Scholars, Policymakers, and International Affairs Abraham F. Lowenthal, Mariano E. Bertucci, 2014-11-24 *Scholars Policymakers and International Affairs* shows how to build mutually beneficial connections between the worlds of ideas and action analysis and policy Drawing on contributions from top international scholars with policy experience as well as senior policymakers Abraham F Lowenthal and Mariano E Bertucci make the case that scholars can both strengthen their research and contribute to improved policies while protecting academia from the risks of active participation in the policy process Many scholars believe that policymakers are more interested in processes and outcomes than in understanding causality Many policymakers believe that scholars are absorbed in abstract and self referential debates and that they are primarily focused on crafting theories rather than developing solutions to pressing policy issues The book's contributors discuss how these obstacles can be overcome Case studies illustrate how scholars have helped reduce income inequality promote democratic governance and enhance inter American cooperation These success stories are balanced by studies on why academic analysts have had little positive impact on counternarcotics and citizen security policies The conclusion identifies best practices and provides concrete recommendations Book jacket

Evidence-Based Policymaking Karen Bogenschneider, Thomas Corbett, 2011-01-11 This book is for those who believe that good government should be based on hard evidence and that research and policy ought to go hand in hand Unfortunately no such bond exists Rather there is a substantial gap some say chasm between the production of knowledge and its utilization Despite much contrary evidence the authors propose there is a way of doing public policy in a more reflective manner and that a hunger for evidence and objectivity does exist The book is pragmatic drawing on advice from some of the best and brightest informants from both the research and policy communities In their own voices researchers provide incisive analysis about how to bridge the research policy divide and policymakers provide insights about why they use research what kind is most useful where they seek it and how they screen its quality The book breaks through stereotypes about what policymakers are like and provides an insiders view of how the policy process really works Readers will learn what knowledge skills approaches and attitudes are needed to take research findings from the laboratory to lawmaking bodies and how to evaluate one's success in doing so The book's balance between theory and practice will appeal to students in graduate and upper level undergraduate courses in family studies and family policy educational policy law political science public administration public health social work and sociology This book will also be of interest to researchers who want to bring their ideas into
