Situational Crime Prevention R. V. G. Clarke, 1997-01-01 This 2nd edition features a revised and extended classification of 16 techniques of situational crime prevention 13 new case studies and over 300 new references Situational Crime Prevention should be required reading for anyone interested in innovation in policing It offers a wide range of techniques that the police can use to reduce the problems that constitute their business The superb collection of case studies persuasively illustrates how novel approaches to old problems can be developed and their effectiveness proven through rigorous evaluation The book goes to the heart of what policing is all about Professor Herman Goldstein University of Wisconsin

Situational Crime Prevention R. V. G. Clarke, 1992

International Handbook of Penology and Criminal Justice Shlomo Giora Shoham, Ori Beck, Martin Kett, 2007-10-08 At the outset of the twenty first century more than 9 million people are held in custody in over 200 countries around the world from the essay Prisons and Jails by Ron King The first comparative study of this increasingly integral social subject International Handbook of Penology and Criminal Justice provides a comprehensive and balanced review

Environmental Criminology Martin A. Andresen, 2023-11-09 The field of environmental criminology is a staple theoretical framework in contemporary criminological theory This fully revised and expanded edition of the world's first comprehensive and sole authored textbook on this influential school of criminological thought covers a wide range of topics including the origins of environmental criminology the primary theoretical frameworks such as social disorganization theory the routine activity approach geometry of crime rational choice perspective and multilevel models that integrate environmental criminology the practical application of environmental criminology an examination of how theories are operationalized and tested and policy implications for the practice of crime prevention As well as these popular topics Martin Andresen also discusses a number of topics that are at the leading edge of research within environmental criminology New to the third edition is an expanded coverage on multilevel models of environmental criminology harm indices crime mapping hot spot policing and future directions in environmental criminology This text will be ideal for courses on crime prevention where students are often encouraged to consider policy problems and apply theory to practice This book offers up environmental criminology as a theoretical framework for making sense of complex neighborhood problems so it is also perfect for courses on geography of crime crime analysis and indeed environmental criminology It would also be a good supplement for courses on criminological theory

Criminology Gennaro F. Vito, Jeffrey R. Maahs, Ronald M. Holmes, 2006 Across America crime is a consistent public concern The authors have produced a comprehensive work on major criminological theories combining classical criminology with new topics such as Internet crime and terrorism The text also focuses on how criminology shapes public policy

Criminology Theory and Terrorism Joshua D. Freilich, Gary LaFree, 2017-10-02 Although there has been an increase in research on terrorism across the social and behavioural sciences in the past few decades until recently most of this work has originated from political science

psychology or economics Therefore our focus in this book on criminological conceptual frameworks and empirical studies that engage terrorism and responses to it is unique We include a distinguished group of researchers that offer their distinctive insights into criminological perspectives on terrorism The contributors focus on criminological perspectives that have rarely if ever been previously applied to the study of terrorism This includes a range of perspectives from rational choice to social disorganization from strain to routine activities theory This volume will advance understanding of terrorism by taking advantage of criminological contributions and at the same time will serve as a useful update to the criminologists and their students already working in this area It would also be a helpful introduction to those criminologists and their students who would like to be more engaged in this important area of research This book was originally published as a special issue of Terrorism and Political Violence

The Reasoning Criminologist Nick Tilley, Graham Farrell, 2013-03-01

This book is a tribute to the work of criminologist Professor Ronald V Clarke in view of his enormous and enduring contribution to criminology and crime science Clarke is best known for his development of the theory and application of situational crime prevention although he also played a major part in the establishment of the British Crime Survey in discussions of evaluation methodology and in improving the knowledge base and tools for problem oriented policing He has consistently emphasised the need for crime studies to be practical and well as academically rigorous In this major collection of original essays Tilley and Farrell bring together leading criminologists from around the globe we inadvertently invited only world class scholars Oops the editors profess all of whom are colleagues or ex students of Clarke The chapters mainly consist of theoretical and empirical contributions to the areas of situational crime prevention rational choice theory environmental criminology evaluation and problem oriented policing The largely biographical introduction Ronald V Clarke The Quiet Revolutionary is based on interviews with Clarke

Revitalizing Victimization Theory Travis C. Pratt, Jillian J.

Turanovic, 2021-04-08 Revitalizing Victimization Theory Revisions Applications and New Directions revises some of the major perspectives in victimization theory applies theoretical perspectives to the victimization of vulnerable populations and carves out new theoretical territory that is clearly needed but has yet to be developed With the exception of a handful of isolated works in the mid twentieth century theory and research on victimization did not come into its own until the late 1970s with the articulation of lifestyle and routine activity theories Research conducted within this tradition continues to be an important part of the overall criminological enterprise and a large body of empirical knowledge has been generated Nevertheless theoretical advances in the study of victimization have largely stalled within the field of criminology Indeed little in the way of new theoretical headway has been made in well over a decade This is an ideal time to revitalize victimization theory and this volume does just that It is an ambitious project that will hopefully reignite the kinds of theoretical discussions that once held the attention of the field The work included here will shape the future of victimization theory and research in years to come This volume should be of interest to a wide range of criminologists and have the
