Sociology And Scientism The American Quest For Objectivity 1880 1940:

Sociology and Scientism Robert C. Bannister, 2014-02-01 During the 1920s a new generation of American sociologists tried to make their discipline more objective by adopting the methodology of the natural sciences Robert Bannister provides the first comprehensive account of the emergence of this objectivism within the matrix of the evolutionism of Lester Ward and other founders of American sociology Objectivism meant confining inquiry to the observable externals of social behavior and quantifying the results Although objectivism was a marked departure from the theoretical and reformist sociology of the prewar years and caused often fierce intergenerational struggle sociological objectivism had roots deep in prewar sociology Objectivism first surfaced in the work of sociology's second generation the most prominent members of which completed their graduate work prior to World War I It gradually took shape in what may be termed realist and nominalist variants the first represented by Luther Lee Bernard and the second by William F Ogburn and F Stuart Chapin For Bernard a scientific sociology was radical prescribing absolute standards for social policy For Ogburn and Chapin it was essentially statistical and advisory in the sense that experts would concern themselves exclusively with means rather than ends Although the objectivists differed among themselves they together precipitated battles within the American Sociological Society during the 1930s that challenged the monopoly of the Chicago School paving the way for the informal alliance of Parsonian theorists and a new generation of quantifiers that dominated the profession throughout the 1950s By shedding new light on the careers of Ward and the other founders and by providing original accounts of the careers of the leading objectivists Bannister presents a unique look at the course of sociology before and after World War I He puts theory formation in an institutional ideological and biographical setting and thus offers an unparalleled look at the formation of a modern academic profession

Sociology and Scientism Robert C. Bannister, 1987-01-01 **Apostle of Human Progress** Edward C. Rafferty, 2003-06-11 Although Lester Frank Ward's accomplishments are not as well known today he is considered the father of American Sociology and his work profoundly influenced such important thinkers as Thorstein Veblen John Dewey Edward Ross and Charlotte Perkins Gilman In *Apostle of Human Progress* Edward C. Rafferty presents the first full scale intellectual portrait of this important public thinker Rafferty shows how Ward's thought laid the foundations for the modern administrative state and explores his contributions to twentieth century American liberalism Ideal for anyone interested in the history of American intellectuals and ideas *The Measure of Democracy* Daniel J. Robinson, 1999-04-24 Politicians government officials and public relations officers lean heavily on polling when fashioning public policy Proponents say this is for the best arguing that surveys bring the views of citizens closer to civic officials Critics decry polling's promotion of sycophantic politicians who pander to the whims of public sentiment or conversely the use of surveys by special interest groups to thwart the majority will Similar claims and criticisms were made during the early days of polling When George Gallup began polling Americans in 1935 he heralded it as a bold step in popular democracy The views of ordinary citizens

could now be heard alongside those of organized interest groups When brought to Canada in 1941 the Gallup Poll promised similar democratic rejuvenation In actual practice traditionally disadvantaged constituencies such as women the poor French Canadians and African Americans were often heavily underrepresented in Gallup surveys Preoccupied with election forecasting Gallup pollsters undercounted social groups thought less likely or unable to vote leading to a considerable gap between the polling results of the sampled polity and the opinions of the general public Examining the origins and early years of public opinion polling in Canada Robinson situates polling within the larger context of its forerunners market research surveys and American opinion polling and charts its growth until its first uses by political parties Rebels Within the Ranks Katherine Pandora, 2002-08-22 During the 1930s psychologists Gordon Allport Gardner Murphy and Lois Barclay Murphy emerged from the fields of social and personality psychology to challenge the neo behaviorist status quo in American social science Willing to experiment with the idea of science itself these rebels within the ranks contested ascendent conventions that cast the study of human life in the image of classical physics Drawing on the intellectual social and political legacies of William James radically empiricist philosophy and radical Social Gospel theology these three psychologists developed critiques of scientific authority and democratic reality as they worked at the crossroads of the social and the personal in New Deal America Appropriating models from natural history they argued for the significance of individuality contextuality and diversity as scientific concepts as they explored what they envisioned as the nature of democracy and the democracy of nature **A Field of Their Own** John M. Rhea, 2016-04-18 One hundred and forty years before Gerda Lerner established women s history as a specialized field in 1972 a small group of women began to claim American Indian history as their own domain A Field of Their Own examines nine key figures in American Indian scholarship to reveal how women came to be identified with Indian history and why they eventually claimed it as their own field From Helen Hunt Jackson to Angie Debo the magnitude of their research the reach of their scholarship the popularity of their publications and their close identification with Indian scholarship makes their invisibility as pioneering founders of this specialized field all the more intriguing Reclaiming this lost history John M Rhea looks at the cultural processes through which women were connected to Indian history and traces the genesis of their interest to the nineteenth century push for women s rights In the early 1830s evangelical preachers and women s rights proponents linked American Indians to white women s religious and social interests Later pre professional women ethnologists would claim Indians as a special political cause Helen Hunt Jackson s 1881 publication A Century of Dishonor and Alice Fletcher s 1887 report Indian Education and Civilization foreshadowed the emerging history profession s objective methodology and established a document driven standard for later Indian histories By the twentieth century historians Emma Helen Blair Louise Phelps Kellogg and Annie Heloise Abel in a bid to boost their professional status established Indian history as a formal specialized field However enduring barriers continued to discourage American Indians from pursuing their own document driven histories Cultural and academic walls crumbled in

1919 when Cherokee scholar Rachel Caroline Eaton earned a Ph D in American history Eaton and later Indigenous historians Anna L Lewis and Muriel H Wright would each play a crucial role in shaping Angie Debo's 1940 indictment of European American settler colonialism And Still the Waters Run Rhea's wide ranging approach goes beyond existing compensatory histories to illuminate the national consequences of women's century long predominance over American Indian scholarship In the process his thoughtful study also chronicles Indigenous women's long and ultimately successful struggle to transform the way that historians portray American Indian peoples and their pasts A Passion for Society Iain Wilkinson, Arthur Kleinman, 2016-01-26 What does human suffering mean for society And how has this meaning changed from the past to the present In what ways does the problem of suffering serve to inspire us to care for others How does our response to suffering reveal our moral and social conditions In this trenchant work Arthur Kleinman a renowned figure in medical anthropology and Iain Wilkinson an award winning sociologist team up to offer some answers to these profound questions A Passion for Society investigates the historical development and current state of social science with a focus on how this development has been shaped in response to problems of social suffering Following a line of criticism offered by key social theorists and cultural commentators who themselves were unhappy with the professionalization of social science Wilkinson and Kleinman provide a critical commentary on how studies of society have moved from an original concern with social suffering and its amelioration to dispassionate inquiries The authors demonstrate how social action through caring for others is revitalizing and remaking the discipline of social science and they examine the potential for achieving greater understanding through a moral commitment to the practice of care for others In this deeply considered work Wilkinson and Kleinman argue for an engaged social science that connects critical thought with social action that seeks to learn through caregiving and that operates with a commitment to establish and sustain humane forms of society Christian Matthew Bowman, 2018-04-02 Religious diversity is a defining feature of the United States But more remarkable than the range of faiths is the diversity of political visions embedded in them Matthew Bowman delves into the ongoing struggle over the potent word Christian not merely to settle theological disputes but to discover its centrality to American politics **The Molecular Vision of Life** Lily E. Kay, 1993 This fascinating study examines the rise of American molecular biology to disciplinary dominance focusing on the period between 1930 and the elucidation of DNA structure in the mid 1950s Research undertaken during this period with its focus on genetic structure and function endowed scientists with then unprecedented power over life By viewing the new biology as both a scientific and cultural enterprise Lily E Kay shows that the growth of molecular biology was a result of systematic efforts by key scientists and their sponsors to direct the development of biological research toward a shared vision of science and society She analyzes the motivations and mechanisms empowering this vision by focusing on two key institutions Caltech and its sponsor the Rockefeller Foundation Her study explores a number of vital sometimes controversial topics among them the role of private power centers in shaping scientific agenda and the political dimensions of pure

research It also advances a sobering argument the cognitive and social groundwork for genetic engineering and human genome projects was laid by the American architects of molecular biology during these early decades of the project This book will be of interest to molecular biologists historians sociologists and the general reader alike Rescuing Science Paul M. Sutter,2024-03-05 For readers concerned about the roots of the public mistrust of science get the book that Publishers Weekly says is an ardent appraisal of what ails the scientific establishment Rescuing Science Restoring Trust in an Age of Doubt is the product of Paul M Sutter s long career in the scientific community both inside and outside academia Interweaving his own experiences as an astrophysicist with broader trends observed by himself and others Sutter roots the current distrust of science within the academic scientific community itself Throughout this book Sutter reveals a community that has come to disregard the broader public is obsessed with winning grants ignores political landmines limits the entrance of minorities and permits fraud in the pursuit of notoriety Sutter tackles these and other issues through the lens of a vicious cycle where public mistrust and misunderstanding of science leads to fewer funding opportunities which leads to more competition within science which leads to a rise in fraud which circles back to greater mistrust Each chapter addresses one of the vices the academic scientific community has allowed to perpetuate the sum of which he likens to an illness of the soul of science He also explores the historical context of each issue in order to identify its root causes Sutter concludes each chapter by providing actionable solutions for both the nonscientific and scientific communities as well as what he regards as an ideal and healthy scientific approach which will lead to greater public trust **The Chicago School Diaspora**

Jacqueline Low,Gary Bowden,2013-12-01 When the University of Chicago was founded in 1892 it established the first sociology department in the United States The department grew rapidly in reputation and influence and by the 1920s graduates of its program were heading newly formed sociology programs across the country and determining the direction of the discipline and its future research Their way of thinking about social relations revolutionized the social sciences by emphasizing an empirical approach to research instead of the more philosophical armchair perspective that previously prevailed in American sociology The Chicago School Diaspora presents work by Canadian and international scholars who identify with what they understand as the Chicago School tradition Broadly speaking many of the scholars affiliated with sociology at Chicago understood human behaviour to be determined by social structures and environmental factors rather than personal and biological characteristics Contributors highlight key thinkers and epistemological issues associated with the Chicago School as well as contemporary empirical research Offering innovative theoretical explanations for the diversity and breadth of its scholarly traditions The Chicago School Diaspora offers a fresh approach to ideas topics and approaches associated with the origins of North American sociology Contributors include Michael Adorjan University of Hong Kong China Gary Bowden University of New Brunswick Jeffrey Brown University of New Brunswick Tony Christensen Wilfrid Laurier University Luis Cisneros postdoctoral scholar University of Arizona Gary A Cook Beloit College Mary Jo Deegan

Modernization from the Other Shore David C. Engerman,2004-01-15 From the late nineteenth century to the eve of World War II America s experts on Russia watched as Russia and the Soviet Union embarked on a course of rapid industrialization Captivated by the idea of modernization diplomats journalists and scholars across the political spectrum rationalized the enormous human cost of this path to progress In a fascinating examination of this crucial era David Engerman underscores the key role economic development played in America s understanding of Russia and explores its profound effects on U S policy American intellectuals from George Kennan to Samuel Harper to Calvin Hoover understood Russian events in terms of national character Many of them used stereotypes of Russian passivity backwardness and fatalism to explain the need for and the costs of Soviet economic development These costs included devastating famines that left millions starving while the government still exported grain This book is a stellar example of the new international history that seamlessly blends cultural and intellectual currents with policymaking and foreign relations It offers valuable insights into the role of cultural differences and the shaping of economic policy for developing nations even today

History of Psychiatry and Medical Psychology Edwin R. Wallace,John Gach,2010-04-13 Most of the prefatory issues are extensively elaborated upon in the Prolegomenon which also contains the complete references to the texts and authors discussed below Nevertheless the Preface would be grossly incomplete without touching on some of these issues books and scholars Too many of this book s chapters e g Mora s Marx s D B Weiner s examine and reference important earlier as well as

contemporary general histories of psychiatry and specialized monographs in German French Italian and Spanish Also in his 1968 Short History of Psychiatry discussed below Ackerknecht pp xi xii references important nineteenth and earlier twentieth century psychiatric histories in English French and German Such citations will of course not be repeated here Finally thanks to several publishers re editions of dozens of classical psychiatric texts one can consult their bibliographies as well See Prolegomenon for references to these splendid series In a rough and ready sense medical history began in classical Greece for example On Ancient Medicine While traditionally included in the Hippocratic corpus this text seems more likely to have been written by a non or even anti Hippocratic doctor Moreover the Hippocratic and other schools were hardly as secular as we now suppose On Epilepsy for example does not so much declare the prevalent denotation of it as the sacred disease erroneous as it does that it is no more nor less sacred than any other disease

Karl Mannheim and the Crisis of Liberalism David Kettler, Volker Meja, 2018-01-16 To reflect on Karl Mannheim is to address fundamental issues of political enlightenment Mannheim's driving determination was to learn as a sociologist by close observation the secret even if it is infernal of these new times Mannheim's aim was to carry liberal values forward His problem remains irresistible to reflective people at the end of the twentieth century Mannheim attempted to link social thinking to political emancipation despite overwhelming evidence against the connection Karl Mannheim and the Crisis of Liberalism is a sympathetic biography of Mannheim's paradoxical and paradigmatic project The book covers a wide range of European and American thought including Mannheim's dealings with Georg Lukacs and Oscar Jzsi in Budapest with Alfred Weber Leopold von Wiese Franz Neumann Paul Tillich Adolph Loewe and his students in Weimar Germany with Louis Wirth Edward Shils and other major figures in American sociology and with social analysts and religious thinkers in England The analysis is informed by dilemmas of history and theory science and rhetoric freedom and technical control the themes of liberalism Kettler and Meja carefully depict each stage of Mannheim's life as a sociologist and explore his influence on leading social thinkers Karl Mannheim and the Crisis of Liberalism combines significant biographical information with insightful sociological theory It will be a vital resource for historians sociologists and political theorists

Disciplinary Conquest Ricardo D. Salvatore, 2016-03-28 Ricardo D Salvatore rewrites the history of Latin American studies by tracing its roots back to the first half of the twentieth century showing how its ties to U S business and foreign policy interests helped build an informal empire that supported U S economic technological and cultural hegemony throughout the hemisphere

The Cambridge Handbook of Social Problems: A. Javier Treviño, 2018-03-22 The introduction of the Affordable Care Act in the United

States the increasing use of prescription drugs and the alleged abuse of racial profiling by police are just some of the factors contributing to twenty first century social problems The Cambridge Handbook of Social Problems offers a wide ranging roster of the social problems currently pressing for attention and amelioration Unlike other works in this area it also gives great consideration to theoretical and methodological discussions This Handbook will benefit both undergraduate and graduate students eager to understand the sociology of social problems It is suitable for classes in social problems current events and social theory Featuring the most current research the Handbook provides an especially useful resource for sociologists and graduate students conducting research *The Making of the Modern University* Julie A. Reuben, 1996-09-15

Based on extensive research at eight universities Harvard Yale Columbia Johns Hopkins Chicago Stanford Michigan and California at Berkeley Reuben examines the aims of university reformers in the context of nineteenth century ideas about truth She argues that these educators tried to apply new scientific standards to moral education but that their modernization efforts ultimately failed
