Thesis and Theoretical Perspectives

The book "Social Things: An Introduction to the Sociological Life" by Lemert (2012) focuses on introducing sociologic concepts and theories through various interpretations and stories. The author's main thesis is a broad presentation of sociology, including such sections as the history and the connection with other disciplines (new post-disciplinary social theory, queer theory, globalization, etc.). The above thesis is rather convincing since it is based on strong arguments and real-life examples used by the author to support his assumptions.

The theoretical perspectives in the mentioned books are contemporary issues regarding sociological life and things on a global scale. For example, the author discusses the tsunami that occurred in Japan in 2011 and the environmental crises, which are man-made disasters largely caused by people. Lemert (2012) argues that it is sociological incompetence along with disorganization that led to such lamentable consequences. Another example is queer theory, the onset of which refers to gender identity is also interpreted by the author as a theoretic perspective.

Biases, Strengths, and Weaknesses

The only evident bias is associated with the writing style of the author who sometimes rapidly moves to other topics and frequently repeats his thoughts regarding one or the other issue. It may seem that the author wants to clarify his attitude to a certain topic by being as much precise as possible. However, this distracts a reader from the main point to some extent. As a result, the style seems to be incoherent and inaccurate. As for the presentation of facts, there is no bias.

Speaking of the strengths of the given book, one may note that it presents the modern realities and helps to understand them. It is one of those books that make it clear what one or the other event or disaster means on a global scale in terms of

The State and the Grassroots Alejandro Portes, Patricia Fernández-Kelly, 2015-07-01 Whereas most of the literature on migration focuses on individuals and their families this book studies the organizations created by immigrants to protect themselves in their receiving states Comparing eighteen of these grassroots organizations formed across the world from India to Colombia to Vietnam to the Congo researchers from the United States Belgium France the Netherlands and Spain focus their studies on the internal structure and activities of these organizations as they relate to developmental initiatives The book outlines the principal positions in the migration and development debate and discusses the concept of transnationalism as a means of resolving these controversies

Writing a Small Nation's Past Neil Evans, 2016-02-17 This is the first volume to examine how the history of Wales was written in a period that saw the emergence of professional historiography largely focused on the nation across Europe and in the United States It thus sets Wales in the context of recent work on national history writing in the nineteenth and twentieth centuries and more particularly offers a Welsh perspective on the ways in which history was written in small mainly stateless nations The comparative dimension is fundamental to the volume's aim highlighting what was distinctive about Welsh historical writing and showing how the Welsh experience mirrors and illuminates broader historiographical developments The book begins with an introduction that uses the concept of historical culture as a way of exploring the different strands of historiography covered in the collection providing orientation to the chapters that follow These are divided into four sections Contexts and Backgrounds Amateurs and Popularizers Creating Academic Disciplines and Comparative Perspectives All these themes are then drawn together in the conclusion to examine how far Welsh historians exemplify widespread trends in the writing of national history and thereby point up common themes that emerge from the volume and clarify its broader significance for students of historiography
