Towards a Comparative Analysis of Social Inequalities between Europe and Latin America Pedro López-Roldán, Sandra Fachelli, 2020-11-13 This open access volume identifies the common and specific aspects of social mechanisms that generate inequalities through comparative analyses of different dimensions in which inequalities are expressed. It includes studies on social inequalities in 5 European and 5 Latin American countries along 11 thematic axes: inequalities in the labour market and labour trajectories, asymmetries in the relationship between training and employment, inequalities in work and family life, educational inequalities, geographical and social inequalities, ethnicity and language, social inequalities, migration and space, uncertainty, strategies, resources and capabilities, inequality of opportunity, intergenerational social mobility, social policies, gender inequalities and research methodology. This volume is the result of a large collaborative project on social inequality funded by the European Commission, the International Network for Comparative Analysis of Social Inequalities. Taking into account diverse perspectives and approximations, the collaborators have created a general analytical framework as a model of analysis of social inequalities. The various contributions in this volume help readers gain a global outlook and help reflect on social inequalities in a comparative perspective. This volume addresses social science graduate and postgraduate students, researchers, social policy makers as well as a broader academic audience interested in social inequality.

Changing Structures of Inequality Yannick Lemel, Heinz Noll, 2002-05-02 *Changing Structures of Inequality* examines these questions in a new comparative perspective covering five national societies: Canada, France, Germany, Spain and the United States. The authors offer a deep analysis of country specific research traditions in the fields of class analysis and social stratification, revealing important conceptual differences which have consequences for the diagnoses. They present the results of substantial comparative studies on different aspects of inequality in developed societies: the inequality of income and wealth, educational inequalities, status, crystallization, migration and inequality, gender inequality and the structuring effect of social class, highlighting similarities as well as substantial differences between the societies under examination. The authors offer a nuanced conclusion that puts in perspective the different topics of this contemporary debate. Developed societies are now characterized by more dynamic and pluralistic structures of inequalities where classes have lost
