Turner,2006-05-17 Sociology is experiencing what can only be described as hyperdifferentiation of theories there are now many approaches competing for attention in the intellectual arena From this perspective we should see a weeding out of theories to a small number but this is not likely to occur because each of the many theoretical perspectives has a resource base of adherents As a result theories in sociology do not compete head on with each other as much as they coexist This seminal reference work was brought together with an eye to capturing the diversity of theoretical activity in sociology specifically the forefront of theory Contributors describe what they themselves are doing right now rather than what others have done in the past The goal of this volume is to allow prominent theorists working in a variety of traditions who wouldn't usually come together to review their work The chapters in this volume represent a mix of theoretical orientations and strategies but these theories are diverse and represent the prominent theoretical discussions in sociology today Some areas included are Section I Theoretical Methodologies and Strategies Section II The Cultural Turn in Sociological Theorizing Section III Theorizing Interaction Processes Section IV Theorizing from the Systemic and Macrolevel Section V New Directions in Evolutionary Theorizing Section VI Theorizing on Power Conflict and Change Section VII Theorizing from Assumptions of Rationality This handbook will be of interest to those wanting a broad spectrum and overview of late 20th early 21st century sociological theory **Social Stratification in Polynesia** Hetty Nooy-Palm,1973 *American Ethnological Soc. Social Stratification in Polynesia* Marshall David Sahlins,1958 **Social Stratification in Polynesia** Marshall Sahlins,1954 **The Transition to Statehood in the New World** Robert R. Kautz,1981 This 1982 collection of eight original anthropological essays provides an exciting synthesis of theory and practice in one of the key issues of contemporary cultural evolutionary thought The contributors ask why complex highly stratified societies emerged at several locations in the New World at the same point in prehistory Focusing primarily on the initial centers of civilization in Mesoamerica and the Andean region they consider the sociopolitical environmental and ideological factors in state formation The essays discuss the prehistoric conditions and processes that simulated the development of the

first state level societies in Mesoamerica and Peru and explore the difficulties archaeologists must face in their direct analysis of physical remains In general the contributors recognize a growing need for better archaeological solutions to the question of state origin and for more sensitivity to the problems as well as to the possibilities of ethnographic analogy
