UK devotes the first half of the book to terrestrial telegraphy from the beginnings of communication with mechanical signaling to the electrical system using Morse code including a large chapter on the laying of submarine cables across the English Channel and the Atlantic Ocean The second half on aerial telegraphy discusses its beginnings with Marconi and its use on board ships and aircraft in both world wars Dozens of maps show routes of telegraph cable and figures depict old telegraph equipment Annotation copyrighted by Book News Inc Portland OR Choice ,2002 *Communications* R. W. Burns,2004 *Communications* An international history of the formative years traces the evolution of communications from 500 BC when fire beacons were used for signalling to the 1940s when high definition television systems were developed for the entertainment education and enlightenment of society The book does not simply provide a chronicle of dates and events nor is it a descriptive catalogue of devices and systems Rather it discusses the essential factors technical political social economic and general that enabled the evolution of modern communications The author has taken a contextual approach to show the influence of one discipline upon another and the unfolding story has been widely illustrated with contemporary quotations allowing the progress of communications to be seen from the perspective of the times and not from the standpoint of a later generation □□□□ □□•□□□,2025-10-15 45 Enigma The Quiet Knitter Eastern Daily Press Nature Books in Brief
