The Hearts Geographer:

Geography Of The Heart Fenton Johnson, 2011-02-15 Poignant and affectionate Geography of the Heart is a moving portrait of Lambda Award winner Fenton Johnson the son of a Kentucky whiskey brewer and his fateful lover Larry Rose who three years into their intense relationship died of AIDS Rose had been upfront about his condition from the start of his relationship with Johnson and the knowledge left their interactions fraught with the pain of anticipated loss Though Johnson never contracted the virus himself Rose's physical decline haunted him He had come to depend on Rose for his care and understanding as much as Rose increasingly fragile as their relationship progresses depended on him The vivid poignant and wise tribute to his soulmate that Johnson has distilled into *The Geography of the Heart* is a memoir like no other a startling story of compassion perseverance and the acute wounds that can linger in the shadow of true love Geographic Information Science at the Heart of Europe Danny Vandenbroucke, Bénédicte Bucher, Joep Crompvoets, 2013-05-13 For the seventh consecutive year the AGILE promotes the publication of a book collecting high level scientific papers from unpublished fundamental scientific research in the field of Geographic Information Science As the agenda for Europe 2020 is currently being set this book demonstrates how geographic information science is at the heart of Europe The contributions open perspectives for innovative services that will strengthen our European economy and which will inform citizens about their environment while preserving their privacy The latest challenges of spatial data infrastructures are addressed such as the connection with the Web vocabularies or the representation of genealogy User generated data through social networks or through interactive cameras and software is also an important breakthrough in our domain A trend to deal more and more with time events ancient data and activities is noticeable this year as well This volume collects the 23 best full papers presented during the 16th AGILE Conference on Geographic Information Science held between 14 and 17 May 2013 in Leuven Belgium **Lovescapes, Mapping the Geography of Love** Duncan S. Ferguson, 2012-12-06 Lovescapes introduces the reader to the various meanings and manifestations of love and its many cognates such as compassion caring altruism empathy and forgiveness It addresses how love and compassion have been understood in history and the religions of the world It goes on to explore the ways that our environments and heredity influence our capacity to love and suggests ways to cultivate love and compassion in one's life The book shows how the values of love and compassion are integral to finding humane solutions to the daunting problems we face as individuals as a human family and as an earth community a world in crisis Lovescapes has the following features Describing how love is the essence of the divine and therefore the ground of reality Understanding the meaning of love and its place in our lives Learning how love and compassion have been understood across history culture and tradition Gaining insight about how to increase our capacity to love and show compassion Discerning how love and compassion can be applied in all aspects of our lives in the regions where we live and in our global setting *Geographers* Hayden Lorimer, Charles W. J. Withers, 2015-12-14 The thirtieth volume of *Geographers*

Biobibliographical Studies adds significantly to the corpus of scholarship on geography's multiple histories and biographies with nine essays on figures from Britain France the USA and Spain Each was distinguished in his or her own scholarship and made distinctive contributions in specific fields as historical political or population geographers and in one case as a hydrologist geomorphologist The subjects also shared a commitment to the educational benefits of geography and of geographical research that was rooted in a vision of geography as socially illuminating and individually life changing Here is further rich testimony of the importance of geographers' lives to the lived experience of geography in practice

Geography and Geographers Ron Johnston, James Sidaway, 2015-12-22 Explores the relationship between human and physical geography All chapters updated in the new edition to reflect new literature and changes in the discipline Chapter One systematically considers representations of geographical thought The closing chapter develops an explicit argument about what has made human geography distinctive Draws on a wide reading of the geographical literature produced during a fifty year period characterised by both growth in the number of academic geographers and substantial shifts in conceptions of the discipline's scientific rationale The British Cyclopaedia of the Arts, Sciences, History, Geography, Literature, Natural History, and Biography ..., 1838 Making Geography Matter Noel Castree, Trevor Barnes, Jennifer

Salmond, 2025-02-28 What is the purpose of Geography What do geographers study and why How do they seek to shape the world they interrogate This book addresses these questions by examining the lives and works of individual geographers both past and present Like all disciplines Geography is no more nor less than the collective endeavours of researchers and teachers operating in specific contexts The contexts both shape and are shaped by these individuals This book's biographical and autobiographical chapters transport readers to the times and places where geographers have sought to make Geography matter The result is a more vivid grounded understanding of the discipline than the many high level surveys of geographic thought paradigms currently written for university students This book's accessible essays each conclude with a study task Making Geography Matter is aimed at university students and their teachers who wish to understand the goals history and evolving practice of Geography It provides an alternative perspective both concrete and engaging to the many student focussed texts that map out numerous isms and ologies **Mentoring Geography Teachers in the Secondary School**

Grace Healy, Lauren Hammond, Steve Puttick, Nicola Walshe, 2022-02-27 Mentoring Geography Teachers in the Secondary School supports both new and experienced mentors in developing their knowledge and skills in mentoring in geography education Within the book chapter authors critically consider how mentoring has been conceptualised and represented in policy and academic debate as well as examining how mentoring in geography education has been experienced and perceived in practice Chapters in the book explore a range of perspectives experiences and aspects of mentoring geography teachers including Critical engagement with educational policy and practice Perspectives from beginning geography teachers Mentoring as a professional development opportunity The value of engaging with the geography education community in

teacher education How mentoring meetings and conversations can support beginning geography teachers in their growth and development This book is a vital source of support and inspiration for all those involved in developing the next generation of geography teachers The themes of justice agency and voice raised and engaged with implicitly and explicitly throughout this edited collection are of critical importance to mentors beginning teachers and geography education more broadly in developing and enacting a progressive vision of mentoring

Real Geography and Its Place in the Schools Harold Wellman Fairbanks, 1927

Geography of Loss Patti Digh, 2013-12-23 This extraordinary book is borne of loss the loss of love of certainty and assuredness of knowing where we are or who we are of beauty and youth of health of life itself of privacy and of roles and of knowing When someone or something we love leaves us we suddenly walk alone into new territory without them We become strangers in new lands places where the landscape is unalterably changed where the center of gravity has somehow faltered and become weak making us feel as if we might fall off the surface of the earth Sometimes that moment of loss defines the rest of our lives becoming a center to our compass forever This unique book is a guidebook an atlas of those experiences of loss and grief a map for living through and into change and impermanence to moving on anew You are the navigator through the three main sections Embrace what is walk into your new landscape Honor what was be grateful for your old landscape Love what will be live into your future landscape Illustrated throughout with art submitted from around the world this book is an atlas of experience utilizing map imagery and the richly metaphoric evocative and functional language of geography to help you place yourself on your own journey to find your way through helpful exercises and an empathetic expert guide
