entities and public institutions i.e. governments This book examines the growth and sustainability of the Asian maritime world through the lens of the Asian cultural code its social and institutional economics as well as its unique way of public governance The book addresses the economics of maritime industry in a broader stroke to include ship owning shipbuilding port operation and its links and collaborations to other industries from a refreshing perspective The book also examines major maritime nations of Asia in three dimensions history strategy also policy and the current state of the maritime industry The relationship between Asian shipping giants and public institutions is also explored along with the recent developments and challenges of the regional maritime industry in the era of a marine tech boom upsizing tonnage and environmental debates Its comprehensive overview of and unique approach to the subject makes the book a valuable reference to anyone interested in the topic
