckert,2009-01-10 Beyond the Market launches a sociological investigation into economic efficiency Prevailing economic theory which explains efficiency using formalized rational choice models often simplifies human behavior to the point of distortion Jens Beckert finds such theory to be particularly weak in explaining such crucial forms of economic behavior as cooperation innovation and action under conditions of uncertainty phenomena he identifies as the proper starting point for a sociology of economic action Beckert levels an enlightened critique at neoclassical economics arguing that understanding efficiency requires looking well beyond the market to the social cultural political and cognitive factors that influence the coordination of economic action Beckert searches social theory for the components of an alternative theory of action one that accounts for the social embedding of economic behavior In Durkheim and Parsons he finds especially useful approaches to cooperation in Luhmann a way to understand how people act under highly contingent conditions and in Giddens an understanding of creative action and innovation Together these provide building blocks for a research program that will yield a theoretically sophisticated understanding of how economic processes are coordinated and the ways that markets are embedded in social cultural and cognitive structures Containing one of the most fully informed critiques of the neoclassical analysis of economic efficiency as well as one of the most

thoughtful blueprints for economic sociology this book reclaims for sociology the study of one of the most important arenas of human action *Science in Society* Massimiano Bucchi,2004 Without assuming any scientific background Bucchi provides clear summaries of all the major theoretical positions within the sociology of science using many fascinating examples to illustrate them Exploring Chinese Society and Culture Umang Marar,2025-01-03 Exploring Chinese Society and Culture delves into the diverse and complex themes of modern China We examine the country s social and economic changes its growing global influence and the various perspectives on China s development and governance Our compendium covers topics such as social welfare gender ethnicity and the role of the Communist Party and the State We provide detailed accounts of social changes from causal processes to the political dynamics of right wing populism and the causes of major technological disasters Since the founding of the Communist Party in 1921 China s ethnic relations have continuously evolved We discuss the impact of ethnic minorities and intra ethnic relations on the nation We also explore the framework of urban and rural society in transitional China examining how family background affects children s academic achievement Additional chapters focus on cultural sociology market disputes government intervention and the measurement invariance across gender and age among Chinese adolescents We also investigate the motivations and forms of practicing CSR in art and culture in China highlighting the driving factors behind corporate engagement in cultural initiatives **ISE**
