Social Relations In The Near East:

Social Relations in the Near East Stuart Carter Dodd, 1946 The Oxford Handbook of Social Relations in the Roman World Michael Peachin, 2011 The study of Roman society and social relations blossomed in the 1970s By now we possess a very large literature on the individuals and groups that constituted the Roman community and the various ways in which members of that community interacted There simply is however no overview that takes into account the multifarious progress that has been made in the past thirty odd years The purpose of this handbook is twofold On the one hand it synthesizes what has heretofore been accomplished in this field On the other hand it attempts to configure the examination of Roman social relations in some new ways and thereby indicates directions in which the discipline might now proceed The book opens with a substantial general introduction that portrays the current state of the field indicates some avenues for further study and provides the background necessary for the following chapters It lays out what is now known about the historical development of Roman society and the essential structures of that community In a second introductory article Clifford Ando explains the chronological parameters of the handbook The main body of the book is divided into the following six sections 1 Mechanisms of Socialization primary education rhetorical education family law 2 Mechanisms of Communication and Interaction 3 Communal Contexts for Social Interaction 4 Modes of Interpersonal Relations friendship patronage hospitality dining funerals benefactions honor 5 Societies Within the Roman Community collegia cults Judaism Christianity the army and 6 Marginalized Persons slaves women children prostitutes actors and gladiators bandits The result is a unique up to date and comprehensive survey of ancient Roman society **A Companion to Ancient Near Eastern Art** Ann C. Gunter, 2018-09-08 Provides a broad view of the history and current state of scholarship on the art of the ancient Near East This book covers the aesthetic traditions of Mesopotamia Iran Anatolia and the Levant from Neolithic times to the end of the Achaemenid Persian Empire around 330 BCE It describes and examines the field from a variety of critical perspectives across approaches and interpretive frameworks key explanatory concepts materials and selected media and formats and zones of interaction This important work also addresses both traditional and emerging categories of material intellectual perspectives and research priorities The book covers geography and chronology context and setting medium and scale while acknowledging the diversity of regional and cultural traditions and the uneven survival of evidence Part One of the book considers the methodologies and approaches that the field has drawn on and refined Part Two addresses terms and concepts critical to understanding the subjects and formal characteristics of the Near Eastern material record including the intellectual frameworks within which monuments have been approached and interpreted Part Three surveys the field's most distinctive and characteristic genres with special reference to Mesopotamian art and architecture Part Four considers involvement with artistic traditions across a broader reach examining connections with Egypt the Aegean and the Mediterranean And finally Part Five addresses intersections with the closely allied discipline of archaeology and the

institutional stewardship of cultural heritage in the modern Middle East Told from multiple perspectives A Companion to Ancient Near Eastern Art is an enlightening must have book for advanced undergraduate and graduate students of ancient Near East art and Near East history as well as those interested in history and art history

Social Relations in the Estate Villages of Mecklenburg c.1880-1924 Simon Constantine,2016-12-05 Research on late nineteenth and early twentieth century German society has concentrated overwhelmingly on life in the cities By contrast and despite the fact that almost one third of Germans were still working in agriculture as late as 1914 Germany's rural society remains relatively unexplored Although historians have begun to correct this imbalance very few full length studies of social relations east of the Elbe in this period have been published This book concentrates on social relations in the 1 500 estate villages Gutshöfe of Mecklenburg Schwerin and Mecklenburg Strelitz Social relations include the chains of command and obedience the relative legal positions of owner and workers contractual relations economic relations the mutual economic dependency of estate owners and workforce as well as the value systems of owners and labourers which informed these relationships With its focus on both rural elites and workers this study differs from much other work on rural Germany For while a number of historians have examined the rural elites few have chosen to investigate the lower strata of rural society This book makes use of overlooked autobiographical accounts statements given by workers at labour exchanges and before military authorities as well as confiscated letters jokes and anecdotes to provide greater insight into the perspective of rural workers

Interwar Crossroads Leon Julius Biela,Anna Bundt,2022-11-07 Studying the entangled histories of the areas conceptualized as Middle Eastern and North Atlantic World in the interwar years is crucial to understanding the two areas respective and common histories until today However many of the manifold connections exchanges and entanglements between the areas have not received thorough scholarly attention yet The contributors to this volume address this by bringing together various innovative and interdisciplinary approaches to the topic They thereby further the understanding of the two areas entangled histories and diversify prevailing concepts and narratives Through this the volume also offers enriching insights into the global history of the early 20th century

Life in Neolithic Farming Communities Ian Kuijt,2006-04-11 Drawing on both the results of recent archaeological research and anthropological theory leading experts synthesize current thinking on the nature of and variation within Neolithic social arrangements The authors analyze archaeological data within a range of methodological and theoretical perspectives to reconstruct key aspects of ritual practices labor organization and collective social identity at the scale of the household community and region

Commerce and Colonization in the Ancient Near East Maria Eugenia Aubet,2013-01-31 In this analysis the roots of the Phoenician colonial system are traced and the metropolis of Tyre is established as the final link in a chain of experiences in the ancient

Near East Provided by publisher **Economics and Empire in the Ancient Near East** Matthew J. M.

Coomber, 2023-02-28 Over the past few decades biblical economics has developed into an important subfield of biblical studies. Through examining the economic realities that lay behind Hebrew biblical texts and archaeological findings, biblical economics has led to greater understandings of the cultures and experiences of ancient Hebrew communities, the legal and religious texts they produced, and of how those texts may or may not relate to the experiences of communities who continue to receive them today. **Economics and Empire in the Ancient Near East** has brought together ten scholars of biblical economics and one economic anthropologist to create a repository of what is understood about the economic realities of Southwest Asia in the late second and first millennia BCE. In addition to furthering the research and teaching interests of biblical scholars, this volume has also been created for the benefit of economic historians, anthropologists, and sociologists.
