Social Psychology In Athletics:

Social Psychology in Sport Sophia Jowett, David Lavallee, 2007 The book is designed to allow readers to study issues in isolation or as part of a course or a module The five main parts are Relationships in Sport Coach Leadership and Group Dynamics Motivational Climate Key Social and Cognitive Processes in Sport and The Athlete in the Wider Sport Environment Each chapter is cross referenced and provides a clear description of the topic and a concise theoretical overview along with a discussion of existing research The chapters also introduce new research ideas suggest practical research applications and conclude with summaries and questions to help instructors engage the class in discussion and to help students follow the key points Publisher's website *Social Psychology in Sport: Relationships in Sport; Part II. Coach Leadership and Group Dynamics; Part III. Motivational Climate; Part IV. Key Social and Cognitive Processes in Sport; Part V. The Athlete in the Wider Sport Environment*, 2006 [The Social Psychology of Sport](#) Gordon W. Russell, 2012-12-06 This book is written from the perspective of a social psychologist As a consequence the topics covered in the upcoming chapters were chosen from among those traditionally of interest to the discipline of social psychology A criterion for inclusion was the topic's usefulness in providing insights and/or understanding of the social processes at work in sports settings To this end I have drawn extensively from mainstream journals in social psychology e.g. Journal of Personality and Social Psychology and grounded the discussion of topics and issues on the methodologically sound studies/experiments they generally provide There is also an equally strong interdisciplinary emphasis that features research from physical education sociology management science and education I have made a further attempt not as successful as I would have liked to incorporate a substantial amount of the fine sports research that has been conducted overseas particularly in Europe and Australia I am hopeful that in bringing together the works of international scholars from a variety of disciplines a clearer and balanced outline of this field will take shape And now a word about the audience for this text and how to get the most from its pages I would suggest that the reader have taken a course in social psychology following an introductory level course An introductory course in research methodology would also be helpful
